To view detailed instructional videos, go to www.nissanownersinfo.mobi/2013/leaf or snap this barcode with an appropriate barcode reader.

A cellular telephone should not be used for any purpose while driving so full attention may be given to vehicle operation.
- Always wear your seat belt.
- Supplemental air bags do not replace proper seat belt usage.
- Children 12 and under should always ride in the rear seat properly secured in child restraints or seat belts according to their age and weight.
- Do not drink and drive.
new system features

REMOTE FUNCTIONS*

Vehicle telematic capabilities enable you to perform remote functions from a compatible internet enabled smart phone or personal computer such as:

- Battery status - The status of the battery can be checked even if you are not in the vehicle.
- Unplugged status and charging status - A notification e-mail and/or text message can be sent if the charge connector is not connected or if battery charging is stopped mid-charge.
- Remote charge and remote climate control - Start battery charging or set a time to turn on your climate controls.

*Remote functions are only available when the following conditions are met:
- Optional CARWINGS® (if so equipped) subscription service has been established.
- Your vehicle and smart phone are in a compatible cell phone coverage area and your personal computer is connected to the internet.

For more information, refer to the “Charging (section CH)” of your Owner’s Manual and the “LEAF Navigation System Overview (section IT)” of your Navigation System Owner’s Manual.

APPROACHING VEHICLE SOUND FOR PEDESTRIANS (VSP) SYSTEM

- The VSP system helps alert pedestrians to the presence of the vehicle when it is being driven at a low speed.
- When the vehicle starts to move, it produces a sound. The sound stops when the vehicle speed reaches approximately 19 MPH (30 km/h) while accelerating.

For more information, refer to the “EV Overview (section EV)” of your Owner’s Manual.

SOLAR CELL MODULE (if so equipped)

- The solar cell module helps provide a supplementary charge to the 12-volt battery.
- The 12-volt battery supplies power to the audio system, windshield wipers, lights and other low-voltage systems.

For more information, refer to the “EV Overview (section EV)” of your Owner’s Manual.

AROUND VIEW® MONITOR (if so equipped)

- With the ignition switch in the ON position, the Around View® Monitor is activated by pressing the CAMERA button 01, located on the navigation unit, or by moving the vehicle to the R (REVERSE) position. The monitor displays various views of the position of the vehicle.
- When the vehicle is in the P (PARK), N (NEUTRAL) or D (DRIVE) position and the CAMERA button 01 is pressed, the following views will display in order:

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
When the vehicle is in the R (REVERSE) position and the CAMERA button is pressed, the following views will display in order:

- Rear view & bird's-eye view
- Press
- Front view & front-side view
- Press
- Front view & bird's-eye view
- Press

The colored guide lines on the display screen indicate vehicle width and approximate distances to objects with reference to the vehicle body line.

- Red 1.5 ft (0.5 m); Yellow 3 ft (1 m); Green 7 ft (2 m) and 10 ft (3 m).

For information regarding how to access additional viewing cycles, please see your Navigation Owner's Manual.

There are some areas where the system will not show objects.

- When in the front or the rear view display, an object below the bumper or on the ground may not be viewed.
- When in the bird's-eye view, a tall object near the seam of the camera detecting areas will not appear in the monitor.

The distance between objects viewed on the Around View® Monitor differs from the actual distance.

Objects in the bird's-eye view will appear farther than the actual distance.

For more information, refer to the "Monitor system (if so equipped) (section 9)" of your Navigation System Owner's Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
**SHIFT CONTROL SYSTEM**

This vehicle is equipped with an electric shift control system, providing smooth and easy shift lever operation.

- There are five shift positions for operating the vehicle: **P (PARK)**, **R (REVERSE)**, **N (NEUTRAL)**, **D (DRIVE)** and **B-Mode**.

  - **P (PARK)** - Activated by pressing the **P (PARK)** button on the shift lever.
  - **D (DRIVE)** - For normal driving. Activated by moving the shift lever left and down. The shift lever will then return to the center position.
  - **B-Mode** - Engages the regenerative braking system more aggressively when decelerating, helping to put energy back into the battery pack. Activated by moving the shift lever left and down. The shift lever will then return to the center position.

- **ECO** - Consumes less power and helps extend vehicle range.

  - While in either **D (DRIVE)** or **B-MODE**, **ECO** can be activated by pressing the **ECO** button on the right side of the steering wheel.
  - While in **ECO** there will be a reduced acceleration response.

For more information, refer to the “**EV Overview (section EV)**” of your Owner’s Manual.

**HEATED SEATS**

- The front seats and the rear outboard seats can be warmed by built-in heaters.
- The switches located on the center console (front seats) and on the side of the front passenger seatback (rear seats) can be operated independently of each other.
- The heater is controlled by a thermostat, automatically turning the heater on and off. The indicator light will remain on as long as the switch is on.

For more information, refer to the “**Instruments and Controls (section 2)**” of your Owner's Manual.

**CHARGE PORT LID**

- To open the charge port lid do the following:
  1. Push the charge port lid opener switch on the instrument panel, or
     - Press and hold the charge port lid opener button on the Intelligent Key for more than 2 seconds.
  2. When the charge port lid springs up slightly, place your hand underneath the lid and open to the fully open position.
- To close the charge port lid, slowly move the lid down and lock it securely in place.

To view detailed instructional videos regarding these and other features, please go to [www.nissanownersinfo.mobi](http://www.nissanownersinfo.mobi).
COLD WEATHER RANGE

- Vehicle range may be reduced when the temperature drops below -4°F (-20°C).
- Using the climate control system to heat the cabin when the outside temperature is below 32°F (0°C) uses more electricity and affects vehicle range more than using the heater at temperatures above 32°F (0°C).

For more information, refer to the "EV Overview (section EV)" and the "Starting and driving (section 5)" of your Owner’s Manual.

PARKING IN EXTREMELY COLD WEATHER

- Do not store the vehicle in temperatures below -13°F (-25°C) for over seven days. If the outside temperature is -13°F (-25°C) or less, the Li-ion battery may freeze and it cannot be charged or provide power to run the vehicle.
- The Li-ion battery heater does not operate if the available Li-ion battery charge is less than approximately 30% and the charger is not connected to the vehicle. To help prevent the Li-ion battery from freezing, do not leave the vehicle in an environment if temperatures may go below -1°F (-17°C) unless the vehicle is connected to a charger.

For more information, refer to the "EV Overview (section EV)" of your Owner’s Manual.

QUICK CHARGE IN COLD WEATHER (if so equipped)

- It may take more time to charge the Li-ion battery using the quick charger if the vehicle is parked in a cold location (for example 32°F (0°C)) for a long period of time.
- The Li-ion battery temperature gauge can be used to estimate the approximate time needed to charge the Li-ion battery to 80%.

<table>
<thead>
<tr>
<th>Li-ion battery temperature gauge</th>
<th>Estimated charge time</th>
</tr>
</thead>
<tbody>
<tr>
<td>A 3 or less segments illuminated</td>
<td>More than approximately 90 minutes</td>
</tr>
<tr>
<td>B 4-5 segments illuminated</td>
<td>approximately 30-90 minutes</td>
</tr>
<tr>
<td>C 6-7 segments illuminated</td>
<td>approximately 30 minutes</td>
</tr>
<tr>
<td>D 8-9 segments illuminated</td>
<td>approximately 30-60 minutes</td>
</tr>
<tr>
<td>E 10 or more segments illuminated</td>
<td>More than approximately 60 minutes</td>
</tr>
</tbody>
</table>

For more information, refer to the "Charging (section CH)" and the "Starting and driving (section 5)" of your Owner’s Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
LI-ION BATTERY TEMPERATURE GAUGE

- The temperature of the Li-ion battery is in the normal range [01] when the display is within this zone.
- The temperature of the Li-ion battery varies with outside air temperature, road surface temperature, driving conditions, and charging rate.
- To protect the battery, power is reduced when the temperature of the battery is too high or low. This does not indicate a malfunction.

For more information, refer to the “Instruments and controls (section 2)” of your Owner’s Manual.

LI-ION BATTERY LIFE

- If the vehicle is parked for a long period of time, the Li-ion battery will gradually discharge.
- To keep the Li-ion battery in good condition, charge the battery once every 3 months using the long life mode charging method.
- If the Li-ion battery becomes fully discharged and the Electric Vehicle (EV) system will not activate even with a jump-start to the 12-volt battery, contact a NISSAN certified LEAF dealer.

For more information, refer to the “EV Overview (section EV)” of your Owner’s Manual.

LI-ION BATTERY GAUGES

- The Li-ion Battery Available Charge Gauge [01] displays the approximate available Li-ion battery power remaining to drive the vehicle. Recharge the Li-ion battery before these lights reach the bottom line.
- The Li-ion Battery Capacity Level Gauge [02] indicates the amount of charge the Li-ion battery is capable of storing.
- The driving range [03] provides an estimated distance that the vehicle can be driven before recharging is necessary. The driving range is constantly being calculated, based on the amount of available Li-ion battery charge and the actual power consumption average.

For more information, refer to the “Instruments and controls (section 2)” of your Owner’s Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
POWER LIMITATION INDICATOR LIGHT

- When the power limitation indicator light illuminates, power provided to the traction motor is reduced.
- This light illuminates in the following conditions:
  - The Li-ion battery available charge is extremely low.
  - The Li-ion battery temperature is very low.
  - The temperature of the Electric Vehicle (EV) system is high (motor, inverter, coolant system, Li-ion battery, etc.).
  - The EV system has a malfunction.
- If the power limitation indicator light is illuminated, follow the instructions provided on the navigation display.

For more information, refer to the “Instruments and Controls (section 2)” of your Owner’s Manual.

TIRE PRESSURE MONITORING SYSTEM (TPMS) WITH EASY FILL TIRE ALERT

- A CHECK TIRE PRESSURE warning message will appear in the dot matrix liquid crystal display 01 and the low tire pressure warning light 02 will illuminate when one or more tires are low on pressure and air is needed.
- When adding air to an under-inflated tire, the TPMS with Easy Fill Tire Alert system provides visual and audible signals to help you inflate the tires to the recommended COLD tire pressure.
- To use the Easy Fill Tire Alert system:
  1. Apply the parking brake and press the P (PARK) button on the shift lever.
  2. Place the power switch in the ON position. Do not place in the READY to drive mode.
  3. Add air to the underinflated tire and within a few seconds, the hazard warning lights will flash.
  4. When the designated tire pressure is reached, the horn will beep once and the hazard warning lights will stop flashing.
  5. Repeat this procedure for any additional underinflated tires.
- After tire pressures are adjusted, drive the vehicle at speeds above 16 MPH (25km/h) and the warning and indicator light will disappear.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
When the low tire pressure warning light flashes for approximately 1 minute and then remains on, the TPMS is not functioning properly. Have the system checked by a NISSAN certified LEAF dealer.

Tire pressure rises and falls depending on the heat caused by the vehicle’s operation and the outside temperature. Low outside temperature can lower the temperature of the air inside the tire, which can cause a lower tire inflation pressure. This may cause the low tire pressure warning light to illuminate. If the warning light illuminates, check the tire pressure in your tires.

For more information, refer to the “Instruments and controls (section 2)” and the “Starting and driving (section 5)” of your Owner’s Manual.

**INSTRUMENT PANEL CLOCK**

To adjust the instrument panel clock, use the Settings menu in the dot matrix liquid crystal display.

The Settings menu is accessed by pressing the button on the left side of the instrument panel.

Press the button to cycle through the various Settings modes.

This clock is linked to GPS (if so equipped) through the center display clock.

- Without any adjustments the correct time will be displayed based on the vehicle’s current location.
- There are also controls in the center display to compensate for daylight savings time.

For more information, refer to the “Instruments and Controls (section 2)” of your Owner’s Manual.
NISSAN INTELLIGENT KEY® SYSTEM
The NISSAN Intelligent Key® System allows you to lock or unlock the vehicle, open the rear hatch and start your vehicle. It is important to make sure the Intelligent Key is with you (that is, in your pocket or purse).

- To lock the vehicle, push either door handle request switch 01 or the rear hatch request switch 02 once or press the 03 button on the keyfob.
- To unlock the vehicle, perform one of the following procedures:
  - Push any request switch once; the corresponding door will unlock. Push the request switch again within 60 seconds; all other doors will unlock, or
  - Press the 04 button on the keyfob to unlock the driver’s side door. Press the button again; all other doors will unlock.
- To open the charge port lid, press and hold the charge port lid opener button 05 for more than 2 seconds.
- The Intelligent Key can also be used to activate the panic alarm by pressing and holding the 06 button for more than 1 second. Once activated, the panic alarm and headlights will stay on for a period of time.

For more information, refer to the “Pre-driving checks and adjustments (section 3)” of your Owner’s Manual.

REAR HATCH RELEASE
To open the rear hatch, unlock it and push the rear hatch opener switch 01. Pull the rear hatch up to open. The rear hatch can be unlocked by:

- Pressing the 02 button on the NISSAN Intelligent Key® twice.
- Pushing the rear hatch request switch 03 while carrying the Intelligent Key with you.
- Pushing the door handle request switch twice.
- Pushing the power door lock switch to the 01 position.
- The rear hatch does not lock when closed. To lock the rear hatch use the request switch, power door lock, or keyfob.

For more information, refer to the “Pre-driving checks and adjustments (section 3)” of your Owner’s Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissанownersinfo.mobi.
SEAT ADJUSTMENTS

- To slide the front seat forward or backward, pull up on the bar 01 under the front of the seat and slide forward or backward. Release the bar to lock the seat in position.

- To recline the seatback, pull up on the lever 02 and lean back. To bring the seatback forward, pull the lever up and lean your body forward. Release the lever to lock the seatback in position.

SEAT LIFTER (driver’s seat only)

- Pull up or push down the adjusting lever 03 to adjust the seat height to the preferred position.

FOLDING THE REAR SEATBACKS DOWN

- Secure the seat belt on the seat belt hooks 04 located on the side wall.

- To fold the seatback down, pull the release knob 05.

- To return the seatback to the seating position, lift up each seatback and push it to the upright position until it is latched. Then return the seat belt to its original position.

For more information, refer to the “Safety – Seats, seat belts and supplemental restraint system (section 1)” of your Owner’s Manual.

OUTSIDE MIRROR CONTROL SWITCH

- To select the right or left side mirror, turn the control switch 01 right or left.

- To adjust the mirror angle, move the control switch 01 up, down, right or left.

- To prevent accidentally moving the mirror, turn and set the switch to the middle “neutral” position.

For more information, refer to the “Pre-driving checks and adjustments (section 3)” of your Owner’s Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
POWER METER

- The Power Meter displays the traction motor power consumption and the regenerative brake power supplied to the Li-ion battery.
- When the battery is charged, power is generated by the regenerative brake system and the central dot moves to the left.
- When the battery discharges and power is provided to the motor, the central dot moves to the right.
- The number of circles will increase or decrease depending on Li-ion battery conditions (motor output is limited if the Li-ion battery temperature is too high or too low or if the Li-ion battery level is low).

For more information, refer to the "Instruments and controls (section 2)" of your Owner’s Manual.

ELECTRIC VEHICLE (EV) SYSTEM WARNING LIGHT

- The warning light will illuminate if there is a malfunction in the following systems:
  - Traction motor and inverter system
  - Charge port or on-board charger
  - Li-ion battery system
  - Cooling system
  - Shift control system
  - Emergency shut off system is activated.
- If the warning light illuminates, contact a NISSAN certified LEAF dealer.

For more information, refer to the "Instruments and controls (section 2)" of your Owner’s Manual.
STARTING/STOPPING THE ELECTRIC VEHICLE (EV) SYSTEM

It is important to make sure the NISSAN Intelligent Key® is with you (that is, in your pocket or purse).

- Confirm the parking brake is applied and press the P (PARK) button on the shift lever to place it in the P (PARK) position.
- Depress the brake pedal.
- Push the power switch to start the EV system.
- Check that the READY to drive indicator light illuminates and the start up sound is audible.
- Check the Li-ion battery level and the estimated driving range shown on the meter.

TURNING THE EV SYSTEM OFF

- Press the P (PARK) button on the shift lever to place it in the P (PARK) position.
- Apply the parking brake.
- Push the power switch to the OFF position.

For more information, refer to the Starting and driving (section 5)” of your vehicle’s Owner’s Manual.

HEADLIGHT CONTROL SWITCH

HEADLIGHT CONTROL

- Turn the headlight control switch to the position to turn on the front parking, side marker, tail, license plate and instrument panel lights. Turn the switch to the position to turn on the headlights.

AUTOLIGHT SYSTEM

- The autolight system will automatically turn the headlights on when it is dark and off when it is light. The system will keep the headlights on for a period of time after you turn the ignition off and all doors are closed.
- To activate the autolight system, turn the headlight control switch to the AUTO position then turn the ignition switch to ON. To deactivate the autolight system, turn the headlight control switch to the OFF, position or position .

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
HIGH BEAM SELECT
- Push the headlight control switch forward 04 to select the high beam function. The blue indicator light illuminates in the instrument panel. Pull the headlight switch back to the original position to select the low beam. The blue indicator light goes off.
- Pull and release the headlight control switch 05 to flash the headlight high beams on and off.

FOG LIGHT SWITCH (if so equipped)
In order to operate the fog lights you must have your headlights on with the low beams selected.
- Turn the switch (inside collar) to the position 06 to turn the fog lights on.
- Turn the switch (inside collar) to the OFF position to turn the fog lights off.

For more information, refer to the “Instruments and controls (section 2)” of your Owner’s Manual.

WINDSHIELD WIPER AND WASHER SWITCH
- Move the lever to the following positions to operate the windshield wipers:
  01 Mist (MIST) - One sweep operation of the front wipers.
  02 Intermittent (INT) - Move the lever down to the INT position and then rotate the control ring 03 away from you to increase INT wiper speeds.
  04 Low (LO) - Front wipers operate at a continuous low-speed.
  05 High (HI) - Front wipers operate at a continuous high-speed.
  06 Pull the lever toward you to activate the front washer. The front wipers will operate several times.

REAR WINDSHIELD WIPER AND WASHER
  07 Intermittent (INT) - Rear wiper operates intermittently.
  08 Low (ON) - Rear wiper operates at a continuous low-speed.
  09 Push the lever forward to activate the rear washer. The rear wiper will operate several times.

For more information, refer to the “Instruments and controls (section 2)” of your Owner’s Manual. To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
first drive features

AUTOMATIC CLIMATE CONTROLS (if so equipped)

01 ON-OFF BUTTON
- Press the ON-OFF button to turn the climate control system on or off.

02 AUTO BUTTON
- The AUTO mode may be used year-round. Press the AUTO button and the system will automatically control the inside temperature (automatic cooling and/or dehumidified heating), air flow distribution and fan speed.

03 TEMPERATURE CONTROL BUTTON
- Press the temperature control button up ▲ for warmer air or down ▼ for cooler air.

04 FAN SPEED CONTROL BUTTON
- Press the fan speed control button to manually adjust the fan speed up + or down − .

05 MODE BUTTON
- Press the MODE button to manually control air flow outlets. Air will flow from the center vents, side vents, foot outlets and defroster outlets as indicated by the icons on your control panel display screen.

06 HEAT BUTTON
- Press the HEAT button to manually turn on and off the heater.

07 A/C BUTTON
- Press the A/C button when you want to manually turn the A/C on or off.

08 AIR RECIRCULATION BUTTON
- Press the air recirculation button ⚏ to recirculate air inside the vehicle. The indicator light on the button will illuminate. This system is used to avoid certain outside odors and helps to adjust the inside vehicle temperature more effectively.
- Press the air recirculation button again ⚏ to turn air recirculation off. This allows outside air to be drawn into the passenger compartment to prevent fogging in defrost, floor, or defrost/floor modes.
- The air recirculation mode can only be selected if the air flow control mode is in the ◄ , ◄ or ◄ position.

09 DEFROSTING/DEFOGGING FRONT AND SIDE WINDOWS
- Press the front window defroster button ⚛ to turn the system on. The A/C automatically turns on when the defroster mode is selected. This feature removes humidity from the air.
- Set the temperature control buttons and the fan speed control buttons to their maximum settings.

10 REAR WINDOW AND OUTSIDE MIRROR DEFROSTER SWITCH
- Push the rear window defroster button ⚛ to turn the system on or off.
- The rear window defroster automatically turns off after approximately 15 minutes.

11 CLIMATE CONTROL TIMER INDICATOR
- The climate control timer indicator light will illuminate when the timer has been set to operate at a specific time of day and date.

For more information, refer to the “Heater, air conditioner, audio and phone systems (section 4)” of your Owner’s Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
FM/AM/SiriusXM® SATELLITE RADIO WITH CD PLAYER (if so equipped)

01 POWER BUTTON
Press the  button to turn the audio system on or off.

02 VOLUME BUTTON
Press the volume control button up ▲ to increase or down ▼ to decrease the volume.

03 TUNE/SEEK/CH BUTTON
To manually tune the radio, press the TUNE/SEEK/CH button up ▲ or down ▼.
To scan quickly and stop at the previous or next broadcast station, press the TUNE/SEEK/CH button for more than 1.5 seconds.
For SiriusXM Satellite Radio, press the TUNE/SEEK/CH button to switch to the first channel of the previous or next category.
To change tracks on a CD, press the TUNE/SEEK/CH button.
To fast forward or rewind a track on a CD, press and hold the TUNE/SEEK/CH button.

04 PRESET STATION/CHANNEL KEYS
Twelve stations can be set for the FM band, six for the AM band and eighteen for SiriusXM Satellite Radio.
To store a station in a preset you must first select a radio band by pressing the FM-AM or XM button, then tune to the desired AM, FM or SiriusXM Satellite Radio station.
Now, select and hold the desired preset key (1-6) to store the selected station in memory.
To retrieve a previously set station, select the radio band where it was stored. Then select the corresponding preset key (1-6).

07 OPEN/TILT BUTTON
To insert a CD, press the OPEN/TILT button and the monitor will open. Insert a CD into the slot with the label side facing up.
To close the monitor, press the OPEN/TILT button again.

08 ZERO EMISSION BUTTON
Press the ZERO EMISSION button to display a menu screen where several electric vehicle driving functions can be set.

*SiriusXM Satellite Radio is only available on vehicles equipped with optional SiriusXM Satellite Radio subscription service. For more information, refer to the “Getting started (section 1)” and “Audio system (section 4)” of your Navigation System Owner’s Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
CRUISE CONTROL (if so equipped)

- The cruise control system enables you to set a constant cruising speed once the vehicle has reached 25 MPH (40 km/h).
- The system will automatically maintain the set speed until you tap the brake pedal, accelerate, cancel or turn the system off.
- To activate the cruise control, push the CRUISE ON/OFF switch 01. The CRUISE indicator light in the instrument panel will illuminate.
- To set cruising speed, accelerate the vehicle to the desired speed, push the COAST/SET switch 02 and release. Take your foot off the accelerator pedal. Your vehicle will maintain the set speed.
- To reset at a faster cruising speed, push and hold the ACCEL/RES switch 03. When the vehicle attains the desired speed, release the switch.
- To reset at a slower cruising speed, push and hold the COAST/SET switch 02. Release the switch when the vehicle slows to the desired speed.
- To cancel the preset speed, push the CANCEL switch 04.
- To turn off cruise control, push the CRUISE ON/OFF switch 01. The CRUISE indicator light in the instrument panel will turn off.

For more information, refer to the “Starting and driving (section 5)” of your Owner’s Manual.

USB/iPOD® INTERFACE

- The USB jack 01 is located on the instrument panel, below the climate controls.
- When a compatible USB memory device or iPod® is plugged into the USB jack, compatible audio files stored on the device can be played through the vehicle’s audio system.

For more information, refer to the “Heater, air conditioner, audio and phone systems (section 4)” of your Owner’s Manual, and “Audio systems (section 4)” of your Navigation System Owner’s Manual.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
LI-ION BATTERY CHARGING

Before charging the Li-ion battery, see your Owner’s Manual for detailed warnings and cautions when charging your battery.

- There are three methods available to perform the charge operation: normal charge, trickle charge and quick charge (if so equipped).

NORMAL CHARGE

- Perform a normal charge using the charger installed in your home.
- It takes approximately 3-4 hours to charge the Li-ion battery from empty to full with a 6.6 kW (if so equipped) charger.
- To charge your vehicle:
  - Place the power switch in the OFF position.
  - Pull the charge port lid opener handle located below the instrument panel to the left of the steering wheel.
  - Press the charge port tab and open the cap.
  - Connect the charge connector 01 to the charge port 02. When connected correctly, a beep will sound once.
- To stop charging:
  - Press the button 03 on the charge connector to release the lock and remove the charge connector from the charge port.
  - Close the charge port cap and the charge port lid.

TRICKLE CHARGE

- Perform a trickle charge by connecting the Electric Vehicle Supply Equipment (EVSE) (if so equipped) to a dedicated 110-120 volt, 15A power outlet.
- It takes approximately 21 hours to charge the Li-ion battery from empty to full.
- To charge your vehicle:
  - Place the power switch in the OFF position.
  - Pull the charge port lid opener handle located below the instrument panel to the left of the steering wheel.
  - Press the charge port tab and open the cap.
  - Connect the EVSE plug 04 to a dedicated 110-120 volt, 15A power outlet. The EVSE control box’s green indicator light 05 will illuminate.
  - Remove the safety cap from the charge connector.
  - Connect the charge connector 06 to the charge port 02. A beep will sound once.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
If plugging in the EV SE connector to a power outlet, attach a string to the control box [07] and hang on a hook near the outlet, or set on a suitable surface off the ground.

To stop charging:
- Press the button [08] on the charge connector to release the lock and remove the charge connector from the charge port.
- Close the charge port cap and the charge port lid.
- Remove the EVSE plug from the power outlet, attach the safety cap to the charge connector and store in the case.

QUICK CHARGE (if so equipped)
- Perform a quick charge by connecting the charge connector of a quick charger at a charge station to the vehicle.
- It takes approximately 30 minutes to charge the Li-ion battery to 80% when the low battery charge warning light turns on.

To charge your vehicle:
- Place the power switch in the OFF position.
- Open the charge port lid and the charge port cap [09].
- Align the groove of the charge connector with the groove of the charge port, then insert the charge connector.
- Grasp the lock lever and then lock the charge connector.
- Follow the instructions on the quick charge equipment to start charging. When the equipment is properly installed and ready to charge a beep sounds twice and the charging status indicator light will change.

To stop charging:
- Follow the instructions on the quick charge equipment.
- Unlock the charge connector and remove it from the vehicle.
- After closing the charge port cap, close the charge port lid.

For more information, refer to the “EV Overview (section EV)” and the “Charging (section CH)” of your Owner’s Manual.
TRIP COMPUTER

- The Trip Computer 01 is located in the dot matrix liquid crystal display.

- With the power switch in the ON position, trip computer modes can be selected by pressing the button 02 on the left side of the instrument panel.

- The following modes can be selected in the display:
  - **To 100% Charge** – Displays the estimated time to a full Li-ion charge by using either 120 volt or 240 volt.
  - **Energy Economy** – Displays the average and instant energy economy.
  - **Average Speed** – Displays the average vehicle speed since the last reset.
  - **Driving Distance and Elapsed Time** – Displays the total distance the vehicle has been driven and the time since the last reset.
  - **SOC%** – Displays the vehicle’s current state of charge.
  - **Settings** – Allows you to adjust the system settings for features such as the clock, reminders or preferences for alerts, maintenance intervals and language displays.
    - Press the button 03 to cycle through the various setting modes.
    - Press the button 02 to choose the selected mode.
  - **Warning** – If there are any.

- To reset Driving Distance and Elapsed Time, go to that mode on the trip computer and hold the button 03 for longer than 1 second.

For more information, refer to the “Instruments and controls (section 2)” of your Owner’s Manual.
BLUETOOTH® HANDS-FREE PHONE SYSTEM

- A cellular telephone should not be used while driving so full attention may be given to vehicle operation.*

SYSTEM OPERATING TIPS

- The “Help” command can be used to hear a list of available commands at any time.
- Reduce background noise as much as possible by closing windows and pointing HVAC vents away from the ceiling.
- Say commands after the tone, or press the button to say a command at any time.
- Speak naturally without long pauses and without raising your voice.
- When speaking Phonebook names, please be aware some phones require the last name to be spoken before the first name. For example, “Michael Smith” may be spoken as “Smith Michael”.
- To cancel a voice recognition session, simply wait 5 seconds, say “Cancel” or “Quit,” or press and hold the button for 5 seconds.
- To increase or decrease the volume of the voice prompts, push the volume control switches + or - on the steering wheel or turn the control dial on the audio system while the audio system is responding.
- If the Voice Recognition system does not recognize your voice commands, train the system using the Voice Adaptation Mode. See your Owner’s Manual for detailed information.
- For more detailed information and instructions, see your cellular phone Owner’s Manual and visit www.nissanusa.com/bluetooth.

*Some jurisdictions prohibit the use of cellular telephones while driving.

BLUETOOTH® SYSTEM WITHOUT NAVIGATION (if so equipped)

CONNECTING PROCEDURE

- The vehicle must be stationary when connecting the phone.
  1. Press the button on the steering wheel. The system announces the available commands.
  2. Say: “Connect phone”. The system acknowledges the command and announces the next set of available commands.
  3. Say: “Add phone”. The system acknowledges the command and asks you to initiate connecting from the phone handset.
4. Initiate connecting from the phone:
   - The connecting procedure varies according to each cellular phone model. For detailed connecting instructions and compatible phones, please visit www.nissanusa.com/bluetooth.
   - When prompted for a PIN code, enter “1234” from the handset. (The PIN code is assigned by NISSAN and cannot be changed.)

5. Say a name for the phone when the system asks you to provide one. You can give the phone a name of your choice.

PHONEBOOK SETUP

- The phonebook stores up to 1,000 names for each phone paired with the system.
- Depending on your cell phone, the system may automatically download your cell phone’s entire phonebook to the vehicle’s Bluetooth® system.
- If the phonebook does not download automatically, entries can be individually downloaded.
- To manually download entries:
  1. Push the button on the steering wheel.
  2. After the tone, say “Phonebook”.
  3. After the next tone, say “Transfer Entry”. The system acknowledges the command and asks you to initiate the transfer from the phone handset. The new contact phone number will be transferred from the cellular phone to the vehicle.
     - The transfer procedure varies according to each cellular phone. See your cellular phone’s owner’s manual for details. You can also visit www.nissanusa.com/bluetooth for instructions on transferring phone numbers from NISSAN recommended cellular phones.
  4. The system repeats the number and prompts you for the next command. When you have finished entering numbers or transferring an entry, choose “Store.”
  5. The system confirms the name, location and number.

MAKING A CALL FROM THE PHONEBOOK

- In some cases, names stored using all UPPERCASE letters may not be recognized by the voice recognition system.
  1. Press the button.
  2. After waiting for the tone, say “Call”.
  3. After the next tone, speak a name of a phonebook entry. For example “Michael Smith”.
  4. Once you have confirmed the name and location the system begins the call.

MAKING A CALL BY PHONE NUMBER

1. Press the button. A tone will sound.
2. Say: “Call”. The system acknowledges the command and announces the next set of available commands.
3. Say: “Phone Number”. The system acknowledges the command and announces the next set of available commands.
4. Say the number you wish to call starting with the area code in single digit format.
5. When you have finished speaking the phone number, the system repeats it back and announces the available commands.
6. Say: “Dial”. The system acknowledges the command and makes the call.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
RECEIVING/ENDING A CALL

- When you receive a phone call, a ring tone sounds through the audio system.
- To accept the call, press the \( \text{button} \).
- To reject the call, press the \( \text{button} \).
- To hang up the phone at the end of a call or to disconnect during call placement, press the \( \text{button} \).

For more information, refer to the “Heater, air conditioner, audio and phone systems (section 4)” of your Owner’s Manual or please visit www.nissanusa.com/bluetooth.
BLUETOOTH® SYSTEM WITH NAVIGATION (if so equipped)

- Bluetooth® Streaming Audio allows you to use a compatible Bluetooth® phone to play audio files on your device. Your compatible cellular phone can be connected to the vehicle’s audio system allowing audio files to play through the vehicle’s speakers.

PAIRING PROCEDURE

- Make sure the vehicle is stationary when pairing the phone.
  1. Press the button 01, and select the “Pair Phone” key.
  2. Initiate pairing from the phone.
     - The pairing procedure varies according to each cellular phone model. For detailed pairing instructions and a list of compatible phones, please visit www.nissanusa.com/bluetooth.
     - When prompted for a PIN code, enter “1234” from the handset. (The PIN code is assigned by NISSAN and cannot be changed.)
  3. When the pairing is complete, the screen will return to the Phone menu display.

MAKING A CALL

To make a call, follow this procedure:

  1. Press the button 01 on the steering wheel. The “PHONE” menu will appear on the control panel display.
  2. Select the “Handset Phonebook”, “Vehicle Phonebook”, “Call History” or “Dial Number” key.
  3. Select the desired entry from the list.
  4. Select “Call” to start dialing the number.

RECEIVING/ENDING A CALL

- To accept the call, press the button on the steering wheel or touch the “Answer” key.
- To reject the call, touch the “Reject Call” key.
- To hang-up, press the button or touch the “Hang-Up” key.

*Some jurisdictions prohibit the use of cellular telephones while driving. For more information, refer to the “Bluetooth Hands-free Phone System (section 7)” of your Navigation System Owner’s Manual or please visit www.nissanusa.com/bluetooth.

To view detailed instructional videos regarding these and other features, please go to www.nissanownersinfo.mobi.
NAVIGATION SYSTEM (if so equipped)

01 MAP/VOICE Button - Will take you to your current location on the map screen. When you press and hold, the system will repeat voice guidance.

02 MENU Button - Will take you to a list of menus.

- Destination - Touch to enter a destination.
- ROUTE - Touch to access guidance control functions such as guidance cancellation, route priority or waypoint setting on the route.
- INFO - Touch to display the vehicle’s energy information, maintenance and charging station information, current location, traffic information, voice recognition command list, GPS position, and navigation version.
- SETTINGS - Touch to customize the system to make it easier for you to use.
- PHONE - Touch to set useful functions for the Bluetooth® Hands-free Phone System.
- CARWINGS - Touch to display information feeds. Settings for CARWINGS™ can also be performed.

For more information, refer to your Navigation System Owner’s Manual.
HOMELINK® UNIVERSAL TRANSCEIVER (if so equipped)

- The HomeLink® system can learn and consolidate the functions of up to three different hand-held transmitters, operating items such as garage doors, property gates, outdoor and indoor lights or alarm systems.

For more information, refer to the “Instruments and controls (section 2)” of your Owner's Manual, the HomeLink® website at www.homelink.com or call 1-800-355-3515.
