Thank you for purchasing a NISSAN vehicle.
This user’s manual is for the navigation system only. This manual contains operating instructions for the NISSAN Navigation System offered in your NISSAN vehicle.
Please read this manual carefully to ensure safe operation of the navigation system.

- Because of possible specification changes and optional equipment, sections of this manual may not apply to your vehicle.
- All information, specifications and illustrations in this manual are those in effect at the time of printing. NISSAN reserves the right to change specifications or design at any time without notice.
- Do not remove this manual from the vehicle when selling this vehicle. The next user of this navigation system may need the manual.

1 Introduction

How to use this manual .......................................................... 1-2
For safe operation ............................................................... 1-2
Reference symbols ............................................................. 1-2

Safety information ............................................................... 1-2
Laser product ................................................................................. 1-3
This manual uses special words, symbols and icons that are organized by function. Please refer to the following items to understand how to use this manual properly.

FOR SAFE OPERATION

WARNING
Indicates the presence of a hazard that could cause death or serious personal injury. To avoid or reduce the risk, the procedures must be followed precisely.

CAUTION
Indicates the presence of a hazard that could cause minor or moderate personal injury or damage to your vehicle. To avoid or reduce the risk, the procedures must be followed carefully.

NOTE:
Indicates items that help you understand and maximize the performance of your vehicle. If ignored, they may lead to a malfunction or poor performance.

REFERENCE SYMBOLS

INFO:
Indicates information that is necessary for efficient use of your vehicle or accessories.

Reference page:
Indicates the title and page that you should refer to.

< >:
Indicates a button on the control panel.

[ ]:
Indicates a key/item displayed on the screen.

Voice Command:
Indicates an operation by voice command.

Variable commands, such as numbers, are indicated in *italics* in parentheses < >.

This system is primarily designed to help you reach your destination, and it also performs other functions as outlined in this manual. However, you, the driver, must use the system safely and properly. Information concerning road conditions, traffic signs and the availability of services may not always be up to date. The system is not a substitute for safe, proper and legal driving.

Before using the navigation system, please read the following safety information. Always use the system as outlined in this manual.

WARNING
- To operate the navigation system or use the multi-function controller, first park the vehicle in a safe location and set the parking brake. Operating the system while driving can distract the driver and may result in a serious accident.
- Do not rely on route guidance alone. Always be sure that all driving maneuvers are legal and safe in order to avoid accidents.
Do not disassemble or modify this system. If you do, it may result in accidents, fire or electrical shock.

If you notice any foreign objects in the system hardware, spill liquid on the system or notice smoke or a smell coming from it, stop using the system immediately. It is recommended you visit a NISSAN dealer for servicing. Ignoring such conditions may lead to accidents, fire or electrical shock.

CAUTION

Do not use this system if you notice any malfunctions such as a frozen screen or the lack of sound. Continued use of the system may result in accidents, fire or electrical shock.

Some jurisdictions may have laws limiting the use of video screens while driving. Use this system only where it is legal to do so.

Extreme temperature conditions (below −4°F (−20°C) and above 158°F (70°C)) could affect the performance of the system.

The glass display screen may break if it is hit with a hard or sharp object. If the glass screen breaks, do not touch it. Doing so could result in an injury.

NOTE:
Do not keep the navigation system running with the engine stopped. Doing so may discharge the vehicle battery. When you use the navigation system, always keep the engine running.

WARNING

Do not disassemble or modify this system. There are no user serviceable parts in this navigation system.

If maintenance, adjustments and operations other than those specified in this manual are attempted, injury due to laser radiation and exposure could occur.

Required SiriusXM Satellite Radio and NavTraffic monthly subscriptions are sold separately. NavTraffic are only available in select markets. For more information, see www.siriusxm.com/navtraffic.

LASER PRODUCT

This navigation system is certified as a Class 1 laser product.
The navigation system complies with DHHS Rules 21 CFR Chapter 1, Subchapter J.

INTRODUCTION
Required SiriusXM Satellite Radio and NavWeatherXM monthly subscriptions are sold separately. NavWeatherXM is only available in select markets. For more information, see www.siriusxm.com/navweather.

CONTROL BUTTONS AND FUNCTIONS

CONTROL PANEL

1. **<STATUS>:**
   Push multiple times to display audio information with either the air conditioner status, fuel economy or navigation directions.

2. **<DEST>:**
   Push to enter a destination. Various methods for entering a destination are available.  
   "4. Setting destination"

3. **<ROUTE>:**
   Push to access guidance control functions (guidance cancellation, route priority, waypoint setting on the route, etc.).

4. Multi-function controller:
   Turn to highlight an item on the screen, push to select the highlighted item or scroll the map.

5. **<INFO>:**
   Push to display the vehicle, traffic, weather or voice recognition information.

6. **<DAY/NIGHT OFF>/OFF:**
   Push to switch between the day screen (bright) and the night screen (dark). Push and hold to turn off the display. Push again to turn on the display.

7. **<SETTING>:**
   Push to access the system settings.

8. **<VOICE>:**
   Push to hear the current guidance for a programmed route.

9. **<BACK>:**
   Push to return to the previous screen. In a settings screen, this button can also be used to apply the setting. In a character input screen, this button can also delete the characters that have been entered.

10. **<MAP>:**
    Push to display the map. While following programmed route, push multiple times to change the type of route information.

11. **<ZOOM IN>, <ZOOM OUT>:**
    Push to switch to the zoom mode to change the map scale.

INFO:
- If **<BACK>** needs to be pushed to apply the setting on a settings screen, this manual will explicitly include a step for this procedure. Otherwise, pushing **<BACK>** returns the display to the previous screen.
- The layout of the control panel switches may vary depending on the vehicle model and equipment.
MULTI-FUNCTION CONTROLLER

① <ENTER>:
Push to select the highlighted item on the screen.
If this button is pushed while a map is displayed, the map menu screen is displayed.

② Main directional buttons:
Use to move across the map, highlight an item on the screen or adjust a setting (volume, brightness, etc.).

③ Additional directional buttons:
Use to move across the map or highlight an item on the character input screen.

④ Center dial:
Turn to highlight an item on the screen or adjust a setting.
This dial can also be used to change the map scale.
“Operating with center dial” (page 3-9)

STEERING WHEEL SWITCH

① <ENTER>:
Tilt to highlight an item on the screen or adjust a setting. Push to select the highlighted item.
If this button is pushed while a map is displayed, the map menu screen is displayed.
“Map menu screen” (page 2-13)
Push and hold while a map or status screen is shown to display the Start Menu.
“Start menu” (page 2-8)
If this button is tilted up while the audio function is activated and the map or status screen is displayed, the audio system can be operated.

② < → >:
Push this button during a setting operation to return to the previous screen. In a settings screen, this button can also be used to apply the setting.

③ ← → + -:
Use to adjust the volume. These buttons have the same function as that of the volume control knob. Refer to the vehicle Owner’s Manual.

④ <TALK >:
Push to start the voice recognition mode. If the voice recognition mode is already activated, pushing this button cancels the voice guidance and you can speak a voice command immediately.

⑤ < → >:
Push to display the phone mode screen.
Refer to the vehicle Owner’s Manual.
<SOURCE> Use to switch the audio mode (source).
Refer to the vehicle Owner’s Manual.

NOTE:
Do not keep the navigation system on with the engine stopped. Doing so may discharge the vehicle battery. When you use the navigation system, always keep the engine running.

INFO:
There are different status screens displayed depending on various factors, such as the currently active mode, whether a destination has been set or not, etc.

When a route to the destination is set and the audio system is on, a screen similar to the one above appears.

Turning direction at the next intersection
② Name of the next street
③ Distance to the next intersection
④ Distance remaining to the destination
⑤ Remaining time to the destination

When a route to the destination is not set and the audio system is off, a screen similar to the one above appears.
To ensure safe driving, some functions cannot be operated or have limited operation when the vehicle driving speed is above 5 MPH (8 km/h).

The on-screen text and keys for these restricted functions will be “grayed-out” or muted and cannot be selected while driving. In some cases, a screen message will appear indicating a restricted function.

Restricted functions while driving include:
- Character (letter and number) input screen during destination entry (street address, phone number, freeway entrance/exit, intersection, city center)
- Places search by name and city name
- Scrolling and viewing of certain navigation lists
- Adding/editing address book entries
- Adding/editing home location
- Storing current position, information, destinations

These functions will become available again when the vehicle speed is reduced to 5 MPH (8 km/h).

Destination functions available while driving include:
- Home
- Address Book
- Previous Destinations
- Nearby places
- Address book
- My places
- Map input
MENU SCREENS AND THEIR PURPOSES

Push <DEST>, <ROUTE>, <INFO> or <SETTING> to display the corresponding menu screen.

How to select a menu item

Example: <DEST> screen
1. Highlight the preferred menu item using the multi-function controller.
2. To select the preferred menu item, highlight the item and push <ENTER>. The next screen is displayed.
3. Push <BACK> to return to the previous screen without applying any changes.
   Push <MAP> to return to the current location map screen without applying any changes.

INFO:
An item can also be selected by tilting <ENTER> on the steering wheel up and down.
USING CONTROLS TO ADJUST VALUES, LEVELS, ETC.

There are four main methods to control the navigation system: the center dial, the main directional buttons, the touch panel and the switches on the steering wheel. Use these controls to adjust the volume of the phone and voice guidance, the display brightness, etc.

How to adjust

1. Highlight the preferred setting item and push <ENTER>. The color of the corresponding adjustment item changes.

2. Adjust the value or level of the indicator bar using the multi-function controller.

3. Push <ENTER> or <BACK> to apply the setting.

INFO:

- The volume of phone and voice guidance, the display brightness, etc. can be adjusted by tilting <ENTER> on the steering wheel up and down.

- These same adjustments can also be performed using the touch panel operation.

- “Adjusting volume and others” (page 2-10)

START MENU

The start menu can be displayed using the steering wheel switch.

1. Push and hold <ENTER> on the steering wheel.

2. Highlight the preferred item and push <ENTER>.

INFO:

- <ENTER> on the steering wheel switch can be used to display the start menu only when the map or status screen is displayed.
Available items

- [Destination]:
  Displays the destination screen. It is the same screen that appears when <DEST> is pushed.
  Refer to “4. Setting destination”

- [Route]:
  Displays the route screen. It is the same screen that appears when <ROUTE> is pushed.
  Refer to “5. Route guidance”

- [Info]:
  Displays the information screen. It is the same screen that appears when <INFO> is pushed.
  Refer to “7. Viewing technical information”

- [Settings]:
  Displays the settings screen. It is the same screen that appears when <SETTING> is pushed.
  Refer to “8. Other settings”

LIST SCREEN

After searching for a point of interest, a list screen is displayed. Depending on the list displayed, it can be sorted.

Items displayed in a list

1. Highlight the preferred item from the list and push <ENTER> to select it. If a location or facility name is not completely displayed (due to length), highlight the item to display the hidden part of the name.

2. Distance from the current location

3. Direction to the point of interest

4. If the entire list cannot be displayed on the screen, the system displays the total number of items in the list and the entry number of the selected item. Scroll the list using the multi-function controller.

5. An item that starts with the selected letter will be displayed at the top of the list.

Getting started  2-9
TOUCH PANEL OPERATION

6. Highlight and push <ENTER> to sort the list in the original order.
7. When the list is sorted by the shortest distance, the selected location can be confirmed in the preview on the right side of the screen.
8. Highlight and push <ENTER> to modify search conditions.

With this system, the same operations as those for the multi-function controller are possible using the touch panel operation. This manual describes the operations using the multi-function controller. For the operations that differ from those of the multi-function controller and for useful methods for using the touch panel operation, refer to each section.

EXAMPLE OF TOUCH PANEL OPERATION
Here, the operation examples performed with the touch panel operation are described.

Selecting item

Selecting item when the item is touched, the next screen is displayed.

Adjusting volume and others

Touch [+] or [-] located on the right and left of the bar graph to perform the adjustment.

Scrolling message or list

Touch [ söyled] or [刽] to scroll the message or list. Touch [택] or [ 쌓] to skip to the next page.
HOW TO INPUT LETTERS AND NUMBERS

Inputting letters and numbers

1. Touch the letter or number.
2. To delete a character, touch [Delete]. Push and hold [Delete] to delete all of the characters.

CHARACTER (letters and numbers)

INPUT SCREEN

When setting a destination, searching for a facility or editing the stored locations, etc. alphanumeric characters must be entered into the system.

1. Use the multi-function controller to highlight a character on the displayed keyboard.
2. Push <ENTER>. The highlighted character is entered.
3. Push <BACK>, or highlight [Delete] and push <ENTER> to delete the last character entered. Push and hold <BACK> to delete all the characters entered. Highlight [Space] and push <ENTER> to enter a space.
4. After finishing the entry, highlight [List] and push <ENTER>.
INFO:
- Push <BACK> on the control panel to return to the previous screen, but only after deleting all the characters entered.
- When [BACK] is touched on the screen, the screen returns to the previous screen even when characters have been entered.
- When text has been entered and the number of matching list items has been narrowed down enough so that they fit on the screen, the list screen appears automatically.

INFO:
Symbol keys are displayed by highlighting [Symbols] and pushing <ENTER>. Alphabet keys are displayed by highlighting [A-Z] and pushing <ENTER>.

NUMBER INPUT SCREEN
A phone number or a street number can also be entered as a search method to look for a destination.

INFO:
Only the locations included in the map data database can be searched for by a phone number.

1. Use the multi-function controller to highlight a number on the displayed keyboard.
2. Push <ENTER>. The highlighted number is entered.
3. Push <BACK>, or highlight [Delete] and push <ENTER> to delete the last number entered.
   Push and hold <BACK> to delete all the numbers entered.
4. After finishing the entry, highlight [List] and push <ENTER>.

Symbol input screen
INFO:
- **<BACK>** can be pushed on the control panel to return to the previous screen, but only after deleting all the numbers entered.
- When [BACK] is touched on the screen, the screen returns to the previous screen even when numbers have been entered.

Push **<ENTER>** while the current location map screen or a scrolled map screen is displayed to display the menu corresponding to that screen.
This menu can be used to access helpful functions quickly, such as setting a destination and searching for points of interest nearby.
To select a menu item, use the method described earlier in this manual.

![Menu screen and how to operate](page 2-7)

**INFO:**
With the touch operation, the same screen can be displayed by touching [Map Menu] located on the map screen.

**CURRENT LOCATION MAP SCREEN**

If **<ENTER>** is pushed while the current location map screen is displayed, the following options are available.

- **[Store Location]:** Store the current vehicle location in the Address Book. The stored location can be retrieved as necessary to set it as a destination (waypoint).
  - “Storing location” (page 6-2)
- **[Nearby Places]:** Search for points of interest near the current vehicle location, such as restaurants and gas stations, etc.
  - “Finding nearby place” (page 4-5)
- **[Map View]:** Perform map operations such as the switching of map type and the setting of map orientation and scale.
  - “3. Map settings”
- **[Map Icons]:** Select map icons of certain points of interest (such as restaurants and gas stations, etc.) to be displayed on the map around the current vehicle location.
  - “Displaying map icons” (page 3-17)
- **[Store Tracking]:** Store in the Address Book the route travelled from the starting point to the current location.
  - “Storing tracked route” (page 6-6)
SCROLLED LOCATION MAP SCREEN

If <ENTER> is pushed while a scrolled map screen is displayed, the following options are available.

- **[New Dest.]:**
  Set the destination to the map location where <ENTER> was pushed. If a destination is already set, the location will be set as the new destination. (page 4-19)

- **[Add to Route]:**
  Set the map location where <ENTER> was pushed as a destination or a waypoint.
  This is available only when the suggested route is already set. (page 5-14)

- **[Nearby Places]:**
  Search for points of interest near the map location where <ENTER> was pushed and set them as a destination or waypoint.
  Use the same search method as the one for [Places]. (page 4-5)

- **[Store Location]:**
  Store in the Address Book the map location where <ENTER> was pushed. The stored location can be retrieved to set it as a destination or waypoint. (page 6-2)

- **[Delete]:**
  Delete a stored location. To delete it, place the cross pointer over the corresponding icon.

- **[Incident Detail]:**
  This function can be selected only when the traffic information icon is displayed.
  Display the details of the traffic information icon.
  Place the cross pointer over the icon you want to check.

INFO:
Incident details are a feature of Traffic Information, and that a NavTraffic subscription is required in order to receive Traffic Information.

HOW TO STORE HOME LOCATION

If a home location is already stored in the Address Book, it can be easily retrieved to set the route to the stored home location. The procedure to store the home location is the same as for storing any other location.

1. Push <DEST>.
2. Highlight [Home (Add New)] and push <ENTER>.

STORING HOME LOCATION/ADDRESS

As an example, the procedure for storing the home location by searching for a destination by address is described here.
3. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>.

4. Highlight [Street Address] and push <ENTER>. A character input screen is displayed.

5. Enter the address of the home location, highlight [OK] and push <ENTER>. “Finding address” (page 4-4) The map screen is displayed.

6. Adjust the location of your home using the multi-function controller, if necessary.

7. After adjusting the location, push <ENTER>.

8. A message is displayed and the home location is stored.

9. Highlight [OK] and push <ENTER>.

10. Push <MAP> to return to the current location map screen. The home icon is displayed on the map.

INFO:
The same setting can also be performed by pushing <SETTING> and highlighting [Navigation].

“Storing location by searching” (page 6-2)
SEARCHING FOR DESTINATIONS
As an example, the method for setting a restaurant as the destination using [Places] is described here.

1. Push <DEST>.
2. Highlight [Places] and push <ENTER>.
3. Highlight [Nearby RESTAURANT] and push <ENTER>.
4. Highlight the preferred restaurant from the list and push <ENTER>.
5. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>.

The system sets the destination to the selected location and starts calculating a route.

INFO:
- The position of the selected location is displayed in the preview on the right side of the screen.
- If there is a route already in progress, only places along the current route will be listed. Turn off [Show Along Route] at the top of list to display all nearby places.

INFO:
- The search can also be narrowed down by selecting [All Categories or Name] on this screen. By selecting [All Categories or Name], the area, name of facility, etc. can be specified.

INFO:
- Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc. if necessary.

“Procedures after setting destination” (page 5-2)
STARTING ROUTE GUIDANCE

After setting the destination and performing route calculation, the suggested route is displayed.

1. Highlight [Start] and push <ENTER>.

2. Once route guidance is started, the system navigates through the guide points using visual and voice guidance.

3. When approaching a guide point, the system automatically changes to the split screen and shows an enlarged view of the intersection in the left screen. Push <MAP> to switch to the full map screen.

4. When arriving at the destination, route guidance automatically ends.

CANCELING ROUTE

Delete a route that is already set according to the following procedure.

1. Push <ROUTE>.

2. Highlight [Cancel Route] and push <ENTER>.

3. A confirmation message is displayed. Highlight [Yes] and push <ENTER>.

Getting started  2-17
INFO:

- If a route is canceled, [Cancel Route] changes to [Resume Route]. Highlight [Resume Route] and push <ENTER> to reactivate the canceled route. This is available only until a new route is set or a currently set destination is deleted.

- The above step does not delete the destination that has been set. To delete a destination, push <DEST> and highlight [Delete Destination], then push <ENTER>.

“Delete destination” (page 4-20)

HOW TO VIEW MAP SCREEN
The navigation system displays various information on the map screen.

Screen information

1. Vehicle icon: Indicates the current vehicle location and the direction of travel.
2. Starting point: Displays the vehicle location, with which the route is set, as the starting point.
4. Waypoint: Displays locations between the starting point and the destination. A maximum of 5 waypoints can be set.
Destination: Indicates the destination location of the route guidance. When you reach your destination, the address will be displayed on the map screen.

Suggested route: Appears in bold yellow during route guidance.

Map Menu icon: Touch the icon to display the Map Menu screen. "Map menu screen" (page 2-13)

Direction indicator: Indicates the directional setting of the map. Touch the icon to change the setting.
- North always pointing up.
- Traveling direction always pointing up. "Setting map orientation" (page 3-14)

Scale indicator: Indicates the scale of the map. Touch the icon to display the scale bar. This allows the map scale to be adjusted. "Operating with touch operation" (page 3-10)

Street name: Displays the name of the street that the vehicle is currently driving on.

SETTING VOICE GUIDANCE

TURNING VOICE GUIDANCE ON/OFF
Voice guidance can be activated or deactivated.

1. Push <ROUTE>.
3. Highlight [Guidance Voice] and push <ENTER>. The indicator illuminates if voice guidance is activated.
Other settings
Voice guidance can also be activated or deactivated using the following procedure.

1. Push <SETTING>.
2. Highlight [Volume & Beeps] and push <ENTER>.

ADJUSTING VOICE GUIDANCE VOLUME
The voice guidance volume can be adjusted.

1. Push <ROUTE>.

4. Adjust the volume of voice guidance by using the multi-function controller.

Other settings
Voice guidance volume can also be adjusted using the following procedure.

1. Push <SETTING>.
2. Highlight [Volume & Beeps] and push <ENTER>.
NISSAN VOICE RECOGNITION

4. Adjust the volume of voice guidance by using the multi-function controller.

NISSAN Voice Recognition allows hands-free operation of the navigation system and other systems equipped on this vehicle, such as the phone, vehicle information and audio. NISSAN Voice Recognition can be used in one of two selectable modes, Standard Mode or Alternate Command Mode.

In Standard Mode, the commands that are available are always shown on the display and announced by the system. To perform operations, simply follow the prompts given by the system.

For advanced operation, change to Alternate Command Mode. When this mode is active, an expanded list of commands can be spoken after pushing “<TALK >” on the steering wheel switch and the voice command menu prompts are turned off. Note that in this mode the recognition success rate may be affected because the number of available commands and ways of speaking each command are increased. Otherwise, it is recommended that Alternate Command Mode be turned to OFF and Standard Mode be used for the best recognition performance.

For U.S. customers, Standard Mode is selected by default. For Canadian customers, Alternate Command Mode is the default mode.

Otherwise, it is recommended that Alternate Command Mode be turned to OFF and Standard Mode be used for the best recognition performance.

INFO:

- For voice recognition system operation related to the phone, audio or vehicle information systems, refer to the Owner’s Manual of your vehicle.
- When the system language is set to “Français” (French) or “Español” (Spanish), the available commands and functions may differ from those that are available when using the system in English.

USING THE SYSTEM

Initialization

When the ignition switch is pushed to the ON position, NISSAN Voice Recognition is initialized, which may take up to one minute. When completed, the system is ready to accept voice commands. If “<TALK >” is pushed before the initialization completes, the display will show the message: “System not ready.”
BEFORE STARTING
To get the best recognition performance from NISSAN Voice Recognition, observe the following points:

- The interior of the vehicle should be as quiet as possible. Close the windows to eliminate the surrounding noises (traffic noise and vibration sounds, etc.), which may prevent the system from correctly recognizing the voice commands.

- The voice recognition system cannot be operated when the soft top is not closed (for Roadster models).

- Wait until the tone sounds before speaking a command.

- Speak in a natural conversational voice without pausing between words.

- If the air conditioner is set to “Auto”, the fan speed is automatically lowered so that voice commands can be recognized more easily.

GIVING VOICE COMMANDS
The method of giving a voice command in Standard Mode is described in this section.

1. Push <TALK > located on the steering wheel switch.
2. A list of commands appears on the screen, and the system provides the voice menu prompt.
3. After the tone sounds and the icon on the screen changes from [ ] to [ ], speak a command.
4. Continue to follow the voice menu prompts and speak after the tone sounds until operation is completed.

Operating tips
- Say a command after the tone.
- Commands that are available are always shown on the display and spoken through voice menu prompts. Commands other than those that are displayed are not accepted. Please follow the prompts given by the system.
- If the command is not recognized, the system announces, “Please say again”. Repeat the command in a clear voice.
- Push <BACK> once to return to the previous screen.
- To cancel the command, push and hold <TALK >. The message, “Voice recognition is canceled” will be announced.

Voice Prompt Interrupt:
In most cases you can interrupt the voice feedback to speak the next command by pushing <TALK > on the steering wheel. After interrupting the system, wait for a beep before speaking your command.
## COMMAND LIST

</tr>
</tbody>
</table>
INFO:
Refer to the vehicle Owner’s Manual for the operations related to phone, information and audio.

Voice command examples
To use the voice recognition function, speaking one command is sometimes sufficient, but at other times it is necessary to speak two or more commands. As examples, some additional basic operations that are performed by voice commands are described here.

Example 1: Placing a call to the phone number 800-662-6200:
1. Push `<TALK>` located on the steering wheel. You will hear a prompt.
2. Speak “Phone”.
3. Speak “Dial Number”.
4. Speak “800”.
5. The system announces, “Please say next three digits or dial, or say change number”. Speak “662”.
6. The system announces, “Please say last four digits or say change number”. Speak “6200”.
7. The system announces, “Dial or Change Number ?”. Speak “Dial”.
8. The system makes a call to 800-662-6200.

INFO:
- Speaking “800-662-6200” (10 continuous digits) or “662-6200” (7 continuous digits) is acceptable, if the area code is not necessary. However the 3-
3-4 digit grouping is recommended for improved recognition.

“How to speak numbers” (page 9-20)

- The NISSAN voice recognition system is not limited to recognizing phone numbers of only 7 or 10 digits. To dial a number in a format other than the 3-3-4 digit grouping, use the “International Call” command.
- If “Change Number” is spoken during phone number entry, the system will automatically request that the number be repeated using the 3-3-4 format. In this case please say the area code first and then follow the prompts.
- Do not add a “1” in front of the area code when speaking phone numbers.
- If the system does not recognize a voice command, please try repeating the command using a natural voice. Speaking too slowly or too loudly may further decrease recognition performance.

Example 2: Placing an international call to the phone number 011-81-111-222-3333:

1. Push <TALK > located on the steering wheel. You will hear a prompt.
2. Speak “Phone”.
3. Speak “International Call”.
4. Speak “01181111222333”.
5. Speak “Dial”.
6. The system makes a call to 011-81-111-222-3333.

INFO:
Any digit input format is available in the International Number input process.
Example 3: Setting a destination by a street address:

1. Push <TALK ø> located on the steering wheel. You will hear a prompt.
2. Speak “Navigation”.
3. Speak “Address”.
4. Speak the name of the state, “California”.

5. Speak the name of the city, “Gardena”.
6. Voice feedback will be provided when the command is accepted, and the list of city names is displayed.
7. After the tone sounds and the icon on the screen changes again, speak “One”.
8. Speak the name of the street, “South Figueroa street”.

INFO:

Only the official street names stored in the map database can be recognized by the system. To improve accuracy, speak the street name precisely and include Boulevard, Way, North, South, etc., if known. If unsure of the full name, speaking only part of the street name such as “Figueroa” is acceptable, but recognition accuracy may be reduced.
9. Voice feedback will be provided when the command is accepted, and the list of street names appears.

10. After the tone sounds and the icon on the screen changes again, speak “One”.

11. Speak the house number. (See “How to speak numbers” (page 9-5))

INFO:

If the house number is unknown, speak “No house number”.

12. To confirm the destination location on the map, speak “Show map”. To calculate a route, speak “Calculate route”.

Two types of map views are available: 2D and Birdview™ (3D) map.

2D MAP
2D map displays the map in a 2-dimensional environment similar to a road map.

Screen information

1. Vehicle icon: Indicates the current vehicle location and the direction of travel.
3. Remaining time and distance to the destination: Indicates the approximate remaining time and distance to the destination or waypoint. This indicator will appear when the destination or waypoint is set and route guidance is started.
5. Direction indicator: Indicates the directional setting of the map. Touch the icon to change the setting.
   - North always pointing up.
   - Traveling direction always pointing up.
6. Scale indicator: Indicates the scale of the map. Touch the icon to display the scale bar. This allows the map scale to be adjusted.

When the vehicle is not driven on the suggested route, the screen displays the direction to the destination and the distance to the destination from the current vehicle position.

"Switching estimated arrival time display" (page 5-28)

"Setting map orientation" (page 3-14)

"Operating with touch operation" (page 3-10)
Arrow:
Indicates the distance to the next guide point and the turning direction at that guide point.

Stored location (orange):
Displays the locations that are stored in the Address Book. Icons can be changed according to personal preferences.
“Storing location” (page 6-2)

Avoid Area (green or blue):
Displays the areas to avoid that are stored in the Address Book with green or blue icons. During the route search, the route guidance is performed by searching for a route that avoids those areas.
“Storing avoid area” (page 6-7)

Street name:
Displays the name of the street the vehicle is currently driving on.

Traffic indicator:
Displays the reception condition of traffic information transmitted from the provider.
Green: Reception condition is good.
Gray: Reception condition is not good.
No mark: Subscription to NavTraffic service is not detected.

Birdview™ (3D) MAP
Birdview™ displays the map from an elevated perspective. In Birdview™, it is easy to recognize an image of the route because it provides a panoramic view over a long distance.

INFO:
About the Birdview™ display
- “Birdview™” is a registered trademark of Clarion Co., Ltd.
- The map in Birdview™ always appears with the current forward direction facing up.

BUILDING GRAPHICS
In the area where the building graphics are stored in the map data, the building graphics are displayed when the map is zoomed in. On the 2D map display, these are called “Building footprint graphics”, and on the Birdview™ display, these are called “3D building graphics”.

The method to look at the map is the same for the 2D and Birdview™ maps.
DISPLAYING THE CURRENT VEHICLE LOCATION

OPERATING WITH CONTROL PANEL

The basic map screen displays the current location (the position where the vehicle mark is located). Push <MAP> to display the current location on the map while on any screen.

OPERATING WITH TOUCH OPERATION

After moving the map, touch [BACK] on the map screen to display the current location map screen.

3-4 Map settings
The operations for moving across the map are different between the 2D and Birdview™ maps.

2D MAP

Operating with the multi-function controller
Push one of the directional buttons. Push and hold a directional button to move continuously across the map in a direction.

While moving across the map, the cross pointer appears.
If the map scale is set to 1/8 mile (200 m) or less, the cross pointer will blink in pink when positioned on a street, and the street name will be displayed.

Screen information:
1. Cross pointer
2. Distance from the current location to the cross pointer
3. Street name

Operating with touch operation

1. Touch the screen.
Displays the cross pointer, and the touched position is set as the center of the screen.

2. Touch the direction to move to. The map continues to scroll while the screen is touched.

Map settings  3-5
INFO:
While driving, one touch continuous scrolling is disabled. Touch the screen again to scroll further.
If the map screen is set to the building footprint graphics, the map cannot be scrolled while driving.

Fine-adjusting the cursor position:

1. Touch [Slow].
   Displays the 8-directional key.

2. Touch the 8-directional key to adjust the cross pointer position. Touch [BACK] to end the adjustment.

INFO:
Fine-adjusting the cursor position is not possible while driving.
Birdview™ (3D) MAP

Operating with multi-function controller

Use the multi-functional controller to move across the map. While moving on the map, the cross pointer appears.

- Rotates the map clockwise.
- Rotates the map counterclockwise.
- The cross pointer moves in the direction of the arrow.

Once moving on the map, the cross pointer appears.

Screen information:
- Cross pointer
- Distance from the vehicle position to the cross pointer
- Street name

Operating with touch panel

1. Touch the screen. Displays the cross pointer and 8-directional key.

2. Touch the direction to move to. The map continues to scroll while the screen is touched.
3. Touch \( [ ] \) or \( [ ] \) to change the direction of the map.

Rotates the map clockwise.
Rotates the map counterclockwise.

 INFO: 
While driving, scrolling on the map is limited to a specified distance.
Push <ZOOM IN> or <ZOOM OUT>. A scale appears on the right side of the screen. To view the map in detail, push <ZOOM IN>. To view a wider area, push <ZOOM OUT>. The scale will automatically disappear when neither <ZOOM IN> nor <ZOOM OUT> has been pushed for several seconds.

If the scaling operation is not performed for a specified period of time, the scale display disappears.

**INFO:**
Free zoom:
The scale can be changed in smaller steps when <ZOOM IN> or <ZOOM OUT> is pushed and held than when the button is pushed briefly. When the button is pushed briefly, the scale can be changed in large steps.

“Other navigation settings” (page 8-6)

**OPERATING WITH CENTER DIAL**

1. Turn the center dial when the map screen is displayed. The map scale is displayed on the right side of the screen.
2. Use the center dial to adjust the map scale.
   ① Clockwise: Zoom in
   ② Counterclockwise: Zoom out

**INFO:**
Free zoom:
Depending on the setting, using the center dial to change the map scale may adjust the scale normally, or it may engage the free zoom (finer scale adjustment in smaller steps).

“Other navigation settings” (page 8-6)
OPERATING WITH TOUCH OPERATION

1. Touch [TOUCH].
   Displays the scale.

2. Touch [ZOOM IN] or [ZOOM OUT] to change the scale.

INFO:
Free zoom:
Once the [Small Step Zoom by Dial] is set to ON in the setting screen, the scale can be changed in smaller steps, when [ZOOM IN] or [ZOOM OUT] is pushed and held, than when either button is briefly pushed. If briefly pushed, operation returns to normal.

VOICE COMMAND

1. Push <TALK > located on the steering wheel switch.
2. After the tone sounds, speak a command.

To change the map scale:
“Zoom In <1 to 13>” (Alternate command mode)
“Zoom Out <1 to 13>” (Alternate command mode)

MAP SCALE
Any required map scale (map coverage) between 320 miles (640 km) and 1/64 of a mile (25 m) can be selected.
The map view can be changed between the 2D and Birdview™ maps. The map can also be displayed in the split screen mode.

1. Push <ENTER> while the current location map screen is displayed.

2. Highlight [Map View] and push <ENTER>.

INFO:
The traffic information icons are not displayed on the map screen when the map scale is set to 32 miles (64 km) or higher.

“Traffic information display and scale levels” (page 7-7)
3. Highlight [Change View] and push the right button of the directional buttons.
4. Highlight the preferred map view and push <ENTER>. The indicator of the selected map view illuminates.
5. The display automatically returns to the map screen.

AVAILABLE VIEWS
- [2D Map]: Switches to the 2D map.
- [Birdview (3D)]: Switches to the Birdview™ map.
- [Split: 2D Map]: Changes to the split screen mode and both halves display maps in 2D.
- [Split: Birdview Map]: Changes to the split screen mode and the left half displays the map in 2D and the right half displays the map in Birdview™.

INFO:
- When the split screen mode is selected, the map settings for the left screen can be changed independently.
  - “Setting left screen display” (page 3-17)
- If the split screen mode is selected, the normal map scrolling and scale adjustment are set in the right screen. However, if an icon is touched before adjusting the map direction or scale, then each screen can be adjusted independently.

OTHER SETTINGS
The map view can also be set using the following procedure.

1. Push <SETTING>.
3. Highlight [Map View] and push <ENTER>.
4. Highlight [Change View] and push <ENTER>.
5. Highlight the preferred item and push <ENTER>.

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.
   - To display the 2D map: “Plan View map” (Alternate command mode)
   - To display the Birdview™ map: “Birdview map” (Alternate command mode)

SETTING THE MAP VIEW

Other settings are also available for the map screen, such as changing the map direction, map color, Birdview™ angle, etc.

BASIC OPERATION

1. Push <ENTER> while the current location map screen is displayed.

2. Highlight [Map View] and push <ENTER>.

Available setting items
- [Map Orientation]: Set the map direction to North up or Heading Up.
  "Setting map orientation" (page 3-14)
- [Long Range]: Set the long range map view display
ON/OFF.
“Settings long range map view” (page 3-15)

- [Map Color]:
  Change the map color.
  “Setting map color” (page 3-15)

- [Birdview Angle]:
  Change the Birdview™ angle.
  “Changing Birdview™ angle” (page 3-16)

- [Left Split Map Settings]:
  Set the map settings for the left screen of the split map.
  “Setting left screen display” (page 3-17)

- [Show all Freeway Exits on Route]/ [Auto. Show Turn List on Freeway]:
  Set the display of the freeway exit information ON/OFF.
  “Show exit information on freeways” (page 5-10)

Other settings
The orientation of the map can also be set using the following procedure.

1. Push <SETTING>.
3. Highlight [Map View] and push <ENTER>.

SETTING MAP ORIENTATION
The map direction (orientation) can also be changed in the 2D map. These settings are available only in the 2D map or 2D/2D split map.

1. Highlight [Map Orientation] and push <ENTER>.
2. Highlight the preferred map orientation and push <ENTER>. The indicator of the selected map orientation illuminates.
3. Push <MAP> to return to the current location map screen.

Available map orientations
- [North Up]:
  North is set at the top of the map.
- [Heading Up]:
  The traveling direction is set at the top of the map.

INFO:
If the map orientation is switched, the icon displayed in the lower left corner is also switched.

: North Up
: Heading Up
INFO:
Touching the icon on the map screen can also change the direction of the map.

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.
   To change the map direction:
   "North Up" (Alternate command mode)
   "Heading Up" (Alternate command mode)

SETTINGS LONG RANGE MAP VIEW
The position of the vehicle icon can be changed to view a wider area in the traveling direction. If this function is activated, the vehicle icon is located slightly lower than the center of the screen.

INFO:
[Long Range] is displayed only when [Heading Up] is selected.

SETTING MAP COLOR
The map color can be changed to a warm or cool color, or a light color to emphasize the traffic information.

1. Highlight [Map Color] and push <ENTER>. The indicator illuminates.
2. Push <MAP> to return to the current location map screen.

Changes to the color emphasis to help traffic or read colors.
2. Highlight the preferred map color and push <ENTER>. The indicator light of the selected color illuminates.

Available map colors
- [Warm]:
  Set warm colors for the map coloring.
- [Cool]:
  Set cool colors for the map coloring.
- [Traffic Emphasis]:
  Set light colors for the map coloring to emphasize the traffic information.

**INFO:**
The effect of setting changes can be confirmed on the preview displayed on the right side of the screen.

### CHANGING Birdview™ ANGLE
The Birdview™ angle can be changed. This setting is available only in the Birdview™ map or 2D/Birdview™ split map.

1. Highlight [Birdview Angle] and push <ENTER>.

2. Adjust the Birdview™ angle using the multi-function controller.

3. Push <MAP> to return to the current location map screen.
SETTING LEFT SCREEN DISPLAY
When the split screen is displayed, the map settings of the left screen can be changed.

1. Highlight [Left Split Map Settings] and push <ENTER>.
2. Highlight the preferred map view and push <ENTER>.
3. Push <MAP> to return to the current location map screen.

Available setting items
- [Map Orientation]:
  The map direction can be selected as follows.
  - [North Up]:
    North is set at the top of the map.
  - [Heading Up]:
    The traveling direction is set at the top of the map.
- [Long Range]:
  The vehicle icon is located slightly lower than the center of the screen. This offers a wider view in the traveling direction.
- [Map Scale]:
  A scale appears on the left side of the screen. This changes the scale of a map.

INFO:
- The settings of the right screen are the same as the settings of the full screen map.
- Touching the icon on the map can also change the direction and scale of the map.

DISPLAYING MAP ICONS
Map icons can be displayed or hidden by type.

1. Push <ENTER> while the current location map screen is displayed.
2. Highlight [Map Icons] and push <ENTER>.
3. Highlight the preferred icon and push <ENTER>. The icon display setting toggles between on and off each time <ENTER> is pushed. The indicator of the selected icon illuminates.

4. Push <MAP> to return to the current location map screen. The activated icons are displayed on the map.

INFO:
If registered in the map data, the brand icons will be displayed on the map instead of the general map icons listed below.

Map icons that can be displayed
- Restaurant
- Gas Station
- Hotel
- ATM
- Rest Area

Other settings
Landmark icons can also be set using the following procedure.

INFO:
The map icons are not displayed on the map screen when the map scale is set to 1/4 mile (500 m) or higher in the 2D map, or to 1 mile (2 km) or higher in Birdview™ map.

MAP SCROLLING INFORMATION
Information about the location, on which the center of the cross pointer is placed by scrolling on the map, can be set to be displayed.

1. Push <SETTING>.

3. Highlight [Map Icons] and push <ENTER>.
3. Highlight [Others] and push <ENTER>.

4. Highlight [Map Scrolling Information] and push <ENTER>.

5. Highlight the preferred information item and push <ENTER>. The indicator of the selected information item illuminates.

   Available information items:
   - [Address Book Icons]
   - [Destination/Waypoint Icons]
   - [Latitude/Longitude Info]

6. Push <MAP> to return to the current location map screen. Move the cross pointer to the set location to display the information.
MAP SYMBOLS

This navigation system uses symbols to display facilities.

2D map (Plan View)

- Airport
- Golf Course
- Museum
- Shopping Center
- Amusement Park
- Gas Station
- Open Parking Area
- Sports Complex
- Bank
- Historical Monument
- Park & Ride
- Station
- City Hall
- Hotel or Motel
- Parking Garage
- Super Market
- Commuter Rail Station
- Library
- Police Station
- Tourist Office
- Courthouse
- Marina
- Rest Area
- University or College
- Ferry Terminal
- Military Base
- Restaurant
ROAD COLOR
The road types are differentiated by colors.
Freeway: Red or Light Red (zoomed in)
Main road: Brown or Dark Yellow
Narrow street: Gray
Road with incomplete map data: Dark green

TRAFFIC INFORMATION ON MAP
With a subscription to NavTraffic service, traffic information is displayed.
“Viewing available traffic information” (page 7-3)
Free Flow: Green arrow
Moderate traffic: Yellow arrow
Heavy traffic: Red arrow
Section affected by serious traffic event: Purple dashed arrow
Traffic information icons:
- Accident
- Closed road
- Information
- Road work
- Slippery road
- Weather
- Incident
4 Setting destination

- Destination screen .......................................................... 4-2
- Basic operation ............................................................... 4-2
- Changing region ............................................................. 4-2
- Finding address ............................................................... 4-4
- Finding place ................................................................. 4-5
- Setting home as destination ........................................ 4-9
- Searching from address book ....................................... 4-10
- Setting previous destination ......................................... 4-11
- Setting previous start point ......................................... 4-12
- Setting from stored routes ......................................... 4-13
- Setting by phone number ............................................ 4-13
- Setting freeway entrance/exit ...................................... 4-14
- Setting intersection ..................................................... 4-16
- Setting city center ....................................................... 4-17
- Setting point on map ................................................... 4-19
- Delete destination ......................................................... 4-20
There are several methods available to set a destination. Understand the advantages of each method and select the best method for finding and setting a preferred destination.

**BASIC OPERATION**

1. Push <DEST>.
2. Highlight the preferred destination setting method and push <ENTER>.

Available setting items
- [Street Address]: Searches for a destination by address.
- [Places]: Searches for a destination from various categories of businesses or locations.
- [Home]: Searches for a route from the current location to the previously stored home destination.
- [Address Book]: Searches for a destination from the list of the stored locations.
- [Previous Destinations]: Searches for a destination from the previous destinations.
- [Delete Destination]: Deletes the currently set destination.

Available setting items (next page screen)
- [Previous Start Point]: Sets the previous starting point as the destination.
- [Stored Routes]: Selects a stored route.
- [Phone Number]: Searches for a point of interest by a telephone number.

INFO:
The system cannot be used to search for residential phone numbers.
- [Freeway Entrance/Exit]: Searches for a destination from a freeway entrance/exit.
- [Intersection]: Searches for a destination from intersections.
- [City Center]: Sets the center of a city as the destination.

**CHANGING REGION**

When setting a destination, the location can be narrowed down by specifying the region or city.

Specifying the region

1. Push <DEST>.
2. Highlight [Change Region] and push <ENTER>.
3. Highlight the preferred region and push <ENTER>.

Available setting items:
- US1: CA, NV
- US2: AZ, CO, ID, MT, NM, OR, UT, WA, WY
- US3: IA, KS, MN, MO, ND, NE, SD
- US4: AR, LA, MS, OK, TX
- US5: IL, IN, MI, WI
- US6: DC, DE, KY, MD, OH, PA, VA, WV
- US7: CT, MA, ME, NH, NJ, NY, RI, VT
- US8: AL, FL, GA, NC, SC, TN
- US9: AK
- US10: HI
- Canada
- Puerto Rico

- Virgin Islands

INFO:
- It is also possible to select a region by touching the map on the right side of the screen.
- It is not possible to search for a route from the continental United States to Hawaii, Puerto Rico and Virgin Islands.

Specifying city
When searching for a destination with “Street Address”, “Places”, “Intersection”, “City Center”, etc., the search can be narrowed down by specifying the city.

1. Highlight [Select a City] and push <ENTER>.

2. Enter the name of the city, highlight [List] and push <ENTER>. A list screen is displayed.

INFO:
- The same screen will be displayed when a location is searched from a street address or an intersection, and when [City] is highlighted and <ENTER> is pushed.
- “Finding address” (page 4-4)
- “Setting intersection” (page 4-16)
- Highlight [Last 5 Cities] and push <ENTER> to display 5 cities recently set as destinations.
3. Highlight the city of the destination from the list and push <ENTER>.

INFO:
In some cases, when a city name has been entered, the number of matching destinations in the “Matches” column may be different from the number displayed on the list screen. If this occurs, enter more characters to further reduce the number of matches.

FINDING ADDRESS
When the address of the destination is available, use this method to enter the address and then have the system calculate a route. A location near the preferred destination can also be searched for by entering the house number if the map data contains the relevant data.

1. Push <DEST>, highlight [Street Address] and push <ENTER>. A character input screen is displayed.

2. Enter the house number, highlight [OK] and push <ENTER>. If the house number is not available, highlight [No House #] and push <ENTER>. A street name input screen is displayed.

INFO:
When [City] is highlighted and <ENTER> pushed, a city can be specified by typing the city name. “Specifying city” (page 4-3)

3. Enter the name of the street. After finishing the entry, highlight [List] and push <ENTER>. A list of streets is displayed.

4. Highlight the correct street of the destination from the list and push <ENTER>.
INFO:
In some cases, when a street name has been entered, the number of matching destinations in the “Matches” column may be different from the number displayed on the list screen. If this occurs, enter more characters to further reduce the number of matches.

5. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc. “Procedures after setting destination” (page 5-2)

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.
To set the destination from a street address:
“Navigation” “Address” (Standard mode)
“Address” (Alternate command mode)

INFO:
When using a voice command to set a street name, the complete street name is recommended to be stated.
Examples:

<table>
<thead>
<tr>
<th>Correct input</th>
<th>Incorrect input</th>
</tr>
</thead>
<tbody>
<tr>
<td>North Elm Street</td>
<td>Elm Street</td>
</tr>
<tr>
<td>East Jefferson Boulevard</td>
<td>East Jefferson</td>
</tr>
</tbody>
</table>

FINDING PLACE
There are several methods for setting a place of interest as the destination. These include typing a name or choosing a category. To help improve searching, different start points can be chosen to search from such as Near Current Location, Near the Destination, or a City Center.

INFO:
Highlight [Customize Nearby Places] to customize the nearby places list to show categories that are frequently used.

Finding nearby place

1. Push <DEST>.
2. Highlight [Places] and push <ENTER>.
3. Highlight the preferred nearby category from the list and push <ENTER>. A list screen is displayed.

INFO:
Highlight [Customize Nearby Places] to customize the nearby places list to show categories that are frequently used.
4. Highlight the preferred destination from the list, and push <ENTER>. The position of the selected location is displayed in the preview on the right side of the screen.

INFO:
- A maximum of 100 facilities can be displayed on the list screen.
- To search for facilities along your route, select [Show Along Route].

5. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
If there is a route already set, the newly selected location can substitute a previously set destination or be added to a route already set.

Other settings:
The destination can also be set by pushing <ENTER> in the current or scrolled location map screen and selecting [Nearby Places].

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.

To display the nearby category list and select the destination from it:
“Navigation” “Places” (Standard mode)
“Places” (Alternate command mode)
Searching by other methods

1. Push <DEST>.
2. Highlight [Places] and push <ENTER>.
3. Highlight [All Categories or Name] and push <ENTER>.
4. Set the narrowing down conditions for the landmarks and push <ENTER>.
5. Highlight the main category from the list and push <ENTER>.

INFO:

If [Select a City] is highlighted and <ENTER> is pushed, a city name input screen is displayed. Specify the city to search for before narrowing down the categories.

“Specifying city” (page 4-3)
INFO:
To select the category by directly inputting the category name, highlight [Category Search] and push <ENTER>. The category name input screen is displayed.

6. Highlight the subcategory and push <ENTER>.

INFO:
Subcategories may not exist depending on the category that is selected.

7. Enter the name of the destination facility and highlight [List], and then push <ENTER>. The facility list is displayed.

INFO:
- It is not necessary to enter the facility name completely. It is also possible to display the list screen only by highlighting [List] without entering the facility name and pushing <ENTER>.
- The number of narrowed down points are displayed in the “Matches” column.
- Up to two keywords (part of the facility name) can be entered by highlighting [AND Search] and pushing <ENTER> after entering the first facility name.

INFO:
The facility name can also be entered directly by highlighting [Choose Name] on the main category list screen and pushing <ENTER>.

8. Highlight the preferred destination from the list, and push <ENTER>.

INFO:
- By highlighting [Sort] and pushing <ENTER>, options can be sorted from [By Name] or [By Distance]. When selecting [By Distance], the position of the selected location is displayed in the preview on the right side of the screen.
- In some cases, when a facility name has been entered, the number of matching destinations in the “Matches” column may be different from the number displayed on the
list screen. If this occurs, enter more characters to further reduce the number of matches.

- The search conditions can be changed by highlighting [Refine].

9. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc. “Procedures after setting destination” (page 5-2)

SETTNG HOME AS DESTINATION
The home location can be set as the destination to which the system calculates a route. This function is especially useful when searching for a route to return to the home location.

1. Push <DEST>.
2. Highlight [Home] and push <ENTER>.
3. The home location is displayed and set as the destination.
4. The entire route to home is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
If the home location is not stored yet, the system will automatically display a screen for storing it. “Storing location” (page 6-2)

Voice command
1. Push <TALK > located on the steering wheel switch.
2. After the tone sounds, speak a command.
To set the home location as the destination:
“Navigation” “Destination Home” (Stan-
SEARCHING FROM ADDRESS BOOK
A location stored in the Address Book can be set as the destination to which the system calculates a route. To utilize this function more effectively, destinations that are often traveled to should be stored in advance.

1. Push <DEST>.
2. Highlight [Address Book] and push <ENTER>. A list screen is displayed.
3. Highlight the preferred location from the list and push <ENTER>.
4. The entire route is shown on the map. Highlight [Start] after confirming the

---

INFO:
Sorted By Number
The Address Book entries are displayed in ascending numerical order.

Sorted By Name
The Address Book entries are displayed in alphabetic order.

Sorted By Icon
By selecting a particular icon, a list that contains only the Address Book entries associated with that icon is displayed.

Sorted By Group
By selecting a particular group (family, friends, leisure, etc.), the selected group is displayed at the top of the list.
location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc. (page 5-2)

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.

To set the destination from the Address Book:
“Navigation” “Address Book” (Standard mode)
“Address book” (Alternate command mode)

SETTING PREVIOUS DESTINATION
A previously set destination can be set again as the destination to which the system calculates a route. Up to 300 previous destinations will be automatically stored.

If the number of previous destinations exceeds 300, the oldest one will be replaced by the new one.

INFO:
By highlighting [By Date], the list can be sorted in chronological order. By highlighting [By Name], it can be sorted in alphabetical order.

1. Push <DEST>.
2. Highlight [Previous Destinations] and push <ENTER>. A list screen is displayed.
3. Highlight the preferred destination from the list and push <ENTER>.

INFO:
By highlighting [By Date], the list can be sorted in chronological order. By highlighting [By Name], it can be sorted in alphabetical order.

4. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected loca-
tion and starts calculating a route.

**INFO:**
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc.

[“Procedures after setting destination” (page 5-2)]

**Voice command**
1. Push `<TALK>` located on the steering wheel switch.
2. After the tone sounds, speak a command.

To display the Previous Destinations list:
“Navigation” “Previous Destinations” (Standard mode)
“Previous Destinations” (Alternate command mode)

**SETTING PREVIOUS START POINT**
The start point of the previous route guidance can be set as the destination to which the system calculates a route.

1. Push `<DEST>`.
2. Highlight [Next Page] and push `<ENTER>`.
3. Highlight [Previous Start Point] and push `<ENTER>`.
4. The previous start point is set as a destination, and the entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push `<ENTER>`. The system sets the destination to the selected location and starts calculating a route.

**INFO:**
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc.

[“Procedures after setting destination” (page 5-2)]

**Voice command**
1. Push `<TALK>` located on the steering wheel switch.
2. After the tone sounds, speak a command.
To set the previous start point as the destination:
“Previous Start Point” (Alternate command mode)

SETTING FROM STORED ROUTES
A preferred route can be selected from the stored routes.

1. Push <DEST>.
2. Highlight [Next Page] and push <ENTER>.
3. Highlight [Stored Routes] and push <ENTER>. A list screen is displayed.
4. Highlight the preferred route from the list and push <ENTER>. The route to the destination is set.
5. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
- Even after setting a destination, the location of the destination can be adjusted, the location can be stored, etc.
- “Procedures after setting destination” (page 5-2)
- The stored route includes only locations (destination and waypoints) and route calculation conditions, not the route itself. Therefore, when the destination is set using a stored route, a different route may be suggested if the current vehicle location is different from the one when the route was stored.

SETTING BY PHONE NUMBER
If the telephone number of the facility is available, use this to find the facility by entering the number, and then have the system calculate a route.

INFO:
- Telephone numbers that were stored for stored destinations can also be used.
- If the area code of the specified telephone number does not exist in the map data, the system will not
search for the location.

- Only the locations included in the database in the map data can be searched by the phone number. Residential phone numbers cannot be used to search for a location.

1. Push <DEST>.
2. Highlight [Next Page] and push <ENTER>.
3. Highlight [Phone Number] and push <ENTER>. The telephone number input screen is displayed.
4. Enter the telephone number including the area code.
5. After finishing the entry, highlight [List] and push <ENTER>. “Number input screen” (page 2-12)
6. Displays a list screen if there are two or more search results. Highlight the preferred destination from the list and push <ENTER>.
A confirmation screen for the place name and the location is displayed, and the system starts calculating.
7. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc. “Procedures after setting destination” (page 5-2)

SETTING FREEWAY ENTRANCE/EXIT
The entrance or exit of a freeway can be set as the destination to which the system calculates a route.
1. Push <DEST>.
2. Highlight [Next Page] and push <ENTER>.
3. Highlight [Freeway Entrance/Exit] and push <ENTER>. A character input screen is displayed.
4. Enter the name of the freeway.
5. After finishing the entry, highlight [List] and push <ENTER>.
6. Highlight the freeway of the destination from the list, and push <ENTER>.
7. Highlight [Entrance] or [Exit] and push <ENTER>. A list screen is displayed.
8. Select the preferred destination from the list. The position of the selected location is displayed in the preview on the right side of the screen. Then, push <ENTER>.
INFO:

By selecting [By Distance], the list can be sorted by the nearest distance.

INFO:

Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc.

“Procedures after setting destination” (page 5-2)

SETTING INTERSECTION

An intersection of any two streets can be set as the destination to which the system calculates a route.

1. Push <DEST>.
2. Highlight [Next Page] and push <ENTER>.
3. Highlight [Intersection] and push <ENTER>. A character input screen is displayed.
4. Enter the name of the 1st street. After finishing the entry, highlight [List] and push <ENTER>. A list screen is displayed.

9. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.
5. Highlight a street as the 1st street from the list and push <ENTER>. A character input screen is displayed.

6. Enter the name of the 2nd street. After finishing the entry, highlight [List] and push <ENTER>. A list screen is displayed.

7. Highlight a street as the 2nd street from the list and push <ENTER>.

8. The entire route is shown on the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc. Refer to “Procedures after setting destination” (page 5-2)

SETTING CITY CENTER
The system can calculate a route to the center of a city, without setting a specific location.

1. Push <DEST>.
2. Highlight [Next Page] and push <ENTER>.
3. Highlight [City Center] and push <ENTER>. A character input screen is displayed.

4. Enter the name of the city, highlight [List] and push <ENTER>. A list screen is displayed.

INFO:
Highlight [Last 5 Cities] and push <ENTER> to display 5 cities recently set as destinations.

5. Highlight the preferred destination from the list and push <ENTER>. The position of the selected location is displayed in the preview on the right side of the screen.

INFO:
By selecting [By Distance], the list can be sorted by the nearest distance.

6. The selected destination is displayed at the center of the map. Highlight [Start] after confirming the location of the displayed destination, and push <ENTER>. The system sets the destination to the selected location and starts calculating a route.

INFO:
Even after setting a destination, the location of the destination can be adjusted, the route can be stored, etc. "Procedures after setting destination" (page 5-2)
SETTING POINT ON MAP
A location scrolled to on the map can be set as the destination to which the system calculates a route.

1. Scroll the map, place the cross pointer over the preferred location, and push <ENTER>.

INFO:
- Adjust the map scale to search for a location more effectively.
- The point on the blinking road where the center of the cross pointer is located can be set as a destination.

INFO:
For the items except for [New Dest.], refer to “Map menu screen”. “Scrolled location map screen” (page 2-14)

3. The system sets the destination to the selected location and starts calculating a route.

INFO:
If a point on a freeway is set as the destination, a confirmation message is displayed.
DELETE DESTINATION

It is possible to delete a destination and all waypoints that have already been set.

1. Push <DEST>.
2. Select [Delete Destination] and push <ENTER>.
3. A confirmation message is displayed. Select [Yes] and push <ENTER>. The destination and the waypoints are deleted.

INFO:
The deleted destination and waypoints are not able to be reactivated.

Voice command
1. Push <TALK > on the steering wheel.
2. After the tone sounds, speak a command.

To delete a destination and all waypoints:
“Delete Destination” (Alternate Command Mode)

PROCEDURES AFTER SETTING DESTINATION

After performing a route search, the route guidance can be started immediately. Also, it is possible to confirm or change a route.

AVAILABLE ITEMS AFTER SETTING DESTINATION

- [Start]:
  Starts route guidance to the selected destination.
  “Starting route guidance” (page 5-2)
- [More Routes]:
  Displays 3 alternative routes.
  “Selecting route” (page 5-2)
- [Add/Route Info]:
  Displays the route information or add a destination or a waypoint.
  “Confirming route” (page 5-3)
- [Move Location]:
  Displays a map screen and allows the location of the destination to be adjusted.
  “Moving location of destination” (page 5-4)
- [Store Location]:
  Stores the location in the Address Book.
  “Storing location” (page 5-5)
- [Place Info]:
  Displays information about the facility that is set as the destination if it is included in the map data.
  “Viewing information about searched location” (page 5-5)

INFO:

- If no operations are performed on the system for several seconds, [Start] is automatically selected, and the system starts route guidance.
- When using waypoints, [More Routes] is disabled. After the route is started, push <ROUTE> then select [Edit/Add to Route] to change the route between each waypoint.
  “Editing route” (page 5-13)
- The same screen as when [Move Location] is selected can be displayed with the following operations:
  - Touching the map screen.
  - Pushing the directional buttons except for the up/down buttons.

STARTING ROUTE GUIDANCE

1. Highlight [Start] and push <ENTER>. Route guidance starts.

SELECTING ROUTE

1. Highlight [More Routes] and push <ENTER>.
2. Highlight the preferred route condition and push <ENTER>.
3. The display automatically returns to the previous screen.

Available route conditions
- [Short. Time] (purple): Prioritizes by the shortest time.
- [Min. Freeway] (orange): Minimizes the use of freeways.
- [Short. Dist.] (green): Prioritizes by the shortest distance.

INFO:
- When a route condition is selected, a preview is displayed on the right side of the screen.
- The 3 routes may not always be different.

CONFIRMING ROUTE
1. Highlight [Add/Route Info] and push <ENTER>.
2. Highlight the preferred information item and push <ENTER>.
3. Push <BACK> to return to the previous screen.

Available information
- [Turn List]: Displays the details of the suggested route.
  “Using turn list” (page 5-19)
- [Preview]: The system will trace the planned route going forward or in reverse.
  “Using route preview” (page 5-19)
- [Add Way Pt.]: Add a waypoint or a destination.
  “Adding destination or waypoint” (page 5-4)
- [Store Route]: A calculated route can be stored. A maximum of 5 routes can be stored.
  Stored routes can be easily retrieved and set as the suggested route.
  “Storing route” (page 6-5)
- [Map Scroll]: Displays a map screen where the location of the destination can be confirmed.
  The same screen as when [Map Scroll] is touched can be displayed with the following operations:
  - Touching the map screen.
  - Pushing the directional buttons except for the up/down buttons.
Adding destination or waypoint
Before starting route guidance, destinations and/or waypoints can be added. A total of 6 destinations or waypoints can be set.

2. Set additional destinations or waypoints and push <ENTER>.

The method of searching for a location is the same as the one for a destination.

INFO: “4. Setting destination”

MOVING LOCATION OF DESTINATION
The location of the destination can be adjusted by moving the cross pointer across the map.

1. Highlight [Move Location] and push <ENTER>.

INFO:
The screen for adjusting the location also changes by touching the map screen displayed on the right side of the screen.

INFO:
- If a waypoint was added, [More Routes] cannot be selected.
- If a destination was added, the prior destination becomes a waypoint.
2. Adjust the location by moving the cross pointer across the map and push <ENTER>. The location of the destination is modified.

**INFO:**
- The map scale can be changed by pushing <ZOOM IN> or <ZOOM OUT>. The map scale can also be changed by touching the scale icon.
- The same screen as when [Move Location] is touched can be displayed with the following operations:
  - Touching the map screen.
  - Pushing the directional buttons except for the up/down buttons.

### STORING LOCATION
A searched location can be stored in the Address Book. Then it can be easily retrieved and set as a destination (or waypoint).

1. Highlight [Store Location] and push <ENTER>.
2. The location is stored in the Address Book. The corresponding icon is displayed at the set location on the map.

### VIEWING INFORMATION ABOUT SEARCHED LOCATION
Information (street address and phone number) about places stored in the map data can be displayed.

1. Select [Place Info] and push <ENTER>.
2. Information about the location is displayed.
3. Push <BACK> to return to the previous screen.
INFO:

- If [Call] is displayed on the right side of the screen, it is possible to call the location indicated.
- The Bluetooth® Hands-Free Phone system is required to be active and the cellular phone must be connected to call the location indicated.
- Information about locations is not displayed while driving.

ABOUT ROUTE GUIDANCE

After setting the route, select [Start] to begin route guidance. Throughout route guidance, the system navigates through the guide points using visual and voice guidance.

CAUTION

- The navigation system's visual and voice guidance is for reference purposes only. The contents of the guidance may be inappropriate depending on the situation.
- When driving along the suggested route, follow all traffic regulations (e.g., one-way traffic).

“Route guidance” (page 10-9)
VOICE GUIDANCE DURING ROUTE GUIDANCE

When approaching a guide point (intersection or corner), destination, etc. during route guidance, voice guidance announces the remaining distance and/or turning direction. Push <VOICE> to repeat voice guidance.

Example of voice guidance

1. “In about one quarter mile (400 meters), right (left) turn.”
   “Right (left) turn ahead.”
2. “In about one quarter mile (400 meters) freeway entrance on your right onto (road number and direction).”
   “Freeway entrance on your right onto (road number and direction).”
3. “In about one mile (1.6 kilometers), exit on your right.”
   “Exit on your right.”
4. “You have arrived at your destination. Ending route guidance.”

GUIDANCE SCREENS AND PREVIEW MODE

Route guidance displays map screens and various information according to the situation.

When route guidance starts, the Small Turn Arrow on Map is displayed in the
upper left corner of the map screen. This arrow indicates the turning direction at the next guide point (corner or intersection). The distance is also displayed. At the top of the screen, the distance to the next guide point and the name of the next street to turn on to are displayed. Also, there may be cases that next street names are announced. The Small Turn Arrow on Map can be enabled or disabled by the user.

“Displaying small turn arrow on map” (page 5-27)

Enlarged intersection view

When approaching a guide point, the system automatically changes to the split screen and shows an enlarged view of the intersection in the left screen. After passing through the intersection, the system automatically returns to the full screen mode. To switch to the full screen mode while the enlarged intersection view is displayed, push <MAP>. Pushing <MAP> again displays the enlarged intersection view.

Junction guidance

While driving on a freeway, when the vehicle is approximately 1 mile (approximately 2 km) from a junction, the system automatically switches to the split screen and displays an enlarged view of the junction (3D) in the left screen. After passing the junction, the system automatically returns to the full screen mode. To switch to the full screen mode while the enlarged junction view is displayed, push <MAP>.

Turn list

Depending on the setting, the system can constantly display the split screen and show the turn list in the left screen. When approaching a guide point, the left screen automatically switches to an enlarged view of the intersection. To switch to the full screen mode, push <MAP>. Pushing <MAP> again displays the turn list.

“Turn list” (page 5-8)

GUIDANCE SCREEN SETTINGS

The guidance screen can be displayed at all times even when the vehicle is located away from the guide point. The screen to be displayed can be set.
Split screen settings
The display setting on the left-hand side screen shown during route guidance can be changed.

1. Push <ENTER> while the current location map screen is displayed.
2. Highlight [Map View] and push <ENTER>.
3. Highlight [View Settings] and push <ENTER>.
4. Highlight the preferred screen and push <ENTER>. The indicator of the selected screen illuminates.

Intersection:
The map screen and the enlarged intersection view can be displayed at the same time.
Push <MAP> to switch to the full map screen.

Turn list:
The list screen for showing the guide points to the destination and the map screen can be displayed at the same time. An enlarged intersection view is automatically displayed when the vehicle approaches the guide point.

Fuel Economy:
The current fuel consumption rate, average fuel consumption rate, instantaneous fuel consumption rate and distance to empty can be displayed on the map screen. An enlarged intersection view is automatically displayed when the vehicle approaches the guide point.
Push <MAP> to switch to the full map screen.
Push <MAP> again to display the fuel economy screen. When approaching a guide point, the enlarged view of the
intersection is automatically displayed. To display the fuel economy information, push <MAP>. To display the map screen, push <MAP> again.

**NOTE:**
Use the values displayed on the fuel economy screen as a guide. When the fuel gauge indicates empty or the low fuel warning light illuminates even if the distance to entry reading indicates a sufficient amount of fuel remains, refuel the vehicle as soon as possible.

Full map:

The current location map is displayed. An enlarged intersection view is automatically displayed when the vehicle approaches the guide point.

When an enlarged intersection view is displayed, pushing <MAP> returns to the map screen.

Show exit information on freeways
When the vehicle travels on a highway or a toll road, the display automatically provides exit information in the turn list.

1. Push <ENTER> while the current location map screen is displayed.
2. Highlight [Map View] and push <ENTER>.
3. Highlight [Map Settings] and push <ENTER>.

4. Highlight [Show all Freeway Exits on Route] or [Auto. Show Turn List on Freeway] and push <ENTER>. The indicator illuminates when the item is set.
5. Push <MAP> to return to the current location map screen.

**Showing freeway exit information:**

When [Show all Freeway Exits on Route] is set to ON and the route includes a freeway or toll road, all exits along the route which have exit information will be shown in the turn list.
The exit information is shown as icons.

**Displaying turn list automatically on freeway:**

When [Auto. Show Turn List on Freeway] is set to ON, the turn list will be automatically displayed while the vehicle travels on a freeway or a toll road.

**Selecting a waypoint from the exit information list:**

When exit information is displayed in the turn list, a waypoint to a facility located near the freeway exit can be set as a waypoint.

1. Highlight the exit where the exit information icon is displayed, and push <ENTER>. The category list screen is displayed.

2. Highlight the landmark category and push <ENTER>. The list screen for showing facilities located near the freeway exit is displayed.

3. Highlight the preferred facility for the waypoint and push <ENTER>.

4. The waypoint is set, and the route search is performed. 

   “Procedures after setting destination” (page 5-2)
ROUTE SCREEN

WARNING

Always stop the vehicle in a safe location before modifying the route conditions. Modifying the route conditions while driving may cause an accident.

During route guidance, the route conditions can be modified and the route information can be confirmed. Set route conditions according to personal preference.

Available setting items

- [Cancel Route/Resume Route]: Cancel the current route guidance. A canceled route can also be reactivated. If the suggested route is canceled, [Cancel Route] changes to [Resume Route].
  
- [Edit/Add to Route]: Edit or add a destination or waypoints to the route that is already set.
  
- [Route Info]: Confirm the route by the route information or simulation. The confirmed route can also be stored.
  
- [Guidance Settings]: Activate or deactivate route, voice guidance and/or traffic announcement and adjust the volume level of voice guidance.
  
- [Recalculate]: Manually search for the route again after changing the search condition.
  
- [Detour]: To detour from the suggested route, calculate a route detouring for a specified distance.
  
- [Traffic Detour]: Manually search for an alternative detour route taking the traffic information into consideration.
  
- [Route Settings]: Change the route calculation conditions anywhere along the route.

CANCELING/REACTIVATING ROUTE

A route that is already set can be canceled at any time. If a route is canceled, the destination and waypoints are also deleted.

It is also possible to reactivate a canceled route.

BASIC OPERATION

1. Push <ROUTE>.
2. Highlight the preferred setting item and push <ENTER>.
3. Push <MAP> to return to the current location map screen.
Canceling route

1. Push <ROUTE>.
2. Highlight [Cancel Route] and push <ENTER>.
3. A confirmation message is displayed. Highlight [Yes] and push <ENTER>. The route is canceled along with the destination and waypoints.

INFO:
Canceling a route does not delete destination and waypoint information completely.
Refer “Delete destination” (page 4-20)

Voice command
1. Push <TALK > located on the steering wheel switch.
2. After the tone sounds, speak a command.
To cancel a route:
“Cancel Route” (Alternate Command Mode)

Reactivating route

1. Push <ROUTE>.
2. Highlight [Resume Route] and push <ENTER>.
3. A confirmation message is displayed. Highlight [Yes] and push <ENTER>. The canceled route is reactivated.

INFO:
If a new route is set, the canceled route cannot be reactivated.

EDITING ROUTE

1. Push <ROUTE>.
2. Highlight [Edit/Add to Route] and push <ENTER>.
3. Highlight the preferred condition and push <ENTER>.
4. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Available setting items

1. [Add Destination]: Add a new destination.
   “Setting destination or waypoint” (page 5-14)

2. Current destination:
   Change or delete the destination.
   “Editing/deleting destination or waypoint” (page 5-15)

3. Condition for calculating a route to the destination:
   Change the conditions for calculating a route to the destination.
   “Changing route calculation conditions” (page 5-17)

4. [Add Waypoint]: Add a new waypoint.
   “Setting destination or waypoint” (page 5-14)

5. Current waypoint:
   Change or delete the waypoint.
   “Editing/deleting destination or waypoint” (page 5-15)

6. Condition for calculating a route to a waypoint:
   Change the conditions for calculating a route to a waypoint.
   “Changing route calculation conditions” (page 5-17)

7. [Calculate]:
   Manually search for the route again after changing the search conditions.
   “Changing route calculation conditions” (page 5-17)

Setting destination or waypoint
Add a destination or waypoint to the route that is already set. A total of 6 destinations or waypoints can be set.

1. Push <ROUTE>.
2. Highlight [Edit/Add to Route] and push <ENTER>.
3. Highlight [Add Destination] or [Add Waypoint] and push <ENTER>.

If [Add Destination] is selected, the current destination changes to a waypoint.

4. Set a destination or waypoint. The method of searching for a destination or waypoint is the same as the one for a destination.
   “4. Setting destination”
5. The selected location is displayed at the center of the map. Highlight [Add to Route] after confirming the location and push <ENTER>.

INFO:
Even after setting a destination/waypoint, the destination/waypoint location can be adjusted, the route can be stored, etc.

“Editing/deleting destination or waypoint” (page 5-15)

6. Return to the Edit Route screen. Set the route conditions as necessary.

7. Highlight [Calculate] and push <ENTER>. The system will recalculate the routes. After the route search is completed, the display will automatically return to the present location screen.

INFO:
- The prior route is automatically deleted.
- Added waypoints and search conditions will not be taken into consideration for the route calculation until [Calculate] is highlighted and <ENTER> is pushed.

Editing/deleting destination or waypoint
The destination or waypoint that is already set can be modified or deleted.

If a location is modified or deleted when a suggested route is already set, the prior suggested route will be recalculated accordingly.

1. Push <ROUTE>.
2. Highlight [Edit/Add to Route] and push <ENTER>.
3. Highlight a destination or waypoint that is already set and push <ENTER>.

4. Highlight [Move Dest.] to modify the location and push <ENTER>.

“Moving location of destination” (page 5-4)
5. Highlight [Delete] and push <ENTER> to delete the location.

6. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The destination or waypoint is deleted from the route. Return to the [Edit Route] screen.

7. By highlighting [Calculate] and pushing <ENTER>, the system will recalculate the routes. After the route search is completed, the display will automatically return to the present location screen.

![INFO:]
- If the destination is deleted, the final waypoint of the route becomes the destination.
- When the map screen is touched, the same map screen as when [Move Dest.] is selected is displayed.

Changing order of destination and waypoints
The order of a destination and waypoints that are already set can be changed.

1. Push <ROUTE>.
2. Highlight [Edit/Add to Route] and push <ENTER>.
3. Highlight a destination or waypoint that is already set and push <ENTER>.
4. Highlight [Change Order] and push <ENTER>. A list of the destination and waypoints is displayed.
5. Highlight a preferred destination or waypoint to replace the previously selected destination or waypoint and push <ENTER>.

6. A message is displayed and the order of the destination or waypoint is changed.

7. By highlighting [Calculate] and pushing <ENTER>, the system will recalculate the routes. After the route search is complete, the display will automatically return to the present location screen.

Changing route calculation conditions
Each section of the route between waypoints can have different route calculation conditions. After setting these conditions, the entire route can be recalculated.

1. Push <ROUTE>.
2. Highlight [Edit/Add to Route] and push <ENTER>.
3. Highlight the preferred section of the route to the destination or waypoint and push <ENTER>.
4. Highlight the preferred condition and push <ENTER>.

Available conditions:
- [Fastest Route]
- [Minimize Freeway]
- [Shortest Route]
5. The condition has been changed and the display returns to the [Edit/Add to Route] screen.

6. By highlighting [Calculate] and pushing <ENTER>, the system will recalculate the routes. After the route search is completed, the display will automatically return to the present location screen.

**INFO:**
- The recalculated route may not be the shortest route because the system prioritizes easy-to-drive roads for safety reasons.
- If the route conditions are set from [Route Settings], all sections in the route are subject to the same route conditions. This applies even if different route conditions are set for different sections in [Edit/Add to Route].

**CONFIRMING ROUTE**
When the suggested route is displayed after calculation, the route information can be confirmed or the suggested route simulated.

**Basic operation**
1. Push <ROUTE>.
2. Highlight [Route Info] and push <ENTER>.
3. Highlight the preferred item and push <ENTER>.

**Available items:**
- [Turn List]: Displays the details of the suggested route. "Using turn list" (page 5-19)
- [Preview]: The system will trace the planned route going forward or in reverse. "Using route preview" (page 5-19)
- [Simulation]: Simulate the suggested route. This function provides a detailed image of the route with voice guidance. "Confirming route by simulation"
[Store Route]:
A calculated route can be stored. A maximum of 5 routes can be stored. Stored routes can be easily retrieved and set as the suggested route. [Storing route] (page 6-5)

[Map Scroll]:
Displays a map screen where the location of the destination can be confirmed. The same screen as when [Map Scroll] is touched can be displayed with the following operations:
– Touching the map screen.
– Pushing the directional buttons except for the up/down buttons.

Using turn list

1. Highlight [Turn List] and push <ENTER>.
2. The information (e.g., intersections) can be confirmed on the route to the destination by scrolling the screen pushing the up and down switches of the main directional buttons or rotating the center dial.
3. Push <MAP> to return to the current location map screen.

Using route preview

1. Highlight [Preview] and push <ENTER>.
2. Highlight the preferred key and push <ENTER>.
   - #: Moves forward in the direction of the destination.
   - #: Moves backward in the direction of the starting point.
   - #: Pauses the route preview.
3. Push <MAP> to return to the current location map screen.

INFO:
During route preview, the map scale can be changed by pushing <ZOOM IN> or <ZOOM OUT>. While the map scale is being changed, the route preview is temporarily stopped.

Confirming route by simulation

1. Highlight [Simulation] and push <ENTER>.
2. Highlight the preferred key and push <ENTER>.
   - #: Pauses the simulation.
   - #: Resumes the simulation.
   - #: Ends the simulation.
3. Push <MAP> to return to the current location map screen.
INFO:
During simulation, the map scale can be changed by pushing <ZOOM IN> or <ZOOM OUT>. While the map scale is being changed, the simulation is temporarily stopped.

GUIDANCE SETTINGS
Various guidance settings can be set.

Available setting items
- [Guidance Voice]: Activates or deactivates voice guidance. The indicator illuminates if voice guidance is activated.
- [Guidance Volume]: Adjust the volume level of voice guidance.
- [Traffic Announcement]: Provides the announcement of the traffic information event on the route.

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.
   To turn on or off the Voice Guidance: “Voice Guidance On/Off” (Alternate command mode)

RECALCULATING ROUTE
The route can be searched for again manually after changing the search condition. When the vehicle deviates from the suggested route, the route from the current location to the destination is automatically searched again.

Re-searching route manually
1. Push <ROUTE>.
2. Highlight [Recalculate] and push <ENTER>.

Basic operation
1. Push <ROUTE>.
3. Highlight the preferred item and push <ENTER>.
4. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

5-20 Route guidance
3. A message is displayed, and the route is recalculated.

4. Set the route conditions. After finishing the setting, highlight [Start] and push <ENTER>.
   "Procedures after setting destination" (page 5-2)

INFO:
When a waypoint has been set on the route, the system will search for only one route even if route recalculation is performed.

Setting Auto Reroute

1. Push <ROUTE>.
2. Highlight [Route Settings] and push <ENTER>.
3. Highlight [Other Routing Choices] and push <ENTER>.

4. Highlight [Auto Reroute] and push <ENTER>. The indicator for the selected condition illuminates. When the current location map screen or route setting screen is displayed, the system recalculates a route with the set conditions.
   "Basic operation" (page 5-24)

SETTING DETOUR ROUTE
To detour from the suggested route, a route detouring for a specified distance can be calculated.
1. Push <ROUTE>.
2. Highlight [Detour] and push <ENTER>.

3. Highlight a detour distance and push <ENTER>.
After calculating the detour, the system displays the detour route on the map.

INFO:
- When the vehicle has deviated from the suggested route, [Detour] cannot be selected.
- If the system cannot calculate a detour with the specified conditions, it displays the previous suggested route.
- If the vehicle is traveling very fast, the detour route may start from a location that the vehicle has already passed.

SEARCHING FOR DETOUR ROUTE TAKING TRAFFIC INFORMATION INTO CONSIDERATION
When a serious traffic event occurs on the route, or if the system finds a faster route, a detour alert will pop up automatically. If the automatic alert is missed, a detour can also be searched for manually.

3. When the detour search is successful, detailed information about the detour route (left screen) and the comparison screen of the two routes (right screen) are displayed.
   ① Original route (yellow)
   ② Detour route (pink)
   ③ The change of distance and estimated travel time to destination when the detour route is taken.

4. To accept the suggested detour route, highlight [Yes], and then push <ENTER>.

INFO:
- If no route is set, or [Use Real Time Traffic Information] is turned off, this function cannot be operated.
- If no detour route is selected and no further action is provided, the detour route will be automatically canceled.
- The detour suggestion may be retrieved even after the message disappears by manually selecting [Traffic Detour]. The system will then search for the detour again and suggests a detour if one is available at that time.
- Without a subscription to a NavTraffic broadcast, it will not be possible to get
a traffic detour or apply settings for traffic information related functions. A message appears when a related menu item is selected.

- See “NOTES ON NavTraffic INFORMATION” for further information.
  - “Notes on NavTraffic information” (page 10-13)

Automatic detour guidance
When [Auto Reroute] and [Use Real Time Traffic Information] are turned on in the detailed route settings, a message will automatically pop up when the system finds a detour.
  - “Detailed route settings” (page 5-24)

1. If a traffic jam or a serious traffic problem occurs on the route while driving along the suggested route, the automatic detour route search starts and a message pops up if a detour is found.

2. To accept the suggested detour route, highlight [Yes] and push <ENTER>.

  ![Image](route-guidance.png)

**INFO:**
- If no operation is performed for one minute after the message is displayed, the message disappears. The detour will not be accepted, and the current suggested route will remain unchanged.
- When the [Traffic Announcement] is turned on in the guidance settings, the system will announce voice guidance at the same time that the message appears on the screen.
  - “Guidance settings” (page 5-20)

**SETTING CONDITIONS FOR ROUTE CALCULATION**

Search condition settings
The route can be recalculated after changing the route calculation conditions anywhere along the route.

1. Push <ROUTE>.
2. Highlight [Route Settings] and push <ENTER>.
3. Highlight [Basic Route Type] and push <ENTER>. The indicator for the selected condition illuminates.
4. When the conditions are set, the system starts calculating the route with the new conditions, and the current location map screen is displayed.

**Available conditions:**
- [Fastest Route]: Prioritizes by the fastest time.
- [Minimize Freeway]: Minimizes the use of motorways.
- **[Shortest Route]:**
  Prioritizes by the shortest route.

**INFO:**
Only one of these conditions can be utilized at a time.

**Voice command**
1. Push `<TALK>` located on the steering wheel switch.
2. After the tone sounds, speak a command.
   To set conditions for the route calculation (Alternate command mode):
   - “Fastest Route”
   - “Minimize Freeway Route”
   - “Shortest Route”

**Detailed route settings**
Detailed conditions can be set for the route calculation.

**Basic operation:**
1. Push `<ROUTE>`.
2. Highlight [Route Settings] and push `<ENTER>`.
3. Highlight [Other Routing Choices] and push `<ENTER>`.
4. Highlight the preferred condition and push `<ENTER>`. The indicator for the selected condition illuminates.
5. If [Route Settings] is exited after changing the settings, the system starts calculating the route with the new conditions.

**Available setting items:**
- **[Minimize Toll Roads]:**
  Minimizes the use of toll roads.
- **[Use Time Restricted Roads]:**
  Uses any roads subject to time restrictions.
- **[Use Statistical Traffic Information]:**
  Uses statistical traffic information that is stored in the map data.
- **[Use Real Time Traffic Information]:**
  Uses the latest traffic information received via the SiriusXM broadcast.
- **[Use Avoid Area Settings]:**
  Enables the avoid area setting.
- **[Use Ferries]:**
  Includes the use of ferries.
- **[Use Learned Routes]:**
  Uses the roads that are most frequently traveled with the help of self-learning technology.
- **[Auto Reroute]:**
  If the vehicle deviates from the suggested route, the system automatically recalculates a route that leads the vehicle to the suggested route.

**INFO:**
- The recalculated route may not be the shortest route because the system prioritizes easy-to-drive roads for safety reasons.
- If route conditions are set from [Route Settings], all sections in the route are subject to the same route conditions.
even though different route conditions are set for different sections in [Edit/Add to Route].

- If [Use Time Restricted Roads] is deactivated, the system calculates a route without any consideration of the regulations concerning the time or day of the week. Therefore, the suggested route may include a road subject to traffic regulations concerning the time or day of the week. When driving along the route, always follow all traffic regulations regardless of whether [Use Time Restricted Roads] is ON or OFF.

- If the system cannot calculate any alternative routes, it displays the previous route.

- If the vehicle overly deviates from the suggested route, the system calculates a new route.

- Statistical traffic information is based on previous traffic data. When the traffic situation rapidly changes due to unexpected accidents, construction work, traffic restrictions, emergencies, etc., the prediction accuracy of the system may be reduced.

- Traffic jam information displayed on the map screen is not statistical traffic information.

- When [Use Statistical Traffic Information] is turned on, the system may lead to a road where a traffic jam occurs or to a detour even though the shortest route does not have a traffic jam.

- Even when [Use Real Time Traffic Information] is turned on, if traffic information has not been provided for the area, sometimes it is possible that a detour will not be indicated in a location where a traffic jam occurs.

- The system may not lead to a detour if traffic closure or a traffic jam occurs far from the present location.

- The system calculates to reduce the time required for the entire route from the start to destination. If there are no appropriate routes, the system may lead to a route where a traffic jam occurs instead of leading to a detour.

- This system can learn and memorize the route that is most frequently used. However, despite driving on the same route several times so that the system can learn the route, the system may have difficulty learning the route under the following conditions:
  - [Use Time Restricted Roads] is turned on.
  - [Use Real Time Traffic Information] is turned on.
Various guidance information can be set to be played during route guidance and activate or deactivate route and/or voice guidance.

**BASIC OPERATION**

1. Push <SETTING>.
4. Highlight the preferred item and push <ENTER>.
5. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

**Available setting items**

- **[Guidance Volume]:**
  Adjusts the volume level of voice guidance.
  “Guidance settings” (page 5-20)

- **[Guidance Voice]:**
  Activates or deactivates voice guidance.
  The indicator illuminates if voice guidance is activated.
  “Guidance settings” (page 5-20)

- **[Traffic Announcement]:**
  Provides an announcement of a traffic information event on the route.
  “Guidance settings” (page 5-20)

- **[Voice Guidance Settings]:**
  Sets advanced settings for the voice guidance announced at guide points.
  “Setting voice guidance at intersections” (page 5-27)

- **[Guidance Display Settings]:**
  Activates or deactivates small turn arrow display on the map.
  “Displaying small turn arrow on map” (page 5-27)

- **[Estimated Time]:**
  Switches the display of estimated travel time to the destination or waypoint that is displayed on the map screen.
  “Switching estimated arrival time display” (page 5-28)

- **[Others]:**
  - **[Set Average Speeds]:**
    Set an average vehicle speed for each type of road, which is reflected in the calculation of the required time to the destination.
    “Set average speeds” (page 5-28)
  - **[Auto Reroute]:**
    If the vehicle deviates from the suggested route, the system automatically recalculates a route.
    “Setting Auto Reroute” (page 5-21)
SETTING VOICE GUIDANCE AT INTERSECTIONS

1. Push <SETTING>.
5. Highlight [Intersection Guidance Settings] and push <ENTER>.
6. Highlight the preferred item and push <ENTER>.

Available setting items

- [Voice Announcements]:
  Sets how many times the voice guidance is announced before the vehicle reaches an intersection.
  1. Highlight [Voice Announcements] and push <ENTER>.
  2. Highlight the preferred item and push <ENTER>.

  - [Full]: The system announces three kinds of voice guidance: “Turning Point”, “1 Guide” and “2 Guide”.
  - [Concise]: The system announces two kinds of voice guidance: “Turning Point” and “1 Guide”.

- [Turning Point]:
  Turns on the sound that chimes when a maneuver is supposed to be occurring.

DISPLAYING SMALL TURN ARROW ON MAP

The guidance screen displayed when the vehicle passes through an intersection can be changed.

1. Push <SETTING>.
5. Highlight [Small Turn Arrow on Map] and push <ENTER> to activate or deactivate Small Turn Arrow on the Map (simplified turn indicator) displayed in the upper left corner of the map screen. The indicator illuminates if the Small Turn Arrow on the Map is displayed.

SWITCHING ESTIMATED ARRIVAL TIME DISPLAY
The display of the travel time on the map screen can be switched between the travel time to the destination and the travel time to the waypoint.

Example: Switching the display to the travel time to the waypoint
1. Push <SETTING>.
5. Highlight [Waypoint] and push <ENTER>.

The indicator for the selected condition illuminates.

6. Push <MAP> to return to the current location map screen.

7. The icon displayed on the map screen is switched, and the travel time to the waypoint is displayed.

Displayed icon
📍: Display of the travel time to the destination
📍: Display of the travel time to the waypoint

SET AVERAGE SPEEDS
The required time to the destination can be calculated based on the set vehicle speeds.
Basic operation

1. Push <SETTING>.
4. Highlight [Others] and push <ENTER>.
5. Highlight [Set Average Speeds] and push <ENTER>.
6. Highlight the preferred item and push <ENTER>.
7. Use the multi-function controller to make an adjustment. The speed can be increased/decreased by 5 MPH (5 km/h).
8. After finishing the setting, push <ENTER> or <BACK> to activate the setting.

9. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Available setting items:

- [Auto]: If set to ON, the system automatically calculates the required time to the destination, the indicator illuminates and the speed settings cannot be changed.
- [Freeway]: Adjust the average vehicle speed on a freeway by moving the multi-function controller in the direction of [+1 or [-].
- [Main Road]: Adjust the average vehicle speed on a main road by moving the multi-function controller in the direction of [+1 or [-].
- [Town Road]: Adjust the average vehicle speed on a town road by moving the multi-function controller in the direction of [+1 or [-].
- [Residential]: Adjust the average vehicle speed in a residential area by moving the multi-function controller in the direction of [+1 or [-].
- [Reset]: Sets the average vehicle speeds to the default values.

Transferring information to/from address book ................................................................. 6-20
Often visited locations can be stored in the Address Book. The stored addresses can be easily retrieved to set them as a destination or waypoint.

**INFO:**
- The Address Book can store up to 300 locations.
- New information placed in the same storage position will overwrite the old data.

**STORING LOCATION BY SEARCHING**

After a location is searched for once, it can be stored for future use.

1. Push `<SETTING>`.
3. Highlight `[Address Book]` and push `<ENTER>`.
4. Highlight `[Stored Location]` and push `<ENTER>`.
5. Highlight `[Home Location (None)]` or `[Add New]` and push `<ENTER>`.
6. Highlight the appropriate method to search for a location and push `<ENTER>`.
7. When a preferred location is displayed at the center of the map, confirm the address of the location and push `<ENTER>`.
   A message is displayed, and the address of the location is stored in the Address Book.
8. Adjust the location of the stored item and edit the contents of the stored item as necessary. After finishing the setting, highlight [OK] and push <ENTER>.

INFO:
- When the location is stored in the Address Book, [Address Book] can be used to search for the location.
- A location can be adjusted by selecting [Move Location] using the same method as the one for a destination. “Moving location of destination” (page 5-4)

Other settings
An address can also be stored using the following procedure.

1. Push <DEST>.
2. Highlight [Address Book] and push <ENTER>.
3. Highlight [Store/Edit] and push <ENTER>.
4. Highlight [Add New] and push <ENTER>.
5. Highlight the appropriate method to search for a location and push <ENTER>. The address of the searched location is stored. “4. Setting destination”

STORING CURRENT VEHICLE LOCATION

1. Push <MAP> to display the current location map screen.
2. Push <ENTER> at the current vehicle location.
3. Highlight [Store Location] and push <ENTER>. A message is displayed, and the current vehicle location is stored in the Address Book.
4. The icon representing the stored location is displayed on the map. Push <MAP> or <BACK> to return to the current location map screen.

INFO:
The location is stored in the first available position number in the Address Book list.

STORING LOCATION BY MOVING MAP

1. Move to the preferred location on the map and push <ENTER>.

2. Highlight [Store Location] and push <ENTER>. A message is displayed, and the address of the location is stored in the Address Book.

3. The icon representing the stored location is displayed on the map. Push <MAP> to return to the current location map screen.

INFO:
The address is stored in the first available position number in the Address Book list.
STORING ROUTE

A maximum of 5 calculated routes can be stored. Stored routes can be easily retrieved and set as the suggested route.

INFO:
Stored route includes only locations (destination and waypoints) and route calculation conditions, not the route itself.

1. Push <ROUTE>.
2. Highlight [Route Info] and push <ENTER>.
3. Highlight [Store Route] and push <ENTER>.
4. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The current route is stored.

OTHER SETTINGS
A route can also be stored using the following procedure.

1. Push <SETTING>.
3. Highlight [Address Book] and push <ENTER>.
4. Highlight [Address Book] and push <ENTER>.
5. Highlight [Store Current Route] and push <ENTER>.
6. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The current route is stored.

INFO:
- The route is stored in the first available position number in the store current route list.
- A maximum of 5 routes can be stored. When 5 routes are stored in the Address Book, a new route cannot be stored until a route is deleted. “Deleting stored item” (page 6-17)
- If any waypoints are not set on the route, the route cannot be stored.
STORING TRACKED ROUTE

A travelled route up to the current location can be stored. A maximum of 5 tracked routes can be stored.

1. Push <MAP> to display the current location map screen.
2. Push <ENTER> at the current vehicle location.
3. Highlight [Store Tracking] and push <ENTER>.
4. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The tracked route you have traveled is stored.
5. Push <MAP> or <BACK> to return to the current location map screen.

INFO:
- A maximum of 5 tracked routes can be stored. When 5 tracked routes are stored in the Address Book, a new tracked route cannot be stored until a tracked route is deleted. 
  "Deleting stored item" (page 6-17)
- The tracked route is stored in the first available position number in the store tracking list.

OTHER SETTINGS

A tracked route can also be stored using the following procedure.

1. Push <SETTING>.
3. Highlight [Address Book] and push <ENTER>.
4. Highlight [Stored Tracking] and push <ENTER>.
5. Highlight [Add New] and push <ENTER>.

INFO:
A tracked route can only be stored using the setting screen when [Current Tracking] is set to on.
STORING AVOID AREA

An Avoid Area can be stored.
The Avoid Area is an area that can be excluded from a route, such as a road that is always congested. Once Avoid Areas are stored, the system avoids those areas when calculating a route. Up to 10 Avoid Areas can be stored.

1. Push <SETTING>.

3. Highlight [Address Book] and push <ENTER>.

4. Highlight [Avoid Area] and push <ENTER>.

5. Highlight [Add New] and push <ENTER>.

INFO:
A maximum of 10 Avoid Areas can be stored.
When 10 Avoid Areas are already stored, a new Avoid Area cannot be stored until a currently stored Avoid Area is deleted.

6. Highlight the appropriate method to search for a location and push <ENTER>.

7. Set the following items for the searched location.
Available setting items:
- [Rename]: Changes the name.
  (page 6-16)
- [Move Location]: Adjusts the location of the Avoid

Storing location/route  6-7
EDITING ADDRESS BOOK

Items stored in the Address Book can be modified. These settings can be edited to make the navigation system more useful.

8. After finishing the setting, highlight [OK] and push <ENTER>.

BASIC OPERATION
1. Push <SETTING>.
3. Highlight [Address Book] and push <ENTER>.
4. Highlight the preferred item and push <ENTER>.

Available items
- [Stored Location]: Edits the information of a stored home and Address.
- [Stored Routes]: Edits the information of a stored route.
- [Stored Tracking]: Edits the information of a stored tracked route.
- [Delete Stored Items]: Deletes a stored location or route.
- [Transfer Address Book]: Imports or exports the data of the stored items using a USB memory.

EDITING STORED HOME AND ADDRESS
1. Highlight [Stored Location] and push <ENTER>.

2. Highlight the stored home location or preferred stored address and push <ENTER>.

INFO:
Highlighting [Sort] displays a list of various sort functions. To use the sort functions, stored locations must be set in advance. 
“Storing location” (page 6-2)

3. Highlight the preferred item and push <ENTER>.

Available setting items
- [Edit]: Edits the stored address information.
- [Move Location]: Adjusts the location of the stored address.
- [Delete]: Deletes the stored address.
- [OK]: Applies the settings.

Other settings
A stored address can also be edited using the following procedure.

MINOR ADJUSTMENT OF HOME OR STORED ADDRESS
When [Edit] is selected, you can edit the following items of the home or stored location can be edited.
- [Show Icon on Map]
- [Name] (only for stored locations)
- [Voicetag] (only for stored location)
- [Icon]
- [Sound]
- [Direction]
- [Distance]
- [Phone No.]
- [Group] (only for stored locations)
- [Entry Numbers] (only for stored locations)

Show icon on map
Displays the home icon or the stored address icon on the map.
3. The indicator illuminates when the item is set. Then the system displays the icon on the map.

Name (only for stored locations)
Changes the name of a stored location.

1. Highlight [Edit] and push <ENTER>.
2. Highlight [Name] and push <ENTER>.
   A character input screen is displayed.
3. Enter the preferred name for the stored location.
   *“How to input letters and numbers” (page 2-11)*

4. Highlight [OK] and push <ENTER>. The name is stored.

Voicetag (only for stored locations)
Stores the voicetag for the stored location. The voicetag allows you to set the stored location as a destination using Voice Recognition.

1. Highlight [Voicetag] and push <ENTER>.
2. Highlight [Store] and push <ENTER>.
3. A beep sounds, and the system enters the voice command reception mode.
4. Speak the name/word to be used as Voicetag.
5. The Voicetag is stored, provided the system recognizes it.

**INFO:**
- A Voicetag cannot be stored, overwritten or played while driving.
- The Address Book can store up to 100 Voicetags.
- Highlight [Play] to confirm the stored Voicetag.
- Highlight [Delete] to delete a stored Voicetag.
- If a Voicetag is already stored, select [Restore] to re-record the Voicetag.
**Icon**
Changes the icon of the home or stored address to the preferred one. By changing the icons, the usage of the [By Icon] option of the sort function can be optimized more effectively ([Sort] menu situation).

1. Highlight [Icon] and push <ENTER>.  
   A list of icons is displayed.

2. Highlight the preferred icon and push <ENTER>.
   The icon is changed.

**Sound**
Sets the tone of the alarm that sounds when the vehicle approaches the home or a stored address.

1. Highlight [Sound] and push <ENTER>.  
   A sound list is displayed.

2. Select the preferred alarm tone and push <ENTER>.  
   The indicator of the selected alarm tone illuminates.

**Direction**
Sets the alarm to sound when approaching from a specific direction.

1. Highlight [Direction] and push <ENTER>.  
   A map screen with the home or stored location located on the map center is displayed.

2. Set the direction that sounds the alarm and push <ENTER>.  
   The selected direction is set.
INFO:

After the direction is set and [Direction] is selected and set again, a confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The set direction is overwritten.

Distance
Sets the alarm to sound when reaching a specific distance to the home or stored address.

1. Highlight [Distance] and push <ENTER>.

2. Highlight the preferred distance option and push <ENTER>. The indicator of the selected distance illuminates.

Available distance options:
- 150 feet (50 m)
- 300 feet (100 m)
- 1000 feet (300 m)
- 1500 feet (500 m)

INFO:

Once the direction and the distance to sound an alarm are set, the system will sound the alarm when the vehicle enters the triggering zone.

Phone No.
Stores the telephone number of the home or a stored location.

1. Highlight [Edit] and push <ENTER>.
2. Highlight [Phone No.] and push <ENTER>. The telephone number entry screen is displayed.

3. Enter the telephone number of the home or stored location.
4. Highlight [OK] and push <ENTER>. The telephone number is stored.

"Number input screen" (page 2-12)
INFO:
If the phone number of the home or a location is stored, the phone number can be used to search for the destination even if it is not included in the map data.

Group (only for stored locations)
This groups the stored locations.
By grouping the stored locations, the [By Group] option of the sort function can be used more effectively in the [Sort Entries] mode.

1. Highlight [Group] and push <ENTER>.
2. Highlight the preferred group and push <ENTER>.
   When the indicator of the selected group illuminates, the stored location is classified into the applicable group.

Entry Number (only for stored locations)
Index the position numbers of any two stored locations in the list.

1. Highlight [Entry Number] and push <ENTER>.
   A list of stored locations is displayed.
2. Highlight the preferred group and push <ENTER>.
   The position numbers of the selected stored locations are changed.

EDITING STORED ROUTE

1. Highlight [Stored Routes] and push <ENTER>.
2. Highlight the preferred stored route and push <ENTER>.
3. Highlight the preferred item to edit from the list on the right side of the screen and push <ENTER>.
4. After finishing the editing, highlight [OK] and push <ENTER>.

INFO:
If [Store Current Route] is selected, the system stores the current route.
Available setting items:

- [Rename]: Changes the name.
  "Character (letters and numbers) input screen" (page 2-11)
- [Replace]: Overwrites the stored route to the current route.
- [Delete]: Deletes the stored route.
- [OK]: Applies the settings.

EDITING STORED TRACKING

1. Highlight [Stored Tracking] and push <ENTER>.
2. Highlight a stored tracked route and push <ENTER>. When the "ON" indicator is not illuminated, push <ENTER>. The indicator illuminates, and the Edit screen is displayed.
   If <ENTER> is pushed while the "ON" indicator is illuminated, the indicator turns off.

3. Highlight the preferred item and push <ENTER>.
   Available setting items (Current tracking):
   - [View Track]: Displays the tracked route up to the current location.
   - [Delete]: Deletes the stored current tracking.
   - [OK]: Applies the settings.

   Available setting items (Stored tracked routes):
[View Track]: Displays a stored tracked route on the map.

[Rename]: Changes the name.

“Character (letters and numbers) input screen” (page 2-11)

[Replace]: Overwrites the stored tracked route to the current tracked route.

[Delete]: Deletes the stored tracked route.

[OK]: Applies the settings.

Displaying tracked route
The stored tracked route can be displayed on the map as necessary.

1. Highlight [Stored Tracking] and push <ENTER>.
2. Highlight a tracked route to display on the map screen, and push <ENTER>. The “ON” indicator illuminates, and the Edit screen is displayed.
3. After confirming the location to display the tracked route, highlight [OK] and push <ENTER>. The screen returns to the previous screen.
4. Push <MAP> to return to the current location map screen.

INFO:
- Current tracking is displayed up to 6 miles (10 km).
- Stored tracking is displayed up to 12 miles (20 km).

EDITING AVOID AREA

1. Highlight [Avoid Area] and push <ENTER>.
2. Highlight the preferred Avoid Area and push <ENTER>.
3. Highlight the preferred items and push <ENTER>.

Available setting items:
- [Rename]: Changes the name.
- [Move Location]: Adjusts the location of the Avoid Area.
- [Resize Area]: Adjusts the range of the Avoid Area.
- [FWY]: Avoids freeways.
- [Delete]: Deletes the Avoid Area.
- [OK]: Applies the setting.

4. After finishing the setting, highlight [OK] and push <ENTER>.

INFO:
An Avoid Area can be added by selecting [Add New].
“Storing avoid area” (page 6-7)

Rename
Changes the name of an Avoid Area.

1. Highlight [Rename] and push <ENTER>. A character input screen is displayed.
2. Enter the preferred name for the avoid area.
3. Highlight [OK] and push <ENTER>. The name is stored.

Move Location
Adjusts the location of the Avoid Area.

1. Highlight [Move Location] and push <ENTER>.
2. Adjust the location of the Avoid Area.
3. After adjusting the location, push <ENTER>.

INFO:
Push <ZOOM IN> or <ZOOM OUT> to change the scale of the map.
**FWY**

Sets the route to avoid freeways.

1. Highlight [FWY].
   To include freeways in the Avoid Area, push <ENTER> to illuminate this indicator.

2. The Avoid Area is displayed in green if it includes a freeway or in blue if it does not include a freeway.

**INFO:**

If the current vehicle location is set to an Avoid Area, the system will not provide route guidance.

**Delete**

Deletes the Avoid Area.

1. Highlight [Delete] and push <ENTER>.

2. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The stored item is deleted from the Address Book.

**DELETING STORED ITEM**

The locations and routes in the Address Book can be deleted. Two deletion methods are available: deleting an individual item and deleting all stored items.

**NOTE:**

Deleted items cannot be restored. Before deleting an item, always make sure that the item is truly not necessary.

**DELETING STORED ITEM INDIVIDUALLY**

You can delete stored addresses, routes, tracking and avoid areas individually.

1. Push <SETTING>.
3. Highlight [Address Book] and push <ENTER>.

Example: [Stored Location] is highlighted.

4. Highlight the preferred item for deletion and push <ENTER>.

5. Highlight the preferred location/route for deletion and push <ENTER>.

6. Highlight [Delete] and push <ENTER>.

7. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The stored item is deleted from the Address Book.

Other settings
A stored address can also be deleted using the following procedure.

1. Push <DEST>.
2. Highlight [Address Book] and push <ENTER>.
3. Highlight [Store/Edit] and push <ENTER>.
4. Highlight [Edit or Delete an Entry] and push <ENTER>.
5. Highlight a preferred address and push <ENTER>.

6-18 Storing location/route
INFO:
This procedure applies only for deleting a stored home or address. A stored route, tracking or avoid area cannot be deleted using this procedure.

DELETING INDIVIDUAL ITEM ON THE MAP
1. Align the cross pointer over the preferred stored location for deletion by moving on the map. Then push <ENTER>.
2. Highlight [Delete] and push <ENTER>.
3. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The stored item is deleted from the Address Book.

DELETING ALL STORED ITEMS
1. Push <SETTING>.
3. Highlight [Address Book] and push <ENTER>.
4. Highlight [Delete Stored Items] and push <ENTER>.
5. Highlight the preferred item for deletion and push <ENTER>.

Items that can be deleted
- [Delete Home Location]: Deletes the home location.
- [Delete Address Book]: Deletes all stored locations.
- [Delete Stored Routes]: Deletes all stored routes.
- [Delete Current Tracking]: Deletes the current tracked route.
- [Delete Stored Tracking]: Deletes all stored tracked routes.
- [Delete Avoid Areas]: Deletes all stored Avoid Areas.
- [Delete Stored Voicetags]: Deletes all stored voicetags.
- [Delete Previous Destinations]: Deletes all or one of the previous destinations.
- [Delete Previous Start Point]: Deletes all previous start points.
- [Delete Learned Route]: Deletes all system learned routes.

6. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>. The stored items are deleted from the Address Book.

Other settings
All stored addresses can also be deleted using the following procedure.

1. Push <DEST>.
2. Highlight [Address Book] and push <ENTER>.
3. Highlight [Store/Edit] and push <ENTER>.
4. Highlight [Delete All Addressbook Entries] and push <ENTER>.

INFO: This procedure applies only for deleting a stored home or address. A stored route, tracking or avoid area cannot be deleted using this procedure.

TRANSFERRING INFORMATION TO/FROM ADDRESS BOOK

The information of the stored home and addresses can be exported and imported using a USB memory.

1. Insert a USB memory and push <SETTING>.

INFO:
Refer to the vehicle Owner’s Manual for the location of the USB connection port.

3. Highlight [Address Book] and push <ENTER>.

4. Highlight [Transfer Address Book] and push <ENTER>.

5. Highlight [Download Address Book to USB] or [Download Address Book from USB] and push <ENTER>.

7. Highlight [Download] and push <ENTER>.

**NOTE:**
Do not remove the USB memory until the system completely imports or exports the data.

**INFO:**
If the USB memory already has the data for a stored address, a confirmation message is displayed. Once overwritten, the original data cannot be recovered.

INFORMATION SCREEN

This screen sets or displays various information that is helpful for using the vehicle safely and comfortably. Available items include the vehicle information, Traffic Info. setup, current location information, GPS information, Voice recognition list and map version.

Designs and items displayed on the screen may vary depending on the markets and the models.

INFO:
A NavTraffic subscription is necessary to view Traffic Info.

BASIC OPERATION

1. Push <INFO>.
2. Highlight the preferred item and push <ENTER>.

Available items
- [Fuel Economy]: Refer to the vehicle Owner’s Manual.
- [Maintenance]: Refer to the vehicle Owner’s Manual.
- [Where am I?]: Displays information regarding the current vehicle location. “Viewing information about current vehicle location” (page 7-3)
- [Traffic Info]: Allows Traffic Info. setup. “Viewing available traffic information” (page 7-3)
- [Weather Info]: Displays weather information. “Viewing available weather information” (page 7-9)
- [Others]:
  - [Map Update]: Displays the map version and enables updating of the map data. “Map update” (page 7-18)
  - [Navigation Version]: Displays the current navigation system version. “Viewing navigation system version information” (page 7-19)
- [GPS Position]: Displays GPS information regarding the current vehicle location. “Viewing GPS current location information” (page 7-19)

INFO:
The displayed items vary depending on the options that are equipped on the vehicle.
VIEWING INFORMATION ABOUT CURRENT VEHICLE LOCATION

This displays the information about the vehicle location on the route when driving according to route guidance.

BASIC OPERATION
1. Push <INFO>.
2. Highlight [Where am I?] and push <ENTER>.
3. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Contents of vehicle location information
☆ Next Street:
  Displays the next street on the route.
☆ Previous Street:
  Displays the previous street on the route.
☆ Displays the distance to the next intersection on the route.
☆ Displays the distance traveled from the previous intersection on the route.

VIEWING AVAILABLE TRAFFIC INFORMATION

NavTraffic information is a subscription service offered by SiriusXM Satellite Radio. This service provides real-time information regarding traffic flow, accidents, road construction and other incidents, where available.

NavTraffic combines information from commercial and public traffic data providers including government departments of transportation, police, emergency services, road sensors, cameras and aircraft reports. The traffic information is broadcast to the vehicle by the SiriusXM satellites. Available traffic information on the route the driver selected is shown on the navigation screen so traffic conditions between you and the destination are known. Three types of real-time traffic information for major roadways are shown on the navigation system:
* Unscheduled traffic data for example, accidents and disabled vehicles.
* Scheduled traffic data, for example road construction and road closures.
* Traffic flow information (rate of speed data).
WARNING

NavTraffic information is not a substitute for attentive driving. Traffic conditions change constantly and emergency situations can arise without warning. Relying only on NavTraffic information may lead to a collision and could result in serious personal injury.

NOTE:

Flow information is provided only for roads equipped with traffic sensors and is not available in all markets covered by the service. Flow data may not be available on portions of a road that is under construction. NavTraffic information is available in limited markets. To subscribe or to check if this service is available in the area: call 1-866-635-2349 or see www.siriusxm.com/navtraffic

INFO:

If a contract is not completed for NavTraffic information service, a message appears, and it will not be possible to check the information on the traffic information system.

BASIC OPERATION

1. Push <INFO>.
2. Highlight [Traffic Info] and push <ENTER>.
3. Highlight the preferred information and push <ENTER>.
4. Push <BACK> to return to the previous screen.
   Push <MAP> to return to the current location map screen.

Available items

- [Info on Route]: Displays the list of traffic information found on the recommended route from the current vehicle location to the destination.
- [Nearby Traffic Info]: Displays the list of traffic information around the current vehicle location.

INFO ON ROUTE

This is only available when a route is set. The list of traffic information found on the recommended route from the current vehicle location to the destination is displayed. The detailed information about displayed events can also be checked.

1. Highlight [Info. on Route] and push <ENTER>. A list screen is displayed.
2. Highlight the event to check the detailed information, and push <ENTER>.
3. The map screen centered around the selected event is displayed. On the left screen, the detailed information about the event is displayed.

The message can be scrolled using the multi-function controller or the steering wheel.

4. Push <BACK> to return to the previous screen.

NEARBY TRAFFIC INFO.
The list of available traffic information around the current vehicle location is displayed.

1. Highlight [Nearby Traffic Info] and push <ENTER>. A list screen is displayed.

2. Highlight the event to check the detailed information for and push <ENTER>.

3. The map screen centered around the selected event is displayed. On the left screen, the detailed information about the event is displayed. The message can be scrolled using the multi-function controller or the steering wheel.

4. Push <BACK> to return to the previous screen.

DISPLAY URGENT TRAFFIC INFORMATION
When an urgent event is found around the current vehicle location, a message pops up automatically with a voice announcement.
The message includes the icon, event type, event information and the direct distance from the current location to the event.

**INFO:**
- Urgent traffic information is displayed regardless of whether the traffic information system is on or off.
- When there are multiple urgent events, the event with the shortest direct distance from the current location is displayed.
- If the urgent event is on the recommended route, and if a detour is found, the detour route notification screen is displayed when the vehicle approaches the detour point.

**TRAFFIC INFORMATION ON MAP**

With subscription to NavTraffic service, traffic information is displayed on both Plan View and Birdview™ map screen.

See “NOTES ON NavTraffic INFORMATION” for further information.

“Notes on NavTraffic information” (page 10-13)
Screen information

1. Road conditions
   - Free Flow: Green arrow
   - Moderate traffic: Yellow arrow
   - Heavy traffic: Red arrow
   - Section affected by serious traffic event: Purple dashed arrow

2. Estimated travel time to destination calculated with consideration of traffic information on route.

3. Traffic information icon:
   - If the route is not already set, all of the traffic information icons on the map screen are displayed in color.
   - When the route is already set, the icons on the route are displayed in color, and the icons outside the route are displayed in gray.

4. Traffic indicator:
   - Displays the reception condition of traffic information transmitted from the provider.
   - Green: Reception condition is good.
   - Gray: Reception condition is not good.
   - No mark: Subscription to NavTraffic service is not detected.

1. Place the cross pointer over the traffic information icon. The general description of the icon is displayed.
2. Push `<ENTER>` or touch [Detail]. The screen for showing the detailed information for the traffic information icon is displayed.

3. The map screen centered around the selected event is displayed. On the left screen, the detailed information about the event is displayed. You can scroll the message by using the multi-function controller or the steering wheel.
4. Push `<MAP>` to return to the current location map screen.

TRAFFIC INFORMATION SETTINGS
This displays or changes the settings for the traffic information related functions.

1. Push `<SETTING>`.
3. Highlight [Traffic Info Settings] and push `<ENTER>`.
4. Highlight the preferred setting and push `<ENTER>`. The indicator for the selected setting illuminates.

Available setting items
- [Use Traffic Info]: Enables all traffic information related functions.
- [Show Incidents on Map]: Displays the traffic incidents (e.g., accident) on the map screen.
- [Show Traffic Flow on Map]: Displays the traffic flow with an arrow on the map screen.
- **[Blink Red Traffic Flow]:** Blinks the red traffic flow lines that represent congestions.
- **[Traffic Announcement]:** Announces the traffic information event on the route.

**INFO:**
- Even when [Show Traffic Flow on Map] and [Show Incidents on Map] are set to off, the list display of [Info on Route] and [Nearby Traffic Info] will not be affected.
- Even when [Traffic Announcement] is set to off, the route guidance will not be affected. Also, the announcement of emergency information and weather information will not be turned off.

**Voice command**
1. Push `<TALK>` located on the steering wheel switch.
2. After the tone sounds, speak a command.

To turn on or off the traffic information system:
- “Information” “Traffic Information” (Standard mode)
- “Traffic Information” (Alternate command mode)

** Viewing Available Weather Information**

NavWeatherXM information is a subscription service offered by SiriusXM Satellite Radio.

This service provides real-time information regarding current weather, temperature, warnings, road conditions and forecasts where available. The weather information is broadcast to the vehicle by the SiriusXM Satellite Radio.

The service enables you to view the following information on the navigation system.
- Current weather information icon of the destination on the screen of suggested route
- Detailed weather information and forecasts of an area of interest
- Countrywide and local maps with the current weather, temperature, warnings and road condition information
- List of warning/watches events detected around the current location
- Pop-up messages on the navigation screen with voice announcements when warnings and watches are detected around the current location

**Viewing Technical Information** 7-9
WARNING

NavWeatherXM information is not a substitute for attentive driving. Weather conditions change constantly and emergency situations can arise without warning. Relying only on NavWeatherXM information could result in serious personal injury.

NavWeatherXM information is available in limited markets. To subscribe to or check if this service is available in the area, call 1-866-635-2349 or access www.siriusxm.com/navweather.

INFO:
• If a contract is not completed for the NavWeatherXM information service, a message appears and it will not be possible to check the information on the traffic information system.
• The weather information is available only for areas that provide weather information to NavWeatherXM.

INFO:
The reception condition of the NavWeatherXM information transmitted from the provider can be confirmed using the “Weather” indicator on the upper right side of the screen.
Green: The reception condition is good.
Gray: The reception condition is not good.
No mark: A subscription to the NavWeatherXM service is not detected.

DISPLAYING WEATHER INFORMATION SCREEN

Basic Operation
1. Push <INFO>.
2. Highlight [Weather Info] and push <ENTER>.
3. Highlight the preferred information and push <ENTER>.
4. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Available items:
• Current Weather and Forecasts: Displays current weather information and three-day forecasts.
• Warnings and Watches History: Displays a list of warnings and watches recently detected around the current location.
Weather Map:
Displays the current weather map for the preferred area.

Temperature Map:
Displays the current temperature map for the preferred area.

Warnings Map:
Displays the current watches/warnings map for the preferred area.

Road Condition Map:
Displays the current road condition map for the preferred area.

Selecting city
When displaying various weather information screens by pushing <INFO>, the range can be specified for the weather information from among the current location (local), destination, countrywide (nation) or a specified city.

The city can be specified by selecting one from the list that is displayed.

1. Push <INFO>.
2. Highlight [Weather Info] and push <ENTER>.
3. Highlight the preferred information and push <ENTER>.
4. Highlight [Select Other City from Menu] and push <ENTER>.
5. Highlight the preferred state from the list and push <ENTER>.
6. Highlight the preferred city from the list and push <ENTER>.

INFO:
[Select Other City from Menu] is not available while driving.

Current weather and forecasts
The current weather information and a three-day forecast for the current location, the destination or the preferred city.

1. Highlight [Current Weather and Forecasts] and push <ENTER>.

2. Highlight the preferred area and push <ENTER>.

INFO:
- [Weather Info on Destination] is not available unless a destination is set for the route guidance.
- When a destination is not set, nearby weather information is displayed.

3. A weather information screen is displayed. Highlight [Forecast] and push <ENTER>.

4. The forecast screen is displayed. A three-day forecast can be confirmed for the preferred area.

5. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.
   To display the list for weather information:
   “Weather Information” (Alternate command mode)
Warnings and watches history
A list can be displayed for the warning/watch events detected around the current location. The detailed information of each event can also be displayed.

1. Highlight [Warnings and Watches History] and push <ENTER>. A list warning/watch events around the current location is displayed.

2. Highlight the event to check the detailed information and push <ENTER>.

3. A screen with detailed information of the event is displayed.

4. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Weather Map
The current weather map can be confirmed for the current location, the destination, the entire country or the preferred city.

1. Highlight [Weather Map] and push <ENTER>.

2. Highlight the preferred map area push <ENTER>.

INFO:
[Destination Map] is not available unless a destination is set for the route guidance.

3. A weather map is displayed. The weather and precipitation level are shown by colors.

4. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.
INFO:
Touch [Legend] to display the map legend.

Voice command
1. Push <TALK> located on the steering wheel switch.
2. After the tone sounds, speak a command.
To display the list for weather map: “Weather Map” (Alternate command mode)

Temperature Map
The current temperature map can be confirmed for the current location, the destination, the entire country or the preferred city.

1. Highlight [Temperature Map] and push <ENTER>.
2. Highlight the preferred map area and push <ENTER>.

INFO:
- [Destination Map] is not available unless a destination is set for the route guidance.
- When a destination is not set, a nearby weather map is displayed.

INFO:
Touch [Legend] to display the map legend.
Warnings Map
The current warning/watch information can be confirmed for the current location, the destination, the entire country or the preferred city.

1. Highlight [Warnings Map] and push <ENTER>.

2. Highlight the preferred map area and push <ENTER>.

INFO:
[Destination Map] is not available unless a destination is set for the route guidance.

3. A warning/watch map is displayed. Warning and watch information is shown by colors.

4. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

INFO:
Touch [Legend] to display the map legend.

Road Condition Map
The current road condition can be confirmed for the current location, the destination, the entire country or the preferred city.

1. Highlight [Road Condition Map] and push <ENTER>.
2. Highlight the preferred map area and push <ENTER>.

**INFO:**

[Destination Map] is not available unless a destination is set for the route guidance.

3. A road condition map is displayed. The road conditions are shown by colors.

4. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

**INFO:**

Touch [Legend] to display the map legend.

**DESTINATION WEATHER ON SUGGESTED ROUTE SCREEN**

On the screen of the suggested route after setting a destination, the current weather information around the destination is displayed via icons.

**Weather information icons**

**AUTOMATICALLY DISPLAY WARNINGS/WATCHES**

When an urgent warning/watch is detected around the current vehicle location, a message pops up automatically with a voice announcement.
The message includes the weather icon and text describing the event.

INFO:
- The pop-up messages and announcements can be set to on or off. See "Weather information settings" (page 7-17)
- If multiple warning/watch events are detected, they will be displayed in order starting with the one having the shortest linear distance from the vehicle.

Weather information settings
The settings can be confirmed and changed for the urgent weather information related functions.

1. Push <SETTING>.  
3. Highlight [Weather Info Setting] and push <ENTER>.  
4. Highlight the preferred setting and push <ENTER>. The indicator for the setting illuminates.

Available setting items:
- Display an Alert for Weather Warnings: Displays a message screen automatically when the system detects urgent warning information.
- Display an Alert for Weather Watches: Displays a message screen automatically when the system detects urgent watch information.
- Voice Announcements: Provides urgent information announcements for warnings and watches around the current location.

Viewing technical information 7-17
**INFO:**

- The “Other Watches” category in the “Other” category includes Inland Hurricane Watch, Hurricane Watch, Typhoon Watch, Tropical Storm Watch, Inland Tropical Storm Watch and Fire Weather Watch.

- The “Other Warnings” category in the “Other” category includes Dense Fog Warning, Freezing Fog Warning, Extreme Cold Warning, Frost Warning, Hydrologic Warning, Ashfall Warning, Air Stagnation Warning, Low Water Warning, Ice Accretion Warning, Dense Smoke Warning, Dense Smoke Advisory, Freezing Fog Advisory, Dense Fog Advisory, Ashfall Advisory and Air Stagnation Advisory.

**MAP UPDATE**

Map data can be updated.

1. Push <INFO>.

2. Highlight [Map Update] and push <ENTER>.

3. To update the map data, insert the map update DVD-ROMs.

4. Highlight [DVD Update] and push <ENTER>.

For the procedure of the map update, refer to the manual of the updated DVD-ROMs.

**INFO:**

- Refer to the vehicle Owner’s Manual for the location of the DVD slot.

- Do not eject the DVD-ROM while updating the map data. Doing so will result in an incomplete update.

- To order updated DVD-ROMs, contact your NISSAN dealer.

- Multiple DVD-ROMs are required to fully update the system. In addition, a Digital Rights Management (DRM) activation code is required to complete the installation. To purchase a map data for updating the navigation system and DRM code, please visit www.nissannavigation.com. You will need your Unit ID in order to purchase a map update.

**NOTE:**

In handling the DVD-ROM, be careful on the following points.

- Do not try to bend the DVD-ROM. Do not use any disk that is bent or cracked.

- Do not use any benzine, thinner, or antistatic spray on them.

- Do not put on any sticker or write anything on either surface.
If you need to clean it, do so with a soft cloth by wiping from the centre outward.

Do not use a DVD Laser Lens Cleaners as they may cause the DVD player to malfunction.

DISPLAY SETTINGS

This menu turns on and off the display, adjust the image quality of the navigation screen and change the color of the menu screen.

BASIC OPERATION

1. Push <SETTING>.
2. Highlight [Display] and push <ENTER>.
3. Highlight the preferred adjustment item and push <ENTER>.

Available setting items

- [Display Adjustment]
  Turn on and off the display and adjust the image quality of the navigation screen.

- [Color Theme]
  Set the color of the menu screen.

DISPLAY ADJUSTMENT

This menu turns on and off the display and adjusts the image quality of the navigation screen.

BASIC OPERATION

1. Highlight [Display Adjustment] and push <ENTER>.
2. Highlight the preferred adjustment item and push <ENTER>.
3. Use the multi-function controller to adjust to the preferred setting.
4. After setting, push <ENTER> or <BACK> to apply the setting.
5. Highlight <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Available setting items

- [Display]:
  Turn on or off the screen. “Display” (page 8-4)

- [Brightness]:
  Adjust the screen brightness. “Brightness” (page 8-4)

- [Contrast]:
  Adjust the screen contrast. “Contrast” (page 8-4)

- [Background Color]:
  Set the background color. “Background color” (page 8-4)
Display

To turn off the display, push <ENTER>. The display can also be turned off by pushing and holding <DAY/NIGHT OFF> for more than 2 seconds.

When any button is pushed with the display off, the display turns on. The display will automatically turn off when there is no switch operation for 5 seconds.

To turn on the display, push <DAY/NIGHT OFF>.

Brightness

Adjust the display brightness by rotating the center dial in the [+] or [-] direction on the multi-function controller. Each time [+] or [-] is pushed, the display brightness changes.

Contrast

Adjust the display contrast by rotating the center dial in the [+] or [-] direction on the multi-function controller. Each time [+] or [-] is pushed, the display contrast changes.

Background color

Select to toggle between the day screen and night screen.

Day screen

Night screen
INFO:
The background color setting can also be changed using <DAY/NIGHT OFF>.

SETTING COLOR THEME

1. Highlight [Color Theme] and push <ENTER>.

2. Highlight the preferred menu color and push <ENTER>.

NAVIGATION SETTING

The navigation system can be set in details to meet the preference.

BASIC OPERATION

1. Push <SETTING>.
3. Highlight the preferred setting item and push <ENTER>.

Available setting items

- [Address Book]: Store locations and routes, and edit the stored items. “Storing location” (page 5-5)
- [Map View]: Set the display method and the direction of the map. “Changing map view” (page 3-11)
- [Map Icons]: Set the map icons to display on the map.
- [Guidance Settings]: Set the various functions for the route guidance. “Guidance settings” (page 5-20)
- [Route Settings]: Change the routing preferences. “Detailed route settings” (page 5-24)
- [Traffic Info Settings]: Set the various functions of the NavTraffic information system. “Traffic information settings” (page 7-8)
- [Weather Info Setting]: Set the functions of the NavWeatherXM information system. “Weather information settings” (page 7-17)
- [Speed Limit Info]: Display speed limit information. “Speed limit indication on map” (page 8-6)
- [Others]: Display other setting items. “Other navigation settings” (page 8-6)
- **[Delete Stored Items]**: Delete stored locations and the home setting in the Address Book.
  “Delete stored items” (page 8-9)

- **[Delete All Previous Destinations]**: Delete all previous destinations.
  “Delete stored items” (page 8-9)

- **[Delete Previous Starting Point]**: Delete all previous starting points.
  “Delete stored items” (page 8-9)

- **[Reset all Navigation Settings to Default]**: Reset all of the settings to default.
  “Reset all navigation settings to default” (page 8-10)

**SPEED LIMIT INDICATION ON MAP**

Turn the [Speed Limit Info] display on or off.

1. Highlight [Speed Limit Info] and push <ENTER>.

2. Highlight [Speed Limit Indication on Map] to toggle the function between on and off. The indicator light illuminates when the speed limit display function is set to on.

**OTHER NAVIGATION SETTINGS**

**Basic Operation**

1. Push <SETTING>.

3. Highlight [Others] and push <ENTER>.

4. Highlight the preferred setting item and push <ENTER>.

**Available Setting Items**

- **[Audio Display on Map]**: Allows the audio information to be displayed at all times.
  “Displaying audio information on map screen” (page 8-7)

- **[Small Step Zoom by Dial]**: Sets the free zoom function on or off. When this setting is on, it is possible to adjust the scale in smaller steps than with normal scale adjustment.

- **[Map Scrolling Information]**: Sets the system so that when the map scrolls the information about the location aligned at the center of the cross pointer is displayed.
  “Map scrolling information” (page 3-18)

- **[Customize Nearby Places]**: Set the category of frequently visited landmarks.
  “Customizing Nearby Places” (page 8-7)
- **[Keyboard Type]**:
  Switches the keyboard layout for the character input screen.
  \[\text{“Settings keyboard layout of character input screen” (page 8-8)}\]

- **[North Up when Zoom Out]**:
  When this setting is ON, the orientation of the map is automatically changed to North Up when the widest map scale is selected. The orientation is changed to North Up even when Heading Up is set.

- **[Adjust Current Location]**:
  Corrects the position of the current location.
  \[\text{“Adjusting current vehicle location” (page 8-8)}\]

**Displaying audio information on map screen**

The operating status of audio functions can be displayed on the map screen.

1. Highlight [Others] and push <ENTER>.
2. Highlight [Audio Display on Map] and push <ENTER>. The indicator illuminates when the item is set.
3. Push <MAP> to return to the current location map screen.
4. On the bottom of the map screen, the operating status of an audio/visual function is displayed at all times.

**Customizing Nearby Places**

The modified list of places of interest can be used for searching for a location using [Places].

\[\text{“Searching for destinations” (page 2-16)}\]

1. Highlight [Others] and push <ENTER>.
2. Highlight [Customize Nearby Places] and push <ENTER>.
3. Highlight the preferred item and push <ENTER>. The main category list is displayed.
4. Highlight a main category and push <ENTER>. The sub category list is displayed. Highlight [Category Search] and push <ENTER>. The preferred category can also be input directly.

5. Highlight a sub category and push <ENTER>. The category setting is modified.

6. Push <MAP> to return to the current location map screen.

Settings keyboard layout of character input screen
Depending on the user's preference for the keyboard layout of character input screen, the ABC layout or QWERTY layout can be selected.

Example: Switching to the QWERTY layout

1. Highlight [Others] and push <ENTER>.
2. Highlight [Keyboard Type] and push <ENTER>.
3. Highlight [QWERTY] and push <ENTER>. The indicator illuminates when the item is set.

4. Push <MAP> to return to the current location map screen.

Adjusting current vehicle location
If the vehicle icon indicating the current vehicle location is not in the correct position, the location of the vehicle icon on the map screen can be adjusted.
INFO:

- Regardless of the map view setting, the map is displayed in Plan View when adjusting the position of the vehicle icon.
- When correcting the position of the vehicle icon, the map is automatically displayed in the North Up mode. After finishing the correction, the map restores the current orientation setting.
- The position and direction of the vehicle icon may be misaligned depending on the external conditions and environment.
- If the vehicle icon is misaligned, drive for a while in a location where the GPS signals can be received. This may correct the position of the vehicle icon.

1. Highlight [Others] and push <ENTER>.
2. Highlight [Adjust Current Location] and push <ENTER>. The current location map screen is displayed.
3. Adjust the position of the vehicle icon. After adjusting the position of the vehicle icon, push <ENTER>.
4. Adjust the direction of the vehicle icon. After adjusting the direction of the vehicle icon, push <ENTER>.
5. A message is displayed, and the adjusted vehicle location is stored.

DELETE STORED ITEMS
Delete stored item from setting screen.

Basic operation
2. Highlight the preferred item that you want to delete and push <ENTER>.
Available items

- [Delete Stored Items]: Delete the stored location and home.
- [Delete All Previous Destinations]: Delete all previous destinations.
- [Delete Previous Start Point]: Delete all previous start point.

RESET ALL NAVIGATION SETTINGS TO DEFAULT
This restores various settings (display, volume level, etc.) to the default settings.

INFO:
The memory contents, such as the stored locations, will not be deleted.

2. Highlight [Reset All Navigation Settings to Default] and push <ENTER>.
3. A confirmation message is displayed. Confirm the contents of the message, highlight [Yes] and push <ENTER>.

VOLUME ADJUSTMENT

This turns on and off, as well as adjusts, the phone function (ringer, incoming and outgoing volume), the voice guide function and the beep function.

BASIC OPERATION

1. Push <SETTING>.
2. Highlight [Volume & Beeps] and push <ENTER>.
3. Highlight the preferred adjustment item and push <ENTER>.
4. Use the multi-function controller to adjust the volume. Push <ENTER> to set to on or off.
5. After setting, push <ENTER> or <BACK> to apply the setting.
6. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.
Setting items

- **[Audio Volume]:** Adjust the volume level of the audio system by pushing the main directional buttons or rotating the center dial in the direction of [+][-].

- **[Guidance Volume]:** Adjust the volume level of voice guidance by pushing the main directional buttons or rotating the center dial in the direction of [+][-].

- **[Ringtone]:** Adjust the volume level of the ringtone by pushing the main directional buttons or rotating the center dial in the direction of [+][-].

- **[Incoming Call]:** Adjust the incoming call volume by pushing the main directional buttons or rotating the center dial in the direction of [+][-].

- **[Outgoing Call]:** Adjust the outgoing call volume by pushing the main directional buttons or rotating the center dial in the direction of [+][-].

- **[Switch Beeps]:** Select to toggle the beep function between on and off. The indicator light illuminates when the beep function is set to on. The beep sounds when pushing and holding a button or when a prohibited operation is performed.

- **[Guidance Voice]:** Select to toggle the voice guidance function between on and off. The indicator light illuminates when the voice guidance function is set to on.

INFO:
For more details about [Ringtone], [Incoming Call] and [Outgoing Call], refer to the vehicle Owner's Manual.

CLOCK SETTINGS

This changes the clock settings.

BASIC OPERATION

1. Push <SETTING>.
2. Highlight [Clock] and push <ENTER>.
3. Highlight the preferred adjustment item and push <ENTER>.
4. Use the multi-function controller to adjust to the preferred setting. Push <ENTER> to set on or off.
5. After setting, push <ENTER> or <BACK> to apply the setting.
6. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Setting items

- **[On-screen Clock]:** Select to toggle the clock display located in the top right corner of the display between on and off. The indicator light illuminates when the clock display is set to on.
Clock display is set to on.

- **[Clock Format (24h)]**: Select the clock format between 12-hour and 24-hour times. The indicator light illuminates when the clock is set to the 24-hour format.
- **[Offset (hour)]**: Use the main directional buttons or the center dial to adjust the offset value (between −12 and +12).
- **[Offset (min)]**: Use the main directional buttons or the center dial to adjust the offset value (between −59 and +59).
- **[Daylight Savings Time]**: Select to toggle the daylight savings time setting between on and off. The indicator light illuminates when the daylight savings time setting is set to on.
- **[Time Zone]**: Select an appropriate time zone from the list that appears when this item is highlighted.
  - Pacific
  - Mountain
  - Central
  - Eastern
  - Atlantic
  - Newfoundland
  - Hawaii
  - Alaska

This changes the language and measurement unit used in the system.

**LANGUAGE SETTINGS**

1. Push **<SETTING>**.
2. Highlight [Others] and push **<ENTER>**.
3. Highlight [Language & Units] and push **<ENTER>**.
4. Highlight [Select Language] and push **<ENTER>**.
5. Highlight the preferred setting item and push <ENTER>. The indicator light of the selected item illuminates.

Available languages:
- [English]
- [Français]
- [Español]

**NOTE:**
Do not change the ignition switch position while changing the language. Doing so may cause a system malfunction.

---

**UNIT SETTINGS**

1. Push <SETTING>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Language & Units] and push <ENTER>.
4. Highlight [Select Units] and push <ENTER>.
5. Highlight the preferred unit and push <ENTER>. The indicator light of the selected unit illuminates.

**Available units:**
- **US:** mile, MPH, °F, MPG
- **Metric:** km, km/h, °C, L/100 km

6. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

Voice command examples ....................................... 9-23
NISSAN Voice Recognition allows hands-free operation of the navigation system and other systems equipped on this vehicle, in one of two modes, Standard Mode or Alternate Command Mode. Standard Mode allows the operation of Navigation, Phone, Audio, Information and Help.

The commands that are available are always shown on the display and announced by the system. To perform operations, simply follow the prompts given by the system. In Standard Mode, hands-free operation of Change map view, Route selection and Bluetooth Audio, etc. is not available through Voice Recognition.

Alternate Command Mode allows advanced operations. When this mode is active, an expanded list of commands can be spoken after pushing <TALK >, and the voice command menu prompts are turned off. Note that in this mode the recognition success rate may be affected because the number of available commands and ways of speaking each command are increased. Otherwise, it is recommended that Alternate Command Mode be turned OFF and Standard Mode be used for the best recognition performance.

- To improve recognition success when Alternate Command Mode is active, try using the Speaker Adaptation function available in that mode. "Speaker adaptation" (page 9-21)
- Otherwise, it is recommended that Alternate Command Mode be turned OFF and Standard Mode be used for the best recognition performance.
- For the voice commands for the audio, phone and other systems, refer to the vehicle Owner’s Manual. The following sections refer only to the navigation, phone and information systems.
- The voice recognition system cannot be operated when the soft top is not closed (for Roadster models).
CONFIRMING HOW TO USE VOICE COMMANDS

When operating the voice recognition system for the first time or if help is preferred to use the system, the User Guide can be displayed. It is possible to confirm how to use voice commands by accessing a simplified User Guide, which contains basic instructions and tutorials for several voice commands.

Basic operation
1. Push <INFO>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.
5. Highlight the preferred item and push <ENTER>.

Available items:
- [Getting Started]: Describes the basics of how to operate the voice recognition system.
- [Let's Practice]: Mode for practice following the system voice.
- [Using the Address Book]: Tutorial for entering a destination by the Address Book.
- [Finding a Street Address]: Tutorial for entering a destination by street address.
- [Placing Calls]: Tutorial for making a phone call by voice command operation. Refer to the vehicle Owner’s Manual for details.
- [Help on Speaking]: Displays useful tips regarding speaking for correct command recognition by the system.

INFO:
The Command List feature is only available when Alternate Command Mode is active.

Getting Started
Before using the voice recognition system for the first time, it is possible to confirm how to use commands by viewing the Getting Started section of the User Guide.

1. Highlight [Getting Started] and push <ENTER>.
2. To confirm the page, scroll the screen using the multi-function controller.

Practicing voice commands
Practice for using the voice recognition function can be performed by repeating a phone number after the system announces it.
1. Highlight [Let’s Practice] and push <ENTER>.
2. Practice voice commands in accordance with the audio guidance.

Tutorials on operation of voice recognition system
When highlighting [Using the Address Book], [Finding a Street Address] or [Placing Calls] and pushing <ENTER>, the system displays tutorials on how to perform these operations using voice recognition.

Useful tips for correct operation
It is possible to display useful speaking information that may help the system to accept a voice command correctly.

1. Highlight [Help on Speaking] and push <ENTER>.
2. To confirm the page, scroll the screen using the multi-function controller.

USING THE SYSTEM
Initialization
When the ignition switch is pushed to the ON position, Voice Recognition is initialized, which may take up to one minute. When completed, the system is ready to accept voice commands. If <TALK> is pushed before the initialization completes, the display will show the message: “System not ready”.

BEFORE STARTING
To get the best recognition performance from Voice Recognition, observe the following items.
- The interior of the vehicle should be as quiet as possible. Close the windows to eliminate the surrounding noises (traffic noise and vibration sounds, etc.), which may prevent the system from correctly recognizing the voice commands.
- Wait until the tone sounds before speaking a command.
- Speak in a natural conversational voice without pausing between words.
- If the air conditioner is set to “Auto”, the fan speed is automatically lowered so that voice commands can be recognized more easily.

GIVING VOICE COMMANDS
1. Push <TALK> located on the steering wheel.
2. A list of commands appears on the screen, and the system provides the voice menu prompt.
3. After the tone sounds and the icon on the screen changes from [ ] to [ ], speak a command.
4. Continue to follow the voice menu prompts and speak after the tone sounds until the preferred operation is completed.

Operating tips
- Speak a command after the tone.
- Commands that are available are always shown on the display and spoken through voice menu prompts. Commands other than those that are displayed are not accepted. Follow the prompts given by the system.
- If the command is not accepted, the system announces, “Please say again”. Repeat the command in a clear voice.
- Push <BACK> once to return to the previous screen.
- To cancel the command, push and hold <TALK >. The message, “Voice canceled” will be announced.

Voice Prompt Interrupt:
In most cases you can interrupt the voice feedback to speak the next command by pushing <TALK > on the steering wheel. After interrupting the system, wait for a beep before speaking your command.

How to speak numbers
NISSAN Voice Recognition requires a certain way to speak numbers when giving voice commands. Refer to the following examples.

**General rule:**
Only single digits 0 (zero) to 9 can be used. (For example, if speaking 500, “five zero zero” can be used, but “five hundred” cannot.

**Examples:**
1-800-662-6200
“One eight zero zero six six two six two zero zero”

Improving Recognition of Phone numbers:
Recognition of phone numbers can be improved by saying the phone number in 3 groups of numbers. For example, to call 800-662-6200, say “Eight Zero Zero” first, and the system will then ask to speak the next three digits. Then, say “Six Six Two”. After recognition, the system will then ask to speak the last 4 digits. Say, “Six Two Zero Zero”. Using this method of phone digit entry can improve recognition performance.

INFO:
For best recognition, speak “zero” for the number “0” and “oh” for the letter “o”. 
Command List

</table>

### INFO:
Refer to the vehicle Owner’s Manual for the operations related to phone, information and audio.

### VOICE COMMAND EXAMPLES
To use the voice recognition function, speaking one command is sometimes sufficient, but at other times it is necessary to speak two or more commands. As examples, some additional basic operations that can be performed by voice commands are described here.

**Example 1: Placing a call to the phone number 800-662-6200**

1. Push `<TALK>` located on the steering wheel. You will hear a prompt.
2. Speak “Phone”.
3. Speak “Dial Number”.
4. Speak “800”.
5. The system announces, “Please say next three digits or dial, or say change number”. Speak “662”.
6. The system announces, “Please say last four digits or say change number”. Speak “6200”.

---

9-8  Voice recognition
7. The system announces, “Dial or Change Number?”. Speak “Dial”.

8. The system makes a call to 800-662-6200.

INFO:
- Speaking “800-662-6200” (10 continuous digits) or “662-6200” (7 continuous digits) is acceptable, if the area code is not necessary. However the 3-3-4 digit grouping is recommended for improved recognition.

“How to speak numbers” (page 9-20)
- The NISSAN voice recognition system is not limited to recognizing phone numbers of only 7 or 10 digits. To dial a number in a format other than the 3-3-4 digit grouping, use the “International Call” command.
- If “Change Number” is spoken during phone number entry, the system will automatically request that the number be repeated using the 3-3-4 format. In this case please say the area code first and then follow the prompts.
- Do not add a “1” in front of the area code when speaking phone numbers.
- If the system does not recognize a voice command, please try repeating the command using a natural voice. Speaking too slowly or too loudly may further decrease recognition performance.

Example 2: Placing an international call to the phone number 011-81-111-222-3333
1. Push <TALK> located on the steering wheel. You will hear a prompt.

2. Speak “Phone”.

3. Speak “International Call”.

4. Speak “01181111222333”.

Voice recognition 9-9
5. Speak “Dial”.

6. The system makes a call to 011-81-111-222-3333.

INFO:
Any digit input format is available in the International Number input process.

Example 3: Setting a destination by a street address
1. Push <TALK> located on the steering wheel. You will hear a prompt.
2. Speak “Navigation”.

3. Speak “Address”.

INFO:
Push <ENTER> or touch [Help] to display the user guide screen.

4. Speak the name of the state, “California”.

5. Speak the name of the city, “Gardena”.

6. Voice feedback will be provided when the command is accepted, and the list of city names is displayed.

7. After the tone sounds and the icon on the screen changes again, speak “One”.

9-10 Voice recognition
8. Speak the name of the street, “South Figueroa street”.

INFO:
- Only the official street names stored in the map database can be recognized by the system. To improve accuracy, speak the street name precisely and include Boulevard, Way, North, South, etc., if known. If unsure of the full name, speaking only part of the street name such as “Figueroa” is acceptable, but recognition accuracy may be reduced.
- To correct the entered city, street or house number, speak “Change City”, “Change Street” or “Change House Number”.

9. Voice feedback will be provided when the command is accepted, and the list of street names appears.

10. After the tone sounds and the icon on the screen changes again, speak “One”.

11. Speak the house number. *(page 9-5)*

12. To confirm the destination location on the map, speak “Show map”. To calculate a route, speak “Calculate route”.

INFO:
If the house number is unknown, speak “No house number”.

![Voice Recognition Address](image)
ALTERNATE COMMAND MODE

The following section is applicable when Alternate Command Mode is active.

“Setting alternate command mode” (page 9-21)

When Alternate Command Mode is active, an expanded list of commands can be used after pushing <TALK >. In this mode, available commands are not fully shown on the display or prompted. Review the expanded command list, available when this mode is active. See examples of Alternate Command Mode screens. Otherwise, it is recommended that Alternate Command Mode be turned OFF and Standard Mode be used for the best recognition performance.

“Confirming voice commands” (page 9-12)

DISPLAYING HOW TO OPERATE VOICE RECOGNITION SYSTEM

When operating the voice recognition system for the first time or if help is preferred to use the system, the Command List (available only in Alternate Command Mode) or the User Guide are available.

INFO:
The Command List feature is only available when Alternate Command Mode is active.

Confirming voice commands

When controlling the system by voice commands for the first time or if an appropriate voice command is unknown, confirm using the voice command lists. The following information describes how to display the navigation command list and the help list. For information about the operations of other functions, refer to the vehicle Owner’s Manual.

Example: Displaying the navigation command list:

1. Push <INFO>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.
4. Highlight the preferred item and push <ENTER>.

Available items:

- [Command List]: A list of voice commands that the system can accept is displayed.
- [User Guide]: A simplified operation manual of the voice recognition system can be displayed and how to use the voice commands can be confirmed.

Basic operation

1. Push <INFO>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.
4. Highlight the preferred item and push <ENTER>.
4. Highlight [Command List] and push <ENTER>.

5. Highlight the preferred item and push <ENTER>.

   Available items:
   - Phone Commands
   - Navigation Commands
   - Information Commands
   - Audio Commands
   - Help Commands

6. To confirm the list, scroll the screen using the multi-function controller.

7. Push <BACK> to return to the previous screen.
## Command List

### Navigation Command:

**INFO:**

The words in *italics* are variable.

<table>
<thead>
<tr>

CONFIRMING HOW TO USE VOICE COMMANDS
It is possible to confirm how to use voice commands by accessing a simplified User Guide, which contains basic instructions and tutorials for several voice commands.

Available items:
- [Getting Started]:
  Describes the basics of how to operate the voice recognition system.
- [Let’s Practice]:
  Mode for practice following the system voice.
- [Using the Address Book]:
  Tutorial for setting a destination by the Address Book.
- [Finding a Street Address]:
  Tutorial for entering a destination by street address.
- [Placing Calls]:
  Tutorial for marking a phone call by voice command operation.
- [Help on Speaking]:
  Displays the useful tips of speaking for correct command recognition by the system.
- [Voice Recognition Settings]:
  Describes the available voice recognition settings.
- [Adapting the System to Your Voice]:
  Tutorial adapting the system to the user’s voice.

Getting started
Before using the voice recognition system for the first time, it is possible to confirm how to use commands by viewing the Getting Started section of the User Guide.

1. Highlight [Getting Started] and push <ENTER>.
2. To confirm the page, scroll the screen using the multi-function controller.

Practicing voice commands
Practice for using the voice recognition function can be performed by repeating a phrase after the system announces it.

Basic operation
1. Push <INFO>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.
5. Highlight the preferred item and push <ENTER>.
1. Highlight [Let’s Practice] and push <ENTER>.
2. Practice voice commands in accordance with the audio guidance.

Tutorials on operation of voice recognition system
When highlighting [Using the Address Book], [Finding a Street Address] or [Placing Calls] and pushing <ENTER>, the system displays tutorials on how to perform these operations using voice recognition.
Example: With [Using the Address Book] highlighted

1. Highlight [Using the Address Book] and push <ENTER>. The tutorial starts.
2. The voice guide demonstrates how to speak when giving commands.
3. When the tutorial is completed, the system automatically switches to the Menu screen.

Useful tips for correct operation
It is possible to display useful speaking tips that may help the system to accept a voice command correctly.

1. Highlight [Help on Speaking] and push <ENTER>.
2. To confirm the page, scroll the screen using the multi-function controller.

Voice recognition settings
The settings for easy operation of the voice recognition system are displayed.
1. Highlight [Voice Recognition Settings] and push <ENTER>.
2. To confirm the page, scroll the screen using the multi-function controller.

Adapting System to Your Voice
The voice recognition system is equipped with a learning function to adapt to the user's voice for better recognition. It is possible to confirm how to operate the learning function through this tutorial.

2. The voice guide demonstrates the steps that have to be performed.
3. When the tutorial is completed, the system automatically switches to the Menu screen.

USING THE SYSTEM

Initialization
When the ignition switch is pushed to the ON position, Voice Recognition is initialized, which may take up to one minute. When completed, the system is ready to accept voice commands. If <TALK> is pushed before the initialization completes, the display will show the message: “System not ready”.

BEFORE STARTING
To get the best recognition performance out of Voice Recognition, observe the following:

- The interior of the vehicle should be as quiet as possible. Close the windows to eliminate the surrounding noises (traffic noise and vibration sounds, etc.), which may prevent the system from correctly recognizing the voice commands.
- Wait until the tone sounds before speaking a command.
- Speak in a natural conversational voice without pausing between words.
- If the air conditioner is set to “Auto”, the fan speed is automatically lowered so that voice commands can be recognized more easily.
- The voice recognition system cannot be operated when the soft top is not closed (for Roadster models).

GIVING VOICE COMMANDS
1. Push <TALK> located on the steering wheel.
2. A list of commands appears on the screen, and the system announces, “Please say a command”.
3. After the tone sounds and the icon on the screen changes from [ ] to [ ], speak a command.
Operating tips

- If the command is not recognized, the system announces, “Please say again”. Repeat the command in a clear voice.
- Push <BACK> once to return to the previous screen.
- To cancel the command, push and hold <TALK >. The message, “Voice canceled” will be announced.

Voice Prompt Interrupt:

In most cases you can interrupt the voice feedback to speak the next command by pushing <TALK > on the steering wheel. After interrupting the system, wait for a beep before speaking your command.

How to speak numbers

NISSAN Voice Recognition requires a certain way to speak numbers when giving voice commands. Refer to the following examples.

General rule:

Only single digits 0 (zero) to 9 can be used. For example, to say 500, “five zero zero” can be used, but “five hundred” cannot.

Examples:

1-800-662-6200
“One eight zero zero six six two six two zero zero”

Improving Recognition of Phone numbers:

Recognition of phone numbers can be improved by saying the phone number in 3 groups of numbers. For example, to call 800-662-6200, speak “Eight Zero Zero” first, and the system will then ask to speak the next three digits. Then, say “Six Six Two”. After recognition, the system will then ask to speak the last 4 digits. Say, “Six Two Zero Zero”. Using this method of phone digit entry can improve recognition performance.

INFO:

For best recognition, speak “zero” for the number “0” and “oh” for the letter “o”.

SYSTEM FEEDBACK ANNOUNCEMENT MODES

It is possible to select two modes, long or short, for the announcement by the system.

How to set

1. Push <SETTING>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.
4. Highlight [Minimize Voice Feedback] and push <ENTER>. The indicator illuminates, and the system announcement mode switches to the short mode.

5. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

SETTING ALTERNATE COMMAND MODE

This mode enables the operation of the display and audio through Voice Recognition. When this mode is active, an expanded list of commands can be spoken after pushing <TALK >, and the voice command menu prompts are turned off. Note that in this mode the recognition success rate may be affected because the number of available commands and ways of speaking each command are increased.

This mode can be turned on or off.

How to set
1. Push <SETTING>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.

4. Highlight [Alternate Command Mode] and push <ENTER>. A confirmation message is displayed. Highlight [Yes] and push <ENTER>. The indicator illuminates, and Alternate Command Mode switches to ON.

5. Push <BACK> to return to the previous screen. Push <MAP> to return to the current location map screen.

SPEAKER ADAPTATION

The voice recognition system has a function to learn the user’s voice for better voice recognition performance. The system can memorize the voices of up to three persons.

Having the system learn the user’s voice
1. Push <SETTING>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.

4. Highlight [Speaker Adaptation] and push <ENTER>.

5. Highlight the user whose voice is memorized by the system, and push <ENTER>.
6. Highlight [Start Speaker Adaptation Learning] and push <ENTER>.

7. Highlight the voice command category to be learned by the system, and push <ENTER>. The voice command category list is displayed.

8. Highlight the voice command to be learned by the system, and push <ENTER>. The voice recognition system starts.

9. The system announces, “Please say a command”.

10. After the tone sounds and the icon on the screen changes from [ ] to [ ], speak a command.

11. When the system has recognized the voice command, the voice of the user is learned. Push <BACK> once to return to the previous screen.

INFO:
With [Continuous Learning] set to on, the system does not go back to the command list screen, allowing to continue voice command learning by the system.

12. If the system has learned the command correctly, “None” will change to “Stored”.

Editing registered items
It is possible to edit user names and select learning function settings.
1. Push <SETTING>.
2. Highlight [Others] and push <ENTER>.
3. Highlight [Voice Recognition] and push <ENTER>.

4. Highlight [Speaker Adaptation] and push <ENTER>.

5. Highlight a user to edit, and push <ENTER>.

6. Highlight [Setting] and push <ENTER>.

7. Highlight an item to edit, and push <ENTER>.

Setting items
- [Edit User Name]: Edit the user name.
- [Delete Voice Data]: Reset the user voice that the voice recognition system has learned.
- [Continuous Learning]: Have the system learn the voice commands of the user in succession, without selecting commands one by one.

VOICE COMMAND EXAMPLES
To use the voice recognition function, speaking one command is sometimes sufficient, but at other times it is necessary to speak two or more commands. As examples, some additional basic operations by voice commands are described here.

Example 1: Switching the map to 2D (Plan View) mode
1. Push <TALK > located on the steering wheel.
2. The system announces, “Please say a command”.
3. After the tone sounds and the icon on the screen changes from [ ] to [ ], speak “Plan View Map”.

VOICERECOGNITION 9-23
4. Voice feedback will be provided when the command is accepted, and the map is displayed in 2D (Plan View).

Example 2: Setting a destination using places list
1. Push <TALK> located on the steering wheel switch.
2. The system announces, “Please say a command”.
3. After the tone sounds and the icon on the screen changes from [ ] to [ ], speak “Places”.
4. If a route is already set, choose “Near Current Location”, “Along Route” or “Near Destination”.
5. After the tone sounds and the icon on the screen changes again, speak “Along Route”.
6. Voice feedback will be provided when the command is accepted, and the list of places of interest categories appears.
7. After the tone sounds and the icon on the screen changes again, speak “Two”.
8. Voice feedback will be provided when the command is accepted, and the list of places of interest in the category specified in the previous step appears.
9. After the tone sounds and the icon on the screen changes again, speak “One”.
10. Voice feedback will be provided when the command is accepted, and the system starts calculating a route to the selected facility.

Example 3: Setting a destination by a street address
1. Push <TALK> located on the steering wheel switch.
2. The system announces, “Please say a command”.

Voice recognition
3. Speak “Address”.

4. Speak the name of the state, “California”.

5. Speak the name of the city, “Gardena”.

6. Speak the name of the street, “South Figueroa street”.

INFO:
Speak the street name precisely including boulevard, way, north, south, etc. In Alternate Command Mode, the system does not recognize abbreviated names when they are spoken. In this case, the system does not accept “Figueroa street” or “Figueroa”.

7. Voice feedback will be provided when the command is accepted, and the list of street names appears.

8. After the tone sounds and the icon on the screen changes again, speak “One”.

9. Speak the house number.

INFO: “How to speak numbers” (page 9-20)

INFO:
If the house number is unknown, speak “No house number”.
10. To confirm the destination location on the map, speak “Show map”. To calculate a route, speak “Calculate route”.

ROUTE GUIDANCE
The main features of the NISSAN Navigation System are visual guidance and voice guidance in selected map coverage areas. Utilizing a network of GPS (Global Positioning System) satellites, the NISSAN Navigation System tracks the location on the map and navigates to a preferred location.

Once the destination is set in a map coverage area, the NISSAN Navigation System will calculate a route from the current location to the destination. The real-time map display and turn-by-turn voice guidance leads the driver along the route. These features can be especially helpful when driving to unfamiliar locations.

The system may be unable to set a destination and/or calculate a route when the destination is outside the map coverage area. Additionally, voice guidance may not be available if the destination is outside the map coverage area. For more information on how to set a destination, refer to section 4.

PLACES OF INTEREST (PLACES) DIRECTORY
The NISSAN Navigation System offers an extensive places of interest (Places) directory in map coverage areas. This directory includes a wide variety of destinations ranging from gas stations, ATMs, and restaurants to casinos, ski resorts, shopping centers and businesses. A point of interest can be searched by category, name or phone number. After selecting a destination, the NISSAN Navigation System will calculate a route to that destination.

The Places directory has many uses. For example, the directory can be sorted by the various types of restaurants near the current location. If an ATM or gas station is needed, the NISSAN Navigation System can navigate to the closest preferred location.

For more information on how to use the Places directory, refer to section 4.

ADDRESS BOOK
The Address Book can store up to 300 locations from map coverage areas into a personal directory. This is especially useful for frequently visited locations, such as clients, relatives and friends. The Address Book function allows easy access to frequently visited locations when setting them as your destination.

For more information on how to use the Address Book, refer to section 6.

AVOID AREA
The Avoid Area function sets areas or freeways that the NISSAN Navigation System does not include in the suggested route when calculating routes. For example, if a freeway or area that is always congested with traffic.

For more information on the Avoid Area function, refer to section 6.

NavTraffic INFORMATION
When available, the NavTraffic Information broadcast may help to avoid delays due to traffic incidents. Traffic jams, roadwork, closed roads around the current location, etc. are represented graphically on the map by icons depicting the nature of the event. Incidents on the route are automatically brought to the attention when they are approached.

The NavTraffic Information feature, via the guidance mode, may help to detour around traffic problems. For more information on the NavTraffic Information feature, refer to section 5.

AUTOMATIC REROUTE
When detecting a deviation from the suggested route, the NISSAN Navigation System will automatically recalculate a new route to the destination.

For more information on the Automatic...
reroute function, refer to section 5.

DETOUR
To make a detour due to traffic conditions, the Detour function calculates an alternative route. The NISSAN Navigation System can calculate a route using secondary roads that will return to primary roads after a specified number of miles. For more information on the Detour function, refer to section 5.

Birdview™

Two map types, the 2D (Plan View) map and Birdview™ (3D) map, are available in the NISSAN Navigation System. Birdview™ map displays the map from an elevated perspective. In Birdview™ map, it is easy to recognize an image of the route because it provides a panoramic view over a long distance. For more information on Birdview™ map, refer to section 3.

VOICE GUIDANCE

Route guidance is provided through voice and visual instructions. Voice guidance announces the appropriate directions when approaching an intersection to turn. For more information on voice guidance, refer to section 5.

CURRENT VEHICLE LOCATION

DISPLAY OF CURRENT VEHICLE LOCATION
This navigation system combines the data obtained from the vehicle (by gyro sensor) and from GPS (Global Positioning System) satellites to calculate the current location of the vehicle. This position is then displayed throughout route guidance to a destination.

WHAT IS GPS (Global Positioning System)?
GPS is a position detecting system that uses satellites deployed by the U.S. government. This navigation system receives radio signals from three or more different satellites that orbit 13,049 miles (21,000 km) above the earth in space, and detects the position of the vehicle by utilizing the principle of triangulation.

Positioning adjustment
When the system judges that the vehicle position information is not accurate based on vehicle speed and gyro sensor data calculations, the system will automatically adjust the position of the vehicle icon using GPS signals.
Receiving signals from GPS satellites
The reception of GPS signals can be weak, depending on the environment. Vehicles in the following areas/environments may not receive GPS signals (indicator color: gray).

- Inside tunnels or parking garages
- Areas with numerous tall buildings
- Under multi-layered highways
- Under many large trees
- In a canyon
**INFO:**
The GPS antenna is located on the instrument panel inside the vehicle. Do not place any objects, especially mobile phones or transceivers, on the instrument panel. Because the strength of the GPS signal is approximately one billionth of that of TV waves, phones and transceivers will affect or may totally disrupt the signal.

**Display of GPS information**
GPS information can be displayed. ["Viewing GPS current location information" (page 7-19)]

**NOTE:**
Route guidance provided by the navigation system does not take carpool lane driving into consideration, especially when carpool lanes are separated from other road lanes.

**INCORRECT DISPLAY OF VEHICLE POSITION**
The following cases may affect the display accuracy of the vehicle's position or traveling direction. The accuracy will return to normal if the driving conditions return to normal.

- When there is a similar road nearby.
- When the vehicle is traveling in an area with a grid pattern road system.
- When the vehicle is passing through a large Y-shaped intersection/junction.
- When the vehicle is traveling on a continuous, slowly curving road.
- When the vehicle is traveling on a road with repeating S-shaped curves.
- When the vehicle is on a loop bridge.
- When the vehicle is on a snow-covered or unpaved road.
- When repeatedly turning left or right, or driving in zigzags.
- When the vehicle is rotated on a parking lot turntable while the ignition switch is off.
- When driving on a road not displayed on the map screen or a road that has been changed due to additional construction or other reasons.
When the GPS positioning accuracy is low.

**INFO:**

- The vehicle icon may be misaligned when starting the vehicle just after starting the engine.
- The vehicle icon may also be misaligned if different sized tires or tire chains are installed.
- The system has a function that automatically corrects the vehicle icon position when it is misaligned from the actual position.
- Vehicle position correction by GPS may not function when the vehicle is stopped.

- If the vehicle icon position does not return to normal even after driving for a while, correct the vehicle icon position manually.

  “Adjusting current vehicle location” (page 8-8)

**DETAILED MAP COVERAGE AREAS (MCA) FOR NAVIGATION SYSTEM**

This system is designed to help guiding to the destination, and it also performs other functions as outlined in this manual. However, the system must be used safely and properly. Information concerning road conditions, traffic signs and the availability of services may not always be up-to-date. The system is not a substitute for safe, proper and legal driving.

Map data covers select metropolitan areas in the United States and Canada. Map data includes two types of areas: “Detailed coverage areas” providing all detailed road data and other areas showing “Main roads only.”

**NOTE:**

Detailed map data is not available in many areas and is generally limited to select major metropolitan areas.

**WHEN GRAY ROAD IS DISPLAYED ON MAP**

- When you are driving on a road displayed in gray after the vehicle has deviated from the suggested route during route guidance, automatic rerouting may not start immediately.
- The navigation system does not provide route guidance for roads displayed in dark green. Therefore, if the destination is set on a road displayed in dark green, the enlarged map display will return to the ordinary map screen at some point on a suggested route that is near the destination. Also, voice guidance will stop at some point on a suggested route that is near the destination.
- Places information and street names near roads displayed in gray may not be contained in the map data.
ROUTE CALCULATION

- There may be cases that carpool lanes are included on a suggested route when the automatic rerouting function is activated, even if the “Use Time Restricted Roads” is turned off. See “Setting conditions for route calculation” (page 5-23).
- The navigation system does not provide route guidance for roads displayed in dark green.
- If the destination is set on a dark green road, the enlarged map display will switch to the ordinary map screen at some point and suggest a route that is near the destination. The distance and direction to the endpoint of the suggested route will be displayed in the lower right corner of the screen. Also, at this time, voice guidance will announce, “The route to the destination includes roads through incomplete map areas. Voice guidance will not be provided in these areas”.
- When approaching the endpoint of the suggested route, voice guidance will announce, “Entering the road with incomplete map data. Use the direction arrow and distance information to proceed to your destination.”
- To reach the destination, refer to the map screen. Always follow actual roads and regulations and drive safely.
- The suggested route may not be the shortest, nor are other circumstances such as traffic jams considered.
- Because of the inevitable difference in road conditions and circumstances between the time you use this system and the time the information was produced for the map data, there may be discrepancies in roads and regulations. In such cases, follow the actual information available.
- During route calculation, the map will not scroll, however the vehicle icon will move with the actual vehicle’s movement.
- During route calculation, buttons such as <MAP>, <DEST>, <ZOOM OUT> and <ZOOM IN> and the multi-function controller will be disabled.
- In some cases, after the calculation is complete, the calculated route may not be immediately displayed.
- Waypoints that have been passed will be disregarded by rerouting calculation.
- If you scroll the map while the suggested route is being drawn, it may take more time to finish drawing.
- If waypoints are set, the system calculates multiple routes between waypoints simultaneously, and the following may result.
  - If one section between waypoints cannot be calculated, none of the route will be displayed.
  - The route may not connect completely at some waypoints.
  - The route may require a U-turn close to some waypoints.
- Route calculation may not be completed in the following cases.
  - If there is no main road within a range of 1.5 miles (2.5 km) from the vehicle, a message saying so will appear on the screen. Try recalculating when the vehicle is closer to a main road.
  - If there is no main road within a range of 1.5 miles (2.5 km) from the destination or waypoint, a message saying so will appear on the screen. Try setting the location closer to a main road.
  - If the vehicle is too close to the destination or if there are no roads to the destination, a message saying so will appear on the screen.
– If it is impossible to reach the destination or waypoints because of traffic regulations, etc.
– If the only route to reach the destination or waypoints is extremely complicated.
– If the destination, current vehicle position or waypoint is within the “Avoid Area”.
– If a part of the route is included in the “Avoid Area”.

• The following may occur when the route is displayed.
  – If you calculate a route on a main road, the starting point of the route may not exactly match the current vehicle location.
  – The endpoint of the route may not exactly match the destination.
  – If you calculate a route on a main road, the system may display a route from another main road. This may be because the position of the vehicle icon is not accurate. In this case, park the vehicle in a safe location and reset the vehicle icon, or continue driving to see if the position of the vehicle icon is automatically adjusted before recalculating the route.

– There are cases in which the system shows an indirect route to reach the destination or waypoints, if you set them from stored or facility information. In order to correct this, you must be careful about the traffic direction, especially when lanes with different travel directions are shown separately, such as interchanges and service areas.

– This system makes no distinction between limited traffic control and total control (blockage). It may show an indirect route even if the road is usable.

– Even if the freeway preference is set to OFF, a route that uses the freeway may be suggested.

– Even if the ferry preference is set to OFF, a route that uses a ferry line may be suggested.

– Ferry lines, excluding those that are only for pedestrians, bicycles and motorcycles, are stored in this system. Take into consideration the travel time required and operational condition before deciding whether to use them or not.

INFO:
The system will only announce street names when the system language is set to English. Street names are not announced when the system is set to Français (French).

BASICS OF VOICE GUIDANCE
Voice guidance announces which direction to turn when approaching an intersection in which a turn is necessary.

NOTE:
• There may be some cases in which voice guidance and actual road conditions do not correspond. This may occur because of discrepancies between the actual road and the information on the map data, or it is due to the vehicle’s speed.

• In case voice guidance does not correspond to the actual road conditions, follow the information obtained from traffic signs or notices on the road.

• Route guidance provided by the navigation system does not take carpool lane driving into consideration, especially when carpool lanes are separated from other road lanes.
DIRECTIONS PROVIDED AND DISTANCES TO GUIDE POINTS

Directions will differ, depending on the road type.

INFO:
Distances may vary, depending on the vehicle speed.

Notification of intersection on ordinary roads

1. “In about one quarter mile (400 meters), right (left) turn.”
2. “Right (left) turn ahead.”

Notification of consecutive intersections on ordinary roads

When the road has three or more consecutive intersections ahead, voice guidance will announce the following.
1. “In about one quarter mile (400 meters), right (left) turn, then in about one quarter mile (400 meters) left (right) turn.”
2. “Left (right) turn ahead, then in about one quarter mile (400 meters) right (left) turn.”

Notification of freeway entrance

1. “In about one quarter mile (400 meters) freeway entrance on your right onto (road number and direction).”
2. “Freeway entrance on your right onto (road number and direction).”
Notification of freeway junction

1. “In about one mile (1.6 kilometers), keep to the right (left) onto (road number and direction), then in about one quarter mile (400 meters) keep to the right (left).”

2. “Keep to the right (left) onto (road number and direction), then in about one quarter mile (400 meters) keep to the right (left).”

3. “Keep to the right (left) onto (road number and direction).”

Notification of freeway exit

1. “In about one mile (1.6 kilometers), exit on your right.”

2. “Take the second exit on your right.”

Notification when approaching destination

Ordinary road:
When approaching the destination, voice guidance will announce, “You have arrived at your destination. Ending route guidance.” To finally reach your destination, refer to the map screen.

Dark green road:
After passing the last turning point on a suggested route, voice guidance will announce, “The route to your destination includes roads through incomplete map areas. Voice guidance will not be provided in these areas.” When approaching the endpoint of the suggested road, voice guidance will announce, “Entering the road with incomplete map data. Please use the direction arrow and distance information to proceed to your destination.”

REPEATING VOICE GUIDANCE
This function is available throughout route guidance, from the time after the route calculation is completed until the vehicle arrives at the destination. Push <VOICE>. Voice guidance will be repeated.
INFO:

- If `<VOICE>` is pushed when the vehicle is deviating from the suggested route and when the automatic reroute function is off, voice guidance will announce, “Proceed to the highlighted route.”
- If `<VOICE>` is pushed when the vehicle is going in the wrong direction, voice guidance will announce: “Please make a legal U-turn if possible.”

NOTES ON VOICE GUIDANCE

- Voice guidance in this system should be regarded as a supplementary function. When driving the vehicle, check the route on the map and follow the actual roads and traffic regulations.
- Voice guidance is activated only for intersections with certain conditions. There may be cases that the vehicle has to turn, but voice guidance is not provided.
- Voice guidance contents may vary, depending on the direction of the turn and the type of intersection.
- The voice guidance timing will vary depending on the situation.
- When the vehicle has deviated from the suggested route, voice guidance is not available. The system will not announce this. Refer to the map and recalculate the route. “Recalculating route” (page 5-20)
- Voice guidance may not accurately correspond with road numbers and directions at freeway junctions.
- Voice guidance may not accurately correspond to street names at freeway exits.
- The displayed street names may sometimes differ from the actual names, or “UNKNOWN STREET NAME” may be displayed.
- Voice guidance is not available when the [Guidance Voice] is turned off. “Turning voice guidance ON/OFF” (page 2-19)
- Voice guidance will start when the vehicle enters the suggested route. Refer to the map for directions to the starting point of the route.
- When approaching a waypoint, voice guidance will announce, “You have arrived at waypoint 1 (2, 3, 4,...).” Voice guidance will switch to the next section of the route. When voice guidance is not available, refer to the map for directions.
- In some cases, voice guidance ends before arrival at the destination. Refer to the destination icon on the map to reach the destination.
- If the system recognizes on which side the destination (waypoint) is located, voice guidance will announce “on the right/left” after announcing the arrival at the destination.
- Voice guidance may be partially operational or inoperative due to the angle of roads at an intersection.
- Because freeway lane information is available only for approximately 7,000 major freeways in North America, it is not possible to display information for all junctions and exits.
- Freeway exit information may differ from the information on the actual exit signs.
- Because it is not possible to consider data concerning roads that are seasonally available or unavailable, a route may be displayed that does not match the actual traffic restrictions. Be sure to follow the actual traffic restrictions while driving.
Canada and Alaska contain many roads with incomplete map data. As a result, when searching for a route, the route may include roads with incomplete data. In regions where road data is not complete, voice guidance may stop for long periods of time. Be sure to follow the actual traffic restrictions while driving.

The NavTraffic information service is not provided for some cities. In addition, the cities for which the traffic information service is provided may be changed.

In some cases, infrastructure problems may prevent the complete display of the traffic information. This is not a malfunction.

Due to infrastructure problems, or due to the time when the traffic information service broadcast is received, the displayed information may differ from the actual traffic conditions.

Depending on the traffic information, a detour route may be slower than the original route.

NavTraffic is a service of SiriusXM Satellite Radio. NavTraffic is only available in select markets and is subject to data availability. Reception of the SiriusXM signal may vary depending on location. It requires a monthly premium subscription. The service provider is solely responsible for the quality and accuracy of the information provided. All fees and programming are subject to change. For more details on the NavTraffic service, terms and conditions, please visit www.siriusxm.com/navtraffic.

You can also contact SiriusXM Satellite Radio at 1-866-635-2349.

As of January 31, 2009, the NavTraffic service covers 80 major metropolitan markets. For the most current list of markets covered, please refer to www.siriusxm.com/navtraffic, or call SiriusXM Satellite Radio customer support at 1-866-635-2349.

Due to road maintenance, infrastructure problems (e.g. malfunction of road sensors, outage of central computer of infrastructure) or natural disasters, there are times when some or all traffic information may not be available.

Incident information is based on human collection. Not all incidents that have happened are collected and provided.

Due to infrastructure problems, or transmission delay, there are times when the information may differ from the actual condition. Always observe safe driving practices and follow all traffic regulations.

Due to the coverage and quality of traffic information and road conditions, it is not always possible for the...
system to provide the shortest time route even when traffic information is considered.

- Traffic information that is displayed may differ from information from other media (e.g., radio), as other media may use different information sources.

- The NavWeatherXM information service is not provided for some cities. In addition, the cities for which the weather information service is provided may be changed.

- In some cases, infrastructure problems may prevent the complete display of the weather information. This is not a malfunction.

- Due to infrastructure problems, or due to the time when the weather information service broadcast is received, the displayed information may differ from the actual weather conditions.

- NavWeatherXM is a service of SiriusXM Satellite Radio. NavWeatherXM is only available in select markets and is subject to data availability. Reception of the SiriusXM signal may vary depending on location. It requires a monthly premium subscription. The service provider is solely responsible for the quality and accuracy of the information provided. All fees and programming are subject to change. For more details on the NavWeatherXM service, terms and conditions, please visit www.siriusxm.com/navweather. You can also contact SiriusXM Satellite Radio at 1-866-635-2349.

- NavWeatherXM is designed to provide real-time weather and forecasting information in your general vicinity. Discrepancies may be encountered between the system and your actual location. Road system and weather changes may affect the accuracy of the information provided. Rely on your common sense to decide whether to follow a specified route. Detailed coverage is not available in every city or roadway.
HOW TO ORDER MAP DATA UPDATES
To order updated map data, contact the NISSAN NAVIGATION SYSTEM HELPDESK. See the contact information on the inside front cover of this manual.

ABOUT MAP ICONS
The marks of companies displayed by this product to indicate business locations are the marks of their respective owners. The use of such marks in this product does not imply any sponsorship, approval, or endorsement by such companies of this product.

ABOUT MAP DATA
1. This map data has been prepared by HITACHI, LTD. under licence from HERE. Due to the production timing of the map data, some new roads may not be included in this map data or some of the names or roads may be different from those at the time you use this map data.
2. Traffic control and regulation data used in this map data may be different from those at the time you use this map data due to the data production timing. When driving your vehicle, follow the actual traffic control signs and notices on the roads.
3. Reproducing or copying this map software is strictly prohibited by law. Published by Nissan North America, Inc. © 1987–2018 HERE. All rights reserved.
   Certain business data provided by infoUSA, Inc., Omaha, NE, Copyright © 1987–2018 HERE. All rights reserved. © 2008, All Rights Reserved.

WARNING
- This navigation system should not be used to replace your own judgement. No itinerary suggested by this navigation system should ever override any highway regulations, your own judgement, or a knowledge of safe driving practices. Do not follow the navigation system’s suggested itinerary if it would cause you to perform a dangerous or illegal act, place you in a dangerous situation, or take you into an area you consider unsafe.
- The advice provided by the navigation system is to be regarded as a suggestion only. There may be times when the navigation system displays the vehicle’s location incorrectly, fails to suggest the shortest route, or fails to direct you to the your desired destination. In such instances, rely on your own driving judgement, taking into account the driving conditions at the time.
- Do not use the navigation system to locate emergency services. The database does not contain a complete listing of emergency services such as police stations, fire halls, hospitals and walk-in clinics. Please show discretion and ask for directions in such instances.
- As the driver, you alone are responsible for your driving safety.
  — In order to avoid a traffic accident, do not operate the system while driving.
  — In order to avoid a traffic accident, operate the system only when the vehicle is stopped at a safe place and the parking brake is on.
  — In order to avoid a traffic accident or traffic offence, remember that actual road conditions and traffic regulations take...
precedence over the information contained on the navigation system.

— The Software may contain inaccurate or incomplete information due to the passage of time, changing circumstances, and the sources of information used. Please respect current traffic conditions and regulations at all times while driving.

— Where actual road conditions and highway regulations differ from the information contained on the navigation system, abide by the highway regulations.

— Keep the amount of time spent viewing the screen while driving to a strict minimum.

The navigation system does not provide, nor represent in any way information on: traffic and highway regulations; technical aspects of the vehicle including weight, height, width, load and speed limits; road conditions including grade, percentage of incline and surface conditions; obstacles such as the height and width of bridges and tunnels; and other current driving or road conditions. Always rely on your own judgement when driving a car, taking into account current driving conditions.

The marks of companies displayed by this product to indicate business locations are the marks of their respective owners. The use of such marks in this product does not imply any sponsorship, approval, or endorsement by such companies of this product.

END-USER TERMS

The data (“Data”) is provided for your personal, internal use only and not for resale. It is protected by copyright, and is subject to the following terms and conditions which are agreed to by you, on the one hand, and HITACHI (“HITACHI”) and its licensors (including their licensors and suppliers) on the other hand.

© 1987–2018 HERE. All rights reserved.

The Data for areas of Canada includes information taken with permission from Canadian authorities, including: © Her Majesty the Queen in Right of Canada (“Her Majesty”), Canada Post Corporation (“Canada Post”) and the Department of Natural Resources Canada (“NRCan”). Such data is licensed on an “as is” basis. The licensors, including Her Majesty, Canada Post and NRCan, make no guarantees, representations or warranties respecting such data, either express or implied, arising by law or otherwise, including but not limited to, effectiveness, completeness, accuracy or fitness for a particular purpose.

The licensors, including Her Majesty, Canada Post and NRCan, shall not be liable in respect of any claim, demand or action, irrespective of the nature of the cause of the claim, demand or action alleging any loss, injury or damages, direct or indirect, which may result from the use or possession of the data or the Data. The licensors, including Her Majesty, Canada Post and NRCan, shall not be liable in any way for
loss of revenues or contracts, or any other consequential loss of any kind resulting from any defect in the data or the Data.

End User shall indemnify and save harmless the licensors, including Her Majesty, Canada Post and NRCan, and their officers, employees and agents from and against any claim, demand or action, irrespective of the nature of the cause of the claim, demand or action, alleging loss, costs, expenses, damages or injuries (including injuries resulting in death) arising out of the use or possession of the data or the Data.

Terms and conditions

Personal Use Only. You agree to use this Data together with Nissan Automotive Products for the solely personal, non-commercial purposes for which you were licensed, and not for service bureau, timesharing or other similar purposes. Accordingly, but subject to the restrictions set forth in the following paragraphs, you may copy this Data only as necessary for your personal use to (i) view it, and (ii) save it, provided that you do not remove any copyright notices that appear and do not modify the Data in any way. You agree not to otherwise reproduce, copy, modify, decompile, disassemble or reverse engineer any portion of this Data, and may not transfer or distribute it in any form, for any purpose, except to the extent permitted by mandatory laws. Multi-disc sets may only be transferred or sold as a complete set as provided by HITACHI and not as a subset thereof.

Restrictions. Except where you have been specifically licensed to do so by HITACHI, and without limiting the preceding paragraph, you may not (a) use this Data with any products, systems, or applications installed or otherwise connected to or in communication with vehicles, capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (b) with or in communication with any positioning devices or any mobile or wireless-connected electronic or computer devices, including without limitation cellular phones, palmtop and handheld computers, pagers, and personal digital assistants or PDAs.

Warning. The Data may contain inaccurate or incomplete information due to the passage of time, changing circumstances, sources used and the nature of collecting comprehensive geographic data, any of which may lead to incorrect results.

No Warranty. This Data is provided to you “as is,” and you agree to use it at your own risk. HITACHI and its licensors (and their licensors and suppliers) make no guarantees, representations or warranties of any kind, express or implied, arising by law or otherwise, including but not limited to, content, quality, accuracy, completeness, effectiveness, reliability, fitness for a particular purpose, usefulness, use or results to be obtained from this Data, or that the Data or server will be uninterrupted or error-free.

Disclaimer of Warranty: HITACHI AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) DISCLAIM ANY WARRANTIES, EXPRESS OR IMPLIED, OF QUALITY, PERFORMANCE, MERCHANTABILITY, FIT-
NESS FOR A PARTICULAR PURPOSE OR NONINFRINGEMENT. Some States, Territories and Countries do not allow certain warranty exclusions, so to that extent the above exclusion may not apply to you.

Disclaimer of Liability: HITACHI AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) SHALL NOT BE LIABLE TO YOU: IN RESPECT OF ANY CLAIM, DEMAND OR ACTION, IRRESPECTIVE OF THE NATURE OF THE CAUSE OF THE CLAIM, DEMAND OR ACTION ALLEGING ANY LOSS, INJURY OR DAMAGES, DIRECT OR INDIRECT, WHICH MAY RESULT FROM THE USE OR POSSESSION OF THE INFORMATION; OR FOR ANY LOSS OF PROFIT, REVENUE, CONTRACTS OR SAVINGS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF YOUR USE OF OR INABILITY TO USE THIS INFORMATION, ANY DEFECT IN THE INFORMATION, OR THE BREACH OF THESE TERMS OR CONDITIONS, WHETHER IN AN ACTION IN CONTRACT OR TORT OR BASED ON A WARRANTY, EVEN IF HITACHI OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Some States, Territories and Countries do not allow certain liability exclusions or damages limitations, so to that extent the above may not apply to you.

Export Control. You agree not to export from anywhere any part of the Data provided to you or any direct product thereof except in compliance with, and with all licenses and approvals required under, applicable export laws, rules and regulations.

Entire Agreement. These terms and conditions constitute the entire agreement between HITACHI (and its licensors, including their licensors and suppliers) and you pertaining to the subject matter hereof, and supersedes in their entirety any and all written or oral agreements previously existing between us with respect to such subject matter.

Governing Law. The above terms and conditions shall be governed by the laws of the State of Illinois, without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for Contracts for the International Sale of Goods, which is explicitly excluded. You agree to submit to the jurisdiction of the State of Illinois for any and all disputes, claims and actions arising from or in connection with the Data provided to you hereunder.

Government End Users. If the Data is being acquired by or on behalf of the United States government, HERE Data (hereinafter “Data”) is a “commercial item” as that term is defined at 48 C.F.R. (“FAR”) 2.101, is licensed in accordance with ENDUSER TERMS, and each copy of the Data delivered or otherwise furnished shall be marked and embedded as appropriate with the following “Notice of Use,” and shall be treated in accordance with such Notice:

NOTICE OF USE

CONTRACTOR (MANUFACTURER/SUPPLIER) NAME: HERE
CONTRACTOR (MANUFACTURER/SUPPLIER) ADDRESS: 425 West Randolph St., Chicago, Illinois 60606
This Data is a commercial item as defined in FAR 2.101 and is subject to END-USER TERMS under which this Data was provided. © 1987–2018 HERE – All rights reserved.

If the Contracting Officer, federal government agency, or any federal official refuses to use the legend provided herein, the Contracting Officer, federal government agency, or any federal official must notify HERE prior to seeking additional or alternative rights in the Data.
HOW TO HANDLE DISPLAY

The display is a liquid crystal display and should be handled with care.

⚠ WARNING
Never disassemble the display. Some parts utilize extremely high voltage. Touching them may result in serious personal injury.

CHARACTERISTICS OF LIQUID CRYSTAL DISPLAY

- If the temperature inside the vehicle is especially low, the display will stay relatively dim or the movement of the images may be slow. These conditions are normal. The display will function normally when the interior of the vehicle has warmed up.

- Some pixels in the display are darker or brighter than others. This condition is an inherent characteristic of liquid crystal displays, and it is not a malfunction.

- A remnant of the previous display image may remain on the screen. This screen burn is inherent in displays, and it is not a malfunction.

INFO:
The screen may become distorted by strong magnetic fields.

MAINTENANCE OF DISPLAY

⚠ CAUTION
- To clean the display, never use a rough cloth, alcohol, benzine, thinner and any kind of solvent or paper towel with a chemical cleaning agent. They will scratch or deteriorate the panel.
- Do not splash any liquid such as water or car fragrance on the display. Contact with liquid will cause the system to malfunction.

To clean the display screen, use a dry, soft cloth. If additional cleaning is necessary, use a small amount of neutral detergent with a soft cloth. Never spray the screen with water or detergent. Dampen the cloth first, then wipe the screen.
